

DATASHEET

Thermal Protector N01

Type series 01

Construction and function

The switchgear of type series 01 is fixed in a positive lock and is self-aligning between the floor of a conductive housing (1) and a contact cap which is made of steel (2) and insulated from it, plus an integrated stationary silver contact (6) which closes the housing like a button cell. At the same time, the spring snap-in disc (3) which forms the current transfer element bears the movable contact (4) and discharges the flow of current and self-heating from the bimetallic disc (5) by exercising consistent, steady contact pressure. The bimetallic disc (5) is held on the one movable contact (4) which sticks out through this without having to be welded or fixed. As such, it can continually work (exposed) and only reacts to the ambient temperature in the device to be protected. When the rated switching temperature is reached, the bimetallic disc (5) snaps into its inverted position and pushes the spring snap-in disc (3) downwards. The contact is abruptly opened and the temperature rise of the device to be protected is disrupted. If the ambient temperature now falls, the bimetallic disc (5) snaps back into its start position when reaching the defined reset temperature and the contact is closed again.

Features:

Specially flat design	to fit closely built-up circuits
Quick response sensitivity	Featured by small protector mass and the metal-housing
Excellent long term performance	due to instantaneous switching, fine silver contacts, constant contact resistance and to electrically as well as mechanically unstressed bimetallic disc, reproducible switching temperature values
Instantaneous switching	with always constant contact pressure up to the nominal switching point, resulting in low contact stress
Very short bounce times	< 1 ms
Temperature resistance	by use of high temperature resistant materials and components

Technical Data Type N01

The listed products are an extract from our standard range. Other versions and customised manufacturing are available upon request.

N01

Type: Normally closed; resets automatically; with a connection wire; partially insulated in a plastic cap

Diameter d	10,0 mm
Installation height h	from 3,4 mm
Length of the connection pins	14,0 mm / 20,0 mm

Nominal switching temperature (NST) in 5 °C increments	60 °C - 200 °C	
Tolerance (standard)	±2,5 K / ±5 K	
Reverse Switch Temperature (defined RST is possible at the customer's request)	UL	≥ 35 °C (≤ 80 °C NST) -35 K ± 15 K (≥ 85 °C ≤ 180 °C NST)
	VDE	-65 K ± 15 K (≥ 185 °C ≤ 200 °C NST) ≥ 35 °C
Installation height	from 3,4 mm	
Diameter	10,0 mm	
Length of the connection pins	14,0 mm / 20,0 mm	
Resistance to impregnation *	suitable	
Suitable for installation in protection class	I	
Pressure resistance to the switch housing *	450 N	
Standard connection Connecting wire with	d = 0,5 mm	
Available approvals (please state)	IEC; ENEC; VDE; UL; CSA; CQC	
Operational voltage range AC/DC	up until 500 V AC / 14 V DC	
Rated voltage AC	250 V (VDE) 277 V (UL)	
Rated current AC cos φ = 1.0/cycles	2,5 A / 10.000	
Rated current AC cos φ = 0.6/cycles	1,6 A / 10.000	
Max. switching current AC cos φ = 1.0/cycles	6,3 A / 3.000 7,5 A / 300	
Rated current AC cos φ = 0.4/cycles	1,8 A / 10.000	
Max. switching current AC cos φ = 0.4/cycles	7,2 A / 1.000	
Rated voltage DC	12 V	
Max. switching current DC/cycles	40,0 A / 5.000	
Total bounce time	< 1 ms	
Contact resistance (according to MIL-STD. R5757)	≤ 50 mΩ	
Vibration resistance at 10 ... 60 Hz	100 m/s ²	

Ordering example:

N01 - 125.05 0020 / 0020

Type / version _____
 NST [°C] _____
 Tolerance [K] _____
 Pin lengths [mm] _____ P₁ P₂

Marking example:

 Trade mark _____ **thermik**
 Type / version _____ **N01**
 NST [°C] . Tolerance [K] — **125.05**
