

Microchanneling Post-Care

1. If you are given a mask, keep in on for at least 15 minutes.
2. If any Microchannel Delivery Solution roll-on remains, or if you are given a dilute solution at the end of treatment, apply every 5 – 10 minutes until gone.
3. Preferably no other products are applied until the following day, (although technically it is safe to apply products and makeup after about 2 hours).
4. Avoid exposure to pet dander and other irritants as best you can. You may experience a mild allergic reaction to pets and other things you typically do not react to within the first 24 hours.
5. Your skin may feel hot and tight, like a mild sunburn. Moisturize often.
6. For your first treatment, (and treatments at .25mm in general) you can expect mild redness and swelling, and a tight, warm sensation for between 4 & 24 hours.
7. Later treatments, or those with longer needle lengths may produce redness and swelling along with tiny flecks of redness for between 4 & 72 hours.
8. Mild skin sloughing may occur for a few days after treatment.
9. Mild acne and milia can occur in rare cases. Don't pick and they'll go away in a few days.
10. Trans-Epidermal Water Loss is a common temporary side effect and could leave you feeling dry through the first week. Keep the recommended moisturizer with you during the day and apply as frequently as necessary to avoid a dry sensation. The more you moisturize the better your results will be.
11. Beginning the following morning; apply the Cellular Renewal Serum and Healing Accelerator to enhance results. (Cleanse and apply 1-3 pumps). Apply daily, morning and evening.
12. Return for a follow up treatment in about a month or as recommended
