THRUST SYSTEM

Pull the lever down for hard materials, press up for soft materials. In the down position, thrust force is increased by about 40%.

With a 20% larger contact surface area between plunger and valve plate, there is no loss in thrust force.

The four-point system strengthens thrust force on the plunger. This means it can be used with ease, even with hard materials.

FUNCTIONS

Ideal for maneuvering in and around tight spaces.

Plunger retracts a few millimeters after every push, efficiently stopping flow.

CAULK GUNS

CONVOY® SUPER SAUSAGE GUN 2WAY™

Removing the piston allows two material types (sausage or cartridge) to be used.
No tools are needed for piston replacement.

LAYOUT TOOLS

SLANT™ SERIES

Fast and reliable tools to measure, set, or replicate a pitch or angle.

1.

2.

3.

TO MEASURE AN ANGLE OR PITCH

1. Place the bottom of the pitch / angle meter flush with the surface to be measured.
2. Rotate the thumb-screw knob until the bubble in the vial is centered between the alignment lines then read the angle or pitch calibration mark at the index pointer.
3. Invert the pitch / angle meter to measure a downward slope.

1.

2.

3.

TO SET AN ANGLE OR PITCH

1. Rotate the thumb-screw knob until the index pointer is positioned at the desired angle or pitch calibration mark.
2. Place the bottom of the pitch / angle meter flush with the surface to be set.
3. Rotate together until the bubble in the vial is centered between the alignment lines.

SLANT™ AL200 / 100

- Rotating dual-scale angle meter to single-handedly measure, set, or replicate a pitch or angle
- Durable aluminum frame
- Magnet on bottom allows for hands-free use with compatible surfaces

UTILITY KNIVES & BLADES

Only SK-120 Premium Grade Steel

The purest grade of steel ensures the strongest-possible core and results in a more accurately tooled and sharpened blade.

Precise, Multi-Step Sharpening

Optimized cutting edge geometry and advanced honing techniques results in consistent, superior cutting performance.

Japanese-Style Tempering

A centuries-old process of heat-treating and hardening the steel to further maximize blade strength and cutting edge life.

OPTIMIZED BLADE GEOMETRY AND CUTTING EDGE ANGLES

To ensure the best cutting performance for specific types of material.

Endura-Blade™

For general purpose scoring and cutting, ideal for work with drywall, wood and other thick materials. An extremely sharp and strong blade that integrates premium steel, Japanese-style tempering and multi-step sharpening to produce a dependable, solid feel and long cutting performance.

Razar Black Blade™

For precise cutting and fine material slicing, ideal for work with paper, film and other thin materials. A razor-sharp acute angle blade that integrates premium steel, Japanese-style tempering and multi-step sharpening to produce an exceptionally smooth and fine quality of cut.

DRIVER CUTTER™

unique line of knives that feature ultra-hard 0.04 in (1mm) thick tempered blade sleeves with multi-function “driver” tips.

3.5 times stronger than standard models, the Driver Cutter™ blade sleeves conform to strict JIS standards for screwdriver tip hardness so they will easily drive standard head screws. Additionally, Driver Cutter knives can also handle other common tasks including lifting can lids, and opening boxes without having to extend the knife blade.

driving standard-head screws.

prying off can lids.

PULL-STROKE SAWS

JAPAN PULL™ BLADES

Japanese Tempered

Unique steel hardening process that results in blades with exceptional durability and cutting performance.

Impulse Hardened

Spot hardening of blade teeth to further enhance the cutting performance while not reducing blade flexibility.

Fluoro-Coat™

Unique fluorine-based coating that reduces friction and protects against rust and corrosion.

*after cutting through 40 mm thick branches, 100 times.

Alternating 4 tall, 4 short teeth pattern that results in cutting edge sharpness that lasts 3 times longer.

Extra rigid blade for superior tracking and cutting control.

Japanese tempered SK-95 premium steel blade with triple cutting edge teeth and Fluoro-Coat™ blade coating.

Japanese tempered SK-95 premium steel blade with triple cutting edge teeth.

JAPAN PULL™ G-SAW

The diagram illustrates the classification of chainsaws based on handle type and blade type. It is organized into two main vertical sections: **FIXED HANDLE** (top) and **FOLDING HANDLE** (bottom). Each section is further divided into **AGGRESSIVE** and **WOOD** categories. The **AGGRESSIVE** category includes models ALB-A240, ALB-A270, GKB-G210, and GKB-G240. The **WOOD** category includes models ALB-A240, ALB-A270, GKB-G210, and GKB-G240. The **FOLDING HANDLE** section also includes a note about blade options: 8.3 in (210 mm) and 9.4 in (240 mm) blade options only.

Tajima

Founded in 1909 as a manufacturer of steel and woven measuring tapes, TJM Design Corporation now produces over 1,000 premium-grade hand tools under the **Tajima** brand. A multinational organization with global production facilities, TJM Design Corporation continues its commitment to excellence in the design, selection of materials, production and quality control processes that govern the manufacture of its tools. And all TJM Design Corporation staff are dedicated to ensuring that the function, quality, shape and design of **Tajima** tools fulfills the desires and expectations of the end user. As a result, **Tajima** brand tools are recognized worldwide as offering exceptional feature and function at a high level of quality rarely seen in today's industry.
