

Bill Stanton

What I've Done for Our Community.

- **Focused on making our lake a safer place:** As Chair of the Security Committee, I've pulled the security efforts the board built up piece by piece over the years into one coordinated program — including our patrol boat, the summer staff I trained to run it, and a repeatable process that keeps Norris Lake secure while keeping it neighborly.
- **Got the most for every dollar:** I've helped the board find new equipment for the lake at the best possible value, with the same care I've used running my own business for 30 years.
- **Pitched in where it counts:** Planting new channel markers, restoring the boathouse for the patrol boat, lending a hand on build projects — I'd rather be out doing the work than talking about it.

About Me:

I've lived and worked in this area for more than 30 years, so when my wife and I bought our home at Norris Lake seven years ago, it felt less like moving somewhere new and more like finally coming home. The lake and the people are what brought us here and what keep us here — boating, swimming, and enjoying community events, often with our adult children along.

I was asked to join the board because of my business background. For three decades I've run a local car business that also specializes in antiques, collectibles, and classic cars, and along the way I've gotten to know and work with folks from every walk of life. Running a business that long teaches you to watch the money, take care of your people, and own the hard decisions — the same things it takes to look after a community like ours.

I'm asking for your vote so I can continue to serve. With your support, I'd like to keep our lake safe, help move the Main Beach project forward while we take care of the maintenance work ahead of us, and leave Norris Lake better for the generations to come.
