

INDEX

01 Who we are

Timeline, Why Loramendi, Mondragon, Worldwide presence.

02 Business units

Core making, Vertical moulding, 3D printing, Tooling, Service.

03 Sectors

Automotive, Industrial vehicles, Railway, Miscellaneous.

04 Clients

Some of our clients worldwide.

SOME FACTS

1973

Foundation

Agustin Arana decided to found Loramendi and create his own core blowing company to cover a gap in the Spanish industry.

1986

Beyond Euskadi

Loramendi sold his first machine to China leading the company to a new era.

1989

Key Core System

Development of a system for joining cores through sand, removing external joining elements such as rods or glue. This revolution lead Loramendi to supply full production lines to the US, Germany and China.

2004

We join Mondragon

The company becomes part of the Mondragon group and becomes a cooperative.

2010

Inorganic technology

Loramendi joins BMW and together they manage to stop manufacturing cores with organic chemistry and begin an inorganic process, a mixture of water-sand-silicates and a dehydration curing process that not only raises castings quality but also helps to reduce the carbon footprint.

2011

Vertical moulding

Loramendi patents the first electric vertical molding machine.

2018

Impossible cores

Loramendi develops the Industrialization of Core Printing(ICP), sand cores additive technology. Presented at 2019 GIFA and adopted by BMW next year with 5 printers.

2023

And now, you

We'll be happy to cooperate to you soon. But first, please go to next slide to understand why.

LORAMENDI WORLDWIDE

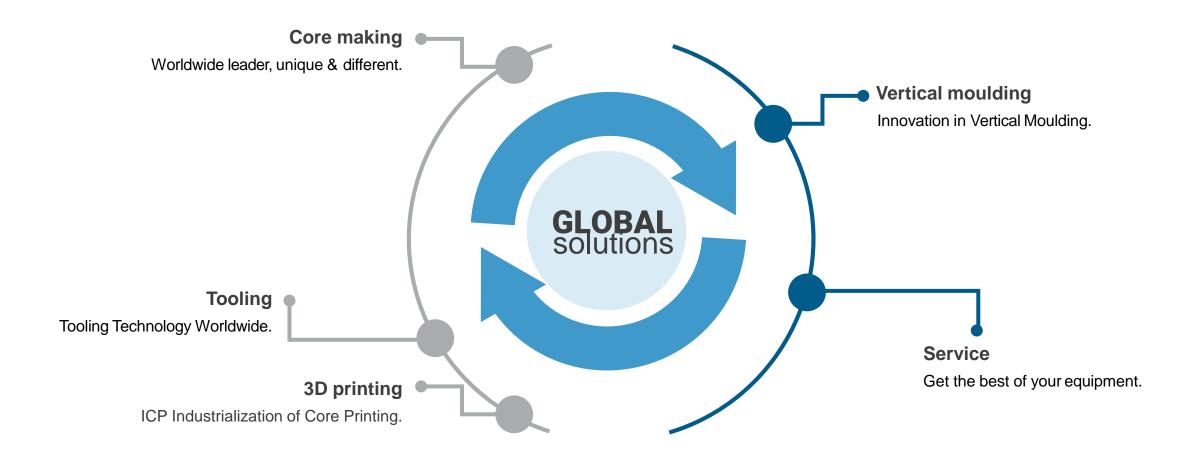

Subsidiaries

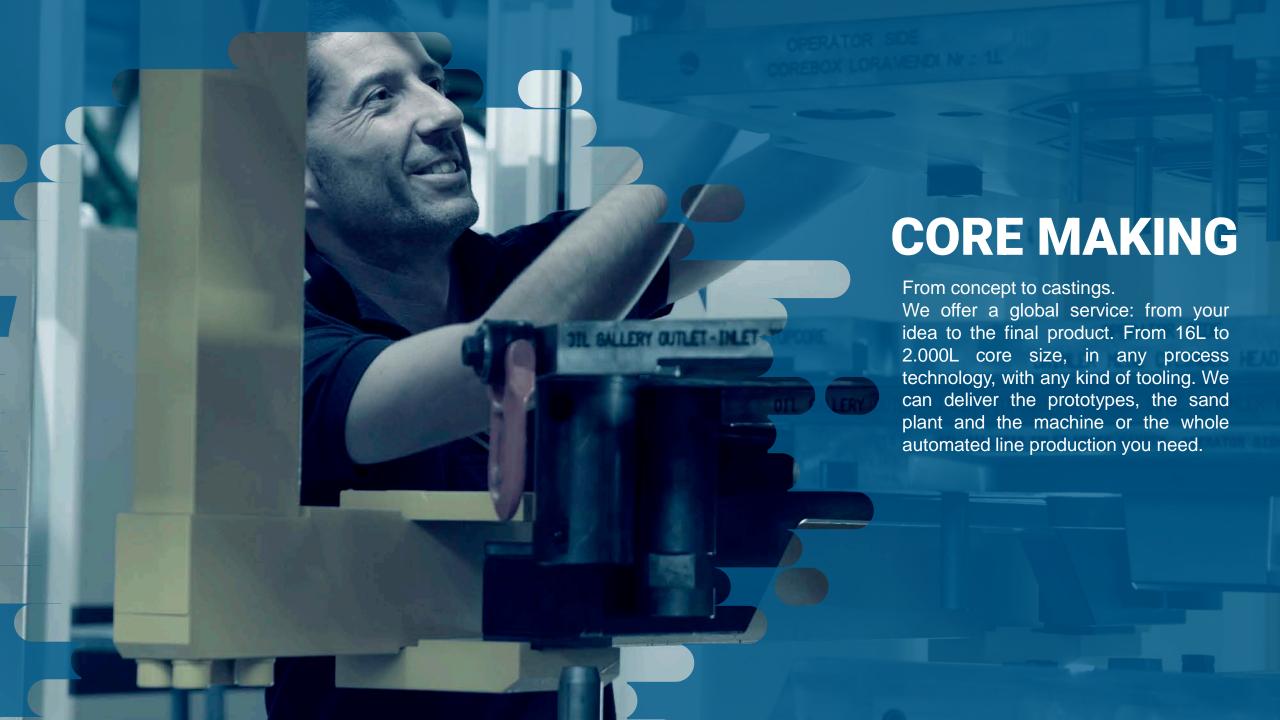

Since 1989 we have created subsidiaries around the world to increase the response rate to our customers. Today we have 7 offices in key cities as Shanghai, Pune, Cape Town, Ratingen, Moscow, Reims, Fenton and Saltillo.

Our headquarters are located in Vitoria-Gasteiz, a technological hub in Euskadi(North Spain).

More about Loramendi's global presence.

BUSINESS UNITS

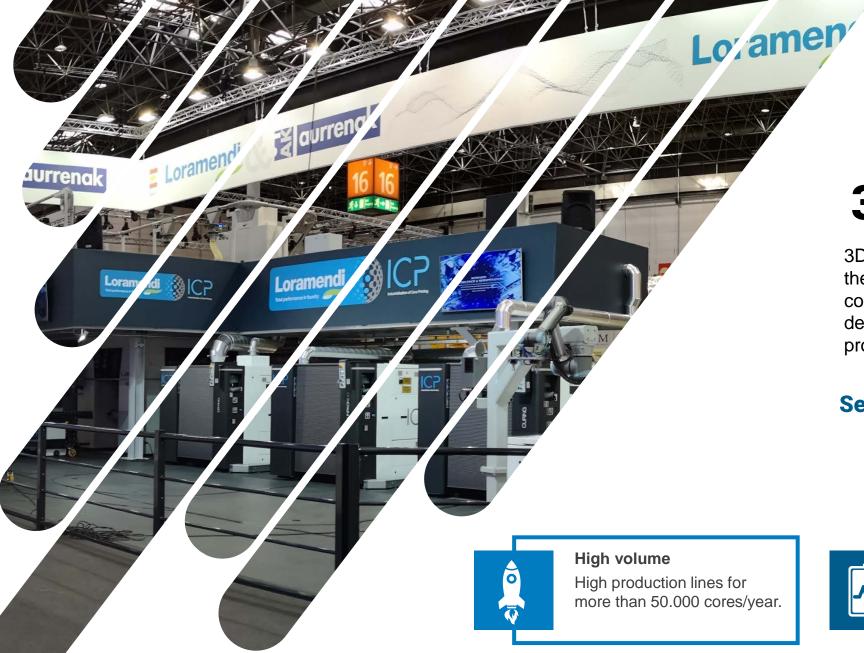

See what we can do

VERTICAL MOULDING

Loramendi eVMM can help you reach your CO2 emission goals and, at the same time, save money on the ever increasing energy cost without sacrificing on quality or productivity of your vertical molding equipment. Our flexibility and adaptation will put you ahead of your competitors and place you in the leading position on the world market.

Loramendi e-VMM! Multimachine See what we can do

3D PRINTING

3D printing enable our customers with the massive production of 3D printed cores challenging conventional tooling design limitations to create disruptive product designs.

See our 3D printers at last GIFA

Mid volume

Semi automatic lines for less than 50.000 cores/year.

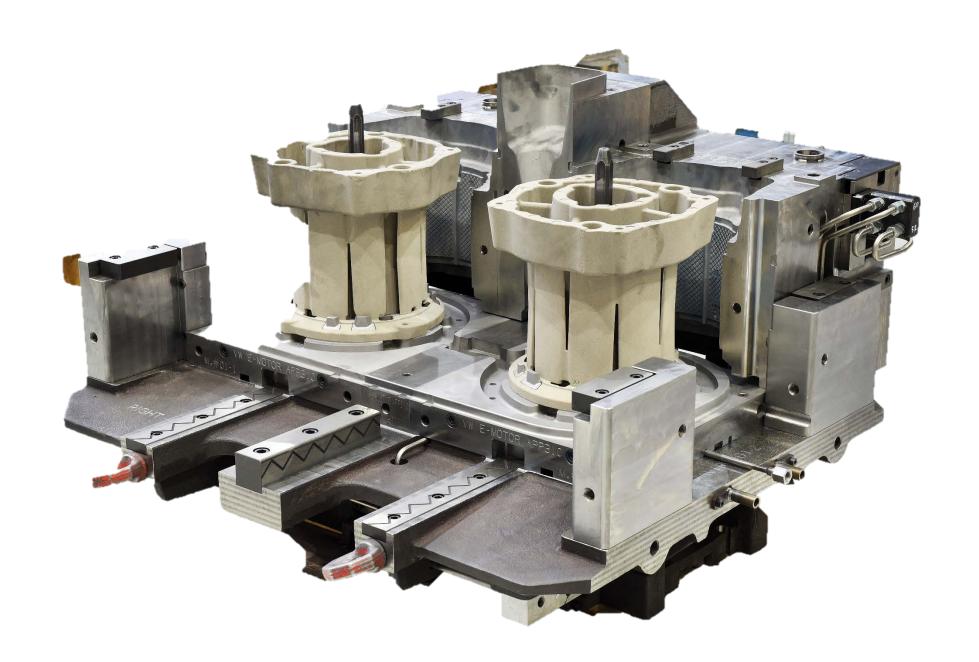

TOOLING

Qualified prototype castings made in Aurrenak

Innovative engineering solutions

Dies for structural parts, motorblocks, electrical vehicles

Big dies manufacturing(up to 60t)

SERVICE

SECTORS

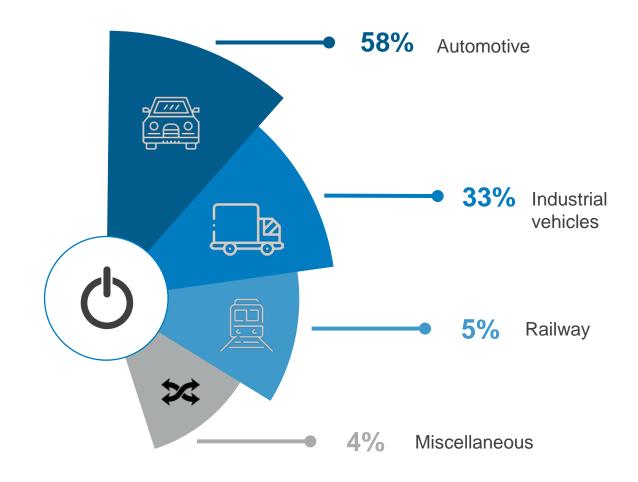

Loramendi

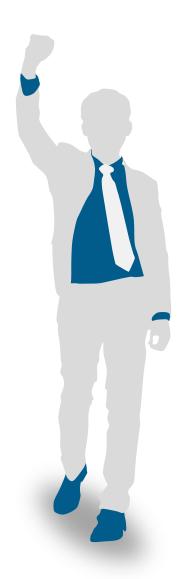

58%

More than half of our projects belong to the automotive sector and that makes us experts in the field.

But we also work regularly for two other sectors: first, industrial vehicles mainly for Volvo, Scania and Caterpillar and second, railway sector largely to Kocel and McConway and Torley.

Finally, some of our projects fall into a broader classification; we do things such as pumps, heaters and hydraulic valves.
