

Introducing DF5 Fuel Modifier

DF5 Fuel Modifier (additive), provides immediate and drastic decarbonation in both gas and diesel fuels. Third party lab verified, DF5 increases MPG, cuts emissions, reduces DEF use, and decreases DPF Regens. Using DF5 saves in fuel costs and down time, while simultaneously restoring our planet.

Benefits of DF5 Fuel Modifier

- ▶ **8 to 13% More MPG**
(Runtime In Engines & Gensets)
- ▶ **Cuts Emissions 40 to 67%**
(CO, HC, NOx)
- ▶ **40 to 50% Reduction In DEF Use**
- ▶ **60 to 80% Fewer DPF Regens**

DF5 Is Carbon Credit Certified

Certification: Global Green Institute

Every purchase of **DF5 Fuel Modifier™** saves fuel and DEF costs, by optimizing combustion in both gas and diesel. **DF5** not only reduces emissions, but the abated fuel usage creates certified carbon credits, cleaning our world, and improving ESG impacts.

Third Party Lab Tested & Verified

Test Data

DF5 Fuel Modifier is third party lab tested and verified by these companies, and more. Test data: www.greentec labs.com or email: info@greentec labs.com
