

# Class Descriptions & Pricing

## CREATIVE MOVEMENT

Is a brilliant class for our youngest dancers that trains the students in basic ballet technique and allows them to explore the exciting world of Acrobatic Arts. Dancers will do 30 min of ballet and 15 of Acro.

## BALLET

Body alignment, strength, strong technique, foot articulation, grace, and control are just a few of the things focused on. Ballet is the basic dance form for all styles of dance because of the strong focus on technique.

## TAP

Is great for all ages! Tap focuses on the rhythms that are articulated through the feet. Correct tap terminology is taught at all levels on a graded tap system.

## POINTE

Ballet dancers may only go "en pointe" when invited by instructor. Pointe technique is the part of classical ballet technique in which a ballet dancer supports all weight on the tips of fully extended feet within pointe shoes.

## JAZZ

Is energy packed! Jazz consists of stretching, conditioning, isolations, technique, and center floor combinations. Different combinations of kicks, jumps, turns, and leaps are introduced in all classes.

## CONTEMPORARY/LYRICAL

Focuses on total body connectivity. The class develops a dancer that is aware of core support, the space around them, different energy qualities, and it enhances creativity. This class utilizes ballet and jazz technique.

## HIP HOP

Hip Hop focuses on the creativity of body isolations that are intertwined with musicality. Students will love the high energy that hip hop brings.

## ACRO/TUMBLING

Certified in Acrobatic Arts! Students learn a variety of jumps, somersaults, handstands, backbends, cartwheels, round-offs, walkovers, back handsprings, and aerials developing strength, balance, and coordination.
