

SIROCCO RANGE: ENVELOPE OPTIONS

Did you know?

Many Sirocco Envelope options are available

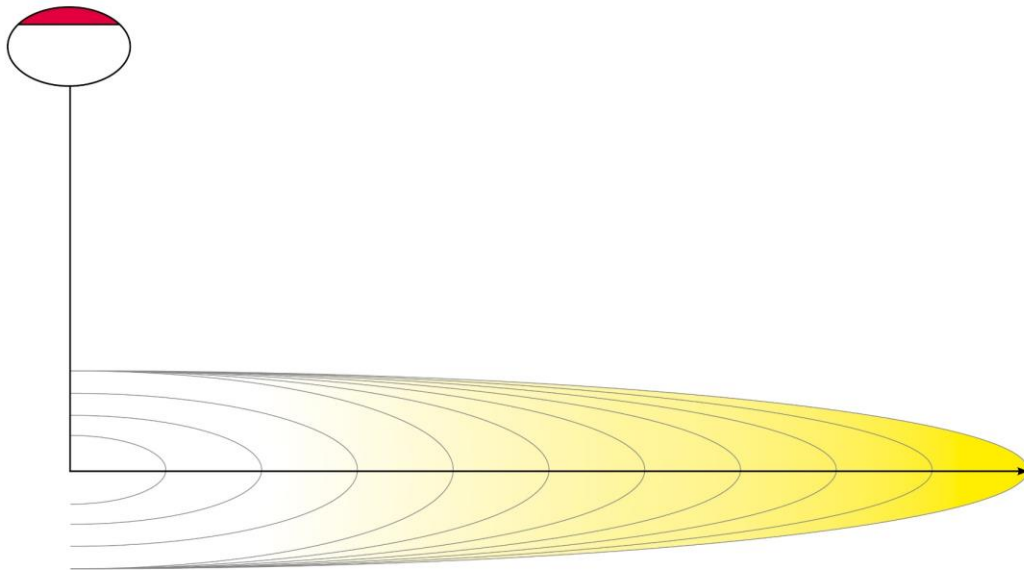

5 envelope options:

- Standard, Lenticular, Flex
- Reversed reflector, Without reflector

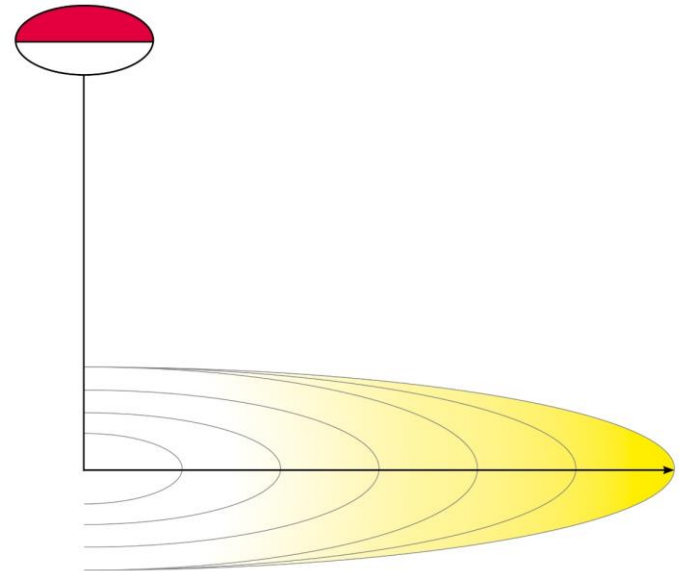

Envelope customization: customize the envelope according to your graphic guideline (color of the reflector and company logo)

Standard or Lenticular envelope, what's the difference?

Need to light a large area >
Standard envelope

Need to focus the light under the
balloon > Lenticular envelope

> SIROCCO ENVELOPE OPTIONS

Standard envelope

The light is directed horizontally and downward.

> Conditions of use: Emergency, search and rescue teams, Construction, industry and maintenance, Law enforcement, police and army.

> SIROCCO ENVELOPE OPTIONS

Lenticular envelope

The light is focused under the balloon.

> Conditions of use: On pavers or road construction machines.

> SIROCCO ENVELOPE OPTIONS

Flex envelope

The light is directed horizontally and downward. Envelope never deflates.
> Conditions of use: semi permanent and long term use, outdoor, rough conditions.

> SIROCCO ENVELOPE OPTIONS

Reversed reflector

The light is directed upward, specific to working on ceiling, only illuminates the work area.

> Conditions of use: Tunnel, Warehouse, Industrial & nuclear maintenance, Renovation work sites...

> SIROCCO ENVELOPE OPTIONS

Without reflector

The light is directed everywhere, at 360°, prevents accidents in closed space.

> Conditions of use: Nuclear power plant maintenance, tank cleaning, confined work environment...
