Citizen Scientist

Who are secondary stakeholders?

How do you make it accessible?

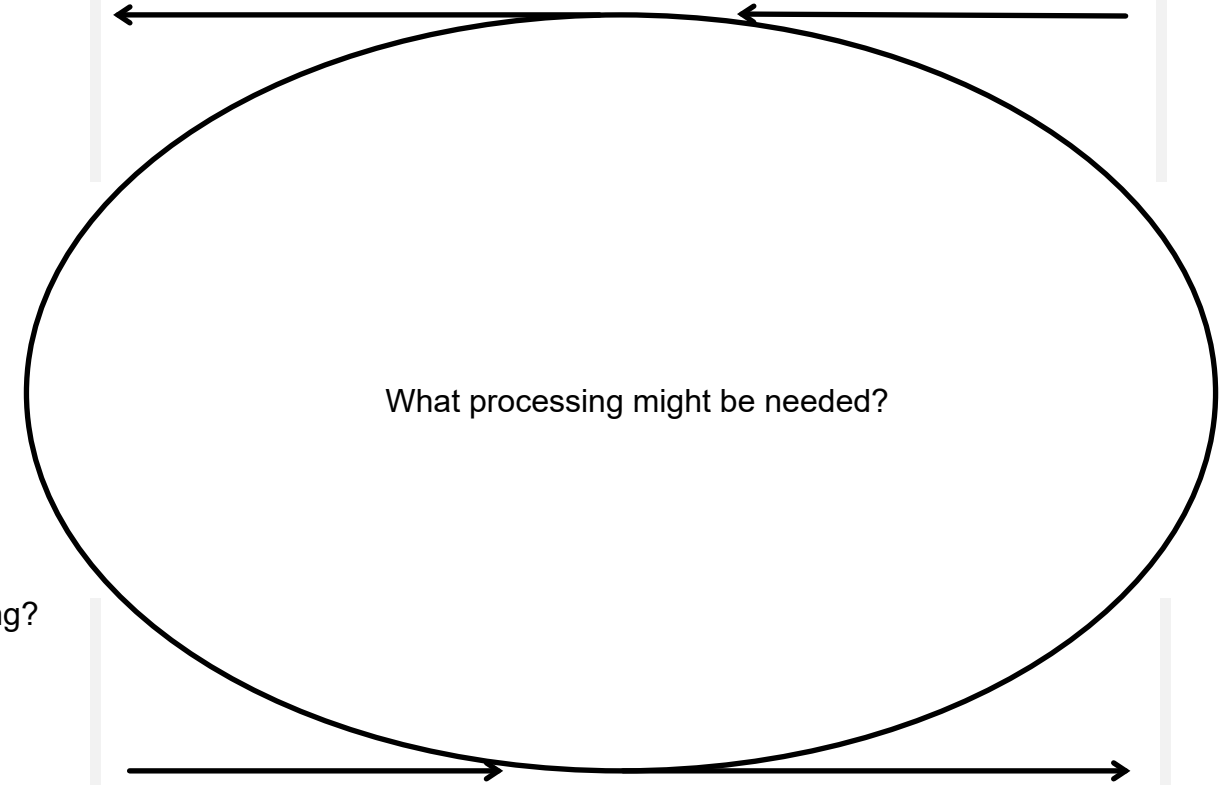

How should citizens access researcher knowledge?

How do you ensure consent/ transparency of purpose?

Engaging?

What do they gain by doing this? (benefit)

What do they provide to citizens? (cost)

What expert knowledge/ resource do they provide?

What expert knowledge/ resource do they provide?

What data are they collecting? (cost)

What data are they analysing? (benefit)

How are they collecting data?

What could ensure data quality?

How should data be stored, archived, and accessed?

What can be done with this analysis?

What sensitive data is needed?

How is sensitive data kept?

What potential harm could happen?

Researchers
