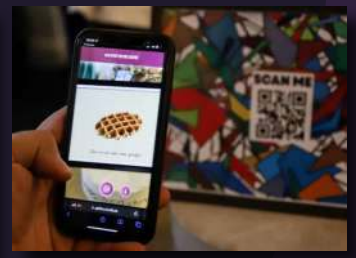
We work with galleries, companies who invest in art as well as the NFT art curious companies.

We curate NFT exhibitions in real-life spaces with screens, billboards, movie theatres, NFT art festivals & conferences and events.

We aim to reach to the audience with WEB3.0 products in real-life places and create immersive experiences.

Screenless AR NFT Exhibitions

- NFT Art exhibitions with immersive experience & interactivity.
- Connecting tech, art & human touch in new media.



YOU ARE THE SCREEN

WEB3.0 IS THE NEW COOL GIFT NFT‘S IN 2023

We use WEB AR tech for interactive AR Games and Products.

ARTIFICIAL INTELLIGENCE NFT ART & MACHINE LEARNING MUSIC CREATION

“Delightful AI Collection” by Anil A. Brug. Over 350 AI-Generated images have been used in the NFT collection.

Music has been generated by deep neural network AI from the First 5 notes of Chopin Op. 10, No. 9 after 52 hours of learning.

We believe the “AI Tech” will be the key element to be used for digital and NFT artists now and in near future. AI can be the artists side persona to collaborate in new dimensions audio & visually.

TURBOSLOW WEB3.0 PROJECTS
