

World's leading technology company for

PERSONAL COOLING APPAREL

**BEAT
THE
HEAT**

KEEP YOUR HEAD COOL

INUTEQ is world's leading company in developing & manufacturing innovative personal cooling technologies and products.

Whether it be at work, during sports or your daily routines, you can trust to have INUTEQ at your side to keep you comfortably cool!

Proud official supplier of several ProCycling Teams, Formula-1 Teams and many more high-profile & Olympic athletes.

SCIENTIFIC ADVISORY BOARD

The Scientific Advisory Board consists of two independent, recognized medical scientists, which together shape a highly important advisory body for INUTEQ. The Scientific Advisory Board sees to it that the quality of research is maintained.

“Our primary task is to evaluate, guide and advise on new cooling technologies, strategies & applications”

The Scientific Advisory Board is officially installed by INUTEQ and consists of members that come from diverse fields of research of various medical scientific institutions.

Prof. dr. Thijs Eijvogels

Dr. Eijvogels is appointed as Associate Professor in exercise physiology at the Department of Physiology of the Radboud University Medical Center (Nijmegen, The Netherlands). Thijs is interested in the physiological and cardiac responses of the human body to acute and chronic exercise.

Prof. dr. Julien Périard

Dr. Périard is an Associate Professor at the University of Canberra Research Institute for Sport and Exercise (UCRISE). His scientific interests lie in the area of environmental physiology where he examines the physiological mechanisms that mediate health and performance.

MAIN MARKETS

On the job

Workers who are exposed to extreme heat or work in hot environments may be at risk of heat stress. Heat stress can result in stroke, exhaustion, cramps or rashes. This can lead to occupational illnesses and injuries. Avoid this by wearing the right personal cooling apparel for your job.

Sports

Sports activities in high temperatures for long periods of time can lead to dehydration and heatstroke. Heatstroke is a life-threatening condition. Be prepared and protect yourself from heat stroke and heat exhaustion by wearing the right cooling apparel!

Animals

It is normal for your dog to be panting on a hot summer day, but your dog can quickly go from being a bit warm to suffering from the initial stages of heat stroke. Heat stroke is incredibly dangerous and often fatal. It affects dogs of all shapes, sizes and ages. Keep your dog comfortably cool with a dog cooling vest or a cooling mattress!

Wellness

Cooling is proven to be a safe and effective way to burn extra calories and lose weight, we've made it easy by developing the right garment and making it accessible for everyone, this by using our lifelong experiences and innovative technology.

Healthcare

With multiple sclerosis (MS), you may experience heat intolerance, which is worsening your symptoms when exposed to heat. Wearing a cooling vest will make you feel more comfortable and may even relieve some of your symptoms. The INUTEQ products are also used to keep doctors and nurses cool in protective suits.

Motorcycling

Riding in extreme temperatures not only feels like having a giant hair dryer blowing at you, but it can also be very dangerous. The beginnings of heat stroke can affect your judgement and impair your ability to ride a motorcycle safely. By taking precautions and wearing the right cooling apparel, you can beat the heat and ride safely!

Military / Police

The very nature of the soldier's or agent's profession — training outdoors, wearing uniforms and carrying equipment — practically guarantees they will be exposed to heat stress. Combat the heat by wearing the right professional personal cooling apparel.

Outdoor recreation

Recreative activities in high temperatures for long periods of time can lead to dehydration and heatstroke. Heat stress may affect people aged 65 years and over even more than others. Wear a cooling vest or one of the cooling accessories to stay comfortably cool.

HELP ME CHOOSE WHICH COOLING SOLUTION IS THE BEST FOR ME

Check here which technology and related product work best for your personal application and in which environmental condition.

Effective cooling time during average use	In warm conditions under 40°C/104°F	In hot conditions above 40°C/104°F	In low-mid humid conditions	In high humid conditions	Underneath breathable garments	Underneath hazmat / airtight suits	Without airflow	Suitable for high activity	Requirements to activate

WHAT ARE THE EFFECTS WHEN YOUR BODY FIGHTS THE INCREASING TEMPERATURE?

Excessive sweating,
clammy skin

Your heart
rate will increase

You start to
feel uncomfortable

You will
get tired

Dizziness and
confusion, fast
breathing or pulse

You will lose
concentration
(up to 40 %)

Productivity
drops significantly

You will get
a headache

Your ability to react
slows down, which may
imply unsafetyness

WHY IS PERSONAL COOLING ESSENTIAL?

Everybody owns a rain coat, and in every house you will find clothes for colder periods. But only few people use wearables to protect them from the heat. Isn't that odd?

Are you going to jump into the water when it's getting really warm? Take a cold shower? Or take off your clothes? In many cases that's not an option. When you are at the office for example, playing golf, playing golf, tennis, jogging, attending a festival or working in a factory.

Cooling is essential in these circumstances. To continue what you are doing, stay comfortable, and to keep your performance up. To stay safe, to not overheat, and to not lose control.

BEAT THE HEAT

COOLING PRODUCTS HELP TO AVOID HEAT STRESS

Heat is an occupational safety and health hazard. Excessive heat during work creates health risks; it restricts a worker's physical functions and capabilities, work capacity and productivity. Temperatures above 24 – 26°C are associated with reduced labour productivity. At 33 – 34°C, a worker operating at moderate work intensity loses 50% of his or her work capacity.

Exposure to excessive heat levels can lead to heatstroke, sometimes even with a fatal outcome. Workers in all sectors are affected, but certain occupations are especially at risk because they involve more physical effort and/or take place outdoors. Such jobs are typically found in agriculture, environmental goods and services (natural resource management), construction, refuse collection, emergency repair work, transport, tourism and sports. Industrial workers in indoor settings are also at risk if temperature levels inside factories and workshops are not regulated properly. At high heat levels, performing even basic office and desk tasks becomes difficult as mental fatigue sets in.

HEAT STRESS PREVENTION TIPS

**Avoid alcohol,
coffee and soda**

**Drink water
every hour**

**Wear personal
cooling apparel**

**Take a 15 minute
break every 2 hours**

INUTEQ DRY TECHNOLOGY

INUTEQ DRY TECHNOLOGY

INUTEQ-DRY® is a revolutionary evaporative cooling technology.

The INUTEQ-DRY® cooling solution only requires a limited quantity of water (a vest filled with 500 ml) to provide maximum cooling for 8 up to 72 hours.

Our products can be easily activated by filling them with tap water, after which the cooling process will start instantly. The cooling effect is based on the principle of natural evaporation, and therefore the result is dependent on local humidity and airflow.

The INUTEQ-DRY® technology is a durable solution, all products are machine washable and have antibacterial treatment. INUTEQ-DRY® guarantees that you will stay 100% dry. Our products will cool you down from 5°C up to 15°C below ambient temperature. The INUTEQ-DRY® products perform best in environments with a low to average degree of humidity. The level of airflow determines the cooling effect.

**KEEP THE
FOCUS**
- STAY COOL -

ACTIVATION IS EASY

Fill with water

Just fill the product with (tap) water.

Divide and Squeeze

Distribute the water evenly and squeeze out any excess water.

Enjoy immediate cooling

Your product is now ready to use, instantly creating a cooling effect for up from 8 until 72 hours, depending on the ambient temperature, humidity and airflow.

INUTEQ DRY PRODUCTS

- Easy to use and re-use
- Machine washable
- Antibacterial treatment
- Provides up to 15°C cooling relief below ambient temperature
- Offers 8 to 72 hours of cooling comfort

INUTEQ H2O TECHNOLOGY

H2O[®]

UNIQUE
TECHNOLOGY
FORMULA

INUTEQ H2O TECHNOLOGY

INUTEQ-H2O® technology offers the highest standard in evaporation cooling at low cost. The INUTEQ-H2O® products are activated by soaking them in water for 2 minutes. After excess water is gently squeezed out they are ready to wear. Depending on the humidity and airflow, these products will cool you down from 5°C up to 15°C below the ambient temperature for 2 up to 8 hours.

All INUTEQ-H2O® evaporative products are machine washable and have antibacterial properties. The INUTEQ-H2O® cooling vests are finished with water-repellent lining to keep the inside dry. The INUTEQ-H2O® products perform best in environments with a low to average degree of humidity. The level of airflow determines the cooling effect.

**STAY
SHARP**
- STAY COOL -

ACTIVATION IS EASY

Soak in water

Just soak in water for a maximum of two minutes.

Gently press out excess water

Enjoy immediate cooling

Your product is now ready to use, instantly creating evaporative cooling for two up to eight hours, depending on the ambient temperature, humidity and airflow.

“We work constantly on training, innovation, nutrition, aerodynamics and everything else that ensures top performance during the races. Being in cycling, it’s all about total body control. Science goes fast, everything is getting better and more efficient. That is why I am really happy with INUTEQ, who continuously designs new products that absolutely help us with that.

The most important thing is that the vest cools on a very large body surface and at the same time you hardly feel that you are wearing something extra with additional weight. If you have that comfort level, you will benefit more and more from it. And that is what we notice when our riders use the INUTEQ vests, which is why I am convinced of these cooling products”

- Matthieu Heijboer, Head of performance,
Team Visma | Lease a Bike

INUTEQ QCK TECHNOLOGY

BODY COOLING TOWEL+

INUTEQ QCK TECHNOLOGY

The cooling effect generated by these products and technology is not chemically treated, but comes from the special technology within the INUTEQ-QCK® cooling fabric.

The INUTEQ-QCK® fabric is extremely strong, soft and flexible as well as lightweight. INUTEQ-QCK® products are ideal for sports, camping, exercising, leisure or any outdoor activity where you need some comfortable cooling.

**FAST, EASY
EFFECTIVE**
- STAY COOL -

ACTIVATION IS EASY

Wet it, soak in water

Just soak the product in water for one minute.

Wring it, squeeze

Gently squeeze out the excess water.

Snap it

Just wave the product 2 times and it's ready to use.

Enjoy immediate cooling

Your product is now ready to use, instantly creating a cooling effect for up to a few hours.

INUTEQ PAC TECHNOLOGY

INUTEQ PAC TECHNOLOGY

The INUTEQ-PAC® is a revolutionary performance technology. This bio-based Phase Change Material (PCM) is available in 5 different temperatures: 6,5°C / 44°F, 15°C / 59°F, 21°C / 70°F, 24°C / 75°F and 29°C / 84°F.

This unique INUTEQ-PAC® phase change technology has a high latent heat, which makes it ideal for use in various thermal management applications.

The INUTEQ-PAC® products, powered by CrodaTherm bio-based PCM, offer higher flash fire points than their paraffin equivalents. As proven during fire safety tests, the INUTEQ-PAC® products out-perform their paraffin equivalents, providing a safer product for professionals dealing with strict fire safety regulations.

The only REACH and USDA certificated 100% bio-based PCM on the market!

**STAY

THE PROCESS

When the ambient temperature rises, the PCM starts to melt.

THE PCM COOLOVER

This PCM CoolOver, manufactured in The Netherlands, offers constant cooling and heat stress protection for professionals who need expert cooling underneath protective clothing in (extreme) heat situations. This PCM CoolOver performs under extreme temperatures and under every level of humidity. Offering exact temperatures, the INUTEQ-PAC® PCM CoolOver is often used under military combat gear, hazardous materials suits, mascot costumes and other professional apparel.

Example: the 21°C / 70°F CoolOver can be activated in a room temperature of <18°C / 64°F.
Cleaning: simply clean with cleaning cloth with water or disinfectant.

INUTEQ HYBRID SOLUTION

INUTEQ PAC & H2O TECHNOLOGY

'Athletes who precool can increase performance with 5,7% ($\pm 1\%$) and with percooling (cooling during exercise) with 9,9% ($\pm 1.9\%$). The combination of precooling and percooling technologies could be the most effective strategy to improve exercise performance in the heat', according to Dr. Thijs Eijssvogels, one of the top authorities on thermoregulation.

**published 2015, British Journal of Sports Medicine ** Dr. Thijs M.H. Eijssvogels, Department of Physiology, Radboud University Medical center - The Netherlands.*

PAC ACTIVATION IS EASY

Cool the pack

Simply put the product in ice water, refrigerator or freezer, or store it at a lower temperature until it becomes fully solid.

Insert in garment

Enjoy constant cooling

Your garment is now ready to wear, creating cooling on a constant temperature level.

H2O ACTIVATION IS EASY

Soak in water

Just soak in water for a maximum of two minutes.

Gently press out excess water

Enjoy immediate cooling

Your product is now ready to use, instantly creating evaporative cooling for two up to eight hours, depending on the ambient temperature, humidity and airflow.

INUTEQ PAC & H2O PRODUCTS

The Bodycool Hybrid vest is created for multiple sports purposes and commonly used as pre-post cooling vest by athletes, in combination with the INUTEQ-PAC® 6.5°C / 44°F or 15°C / 59°F bio-based PCM packs.

Hybrid cooling solution for ultimate relief: evaporative INUTEQ-H2O® Cooling Fabric for 2 - 8 hours of cooling relief per soaking and INUTEQ PAC® bio-based Phase Change Material inserts maintain a comfortable 6.5°C / 44°F or 15°C / 59°F for up to three hours.

Rinus van Kalmthout (born 11 september 2000) is an extremely talented Dutch racing driver, professionally known as Rinus VeeKay. He is the 2018 Champion of the Pro Mazda series, winning 7 of 16 races in his debut season. VeeKay is signed to drive the No. 21 Dallara-Chevrolet for Ed Carpenter Racing in the NTT IndyCar Series, in May 2021 he won his first IndyCar Victory. VeeKay is the longest-tenured full-time driver in Ed Carpenter Racing's 12-year history and will remain the behind the wheel of the No. 21 Chevrolet for the 2024 NTT INDYCAR SERIES season. Rinus wears the Bodycool Hybrid for pre-post cooling and several evaporative cooling accessories to stay comfortably cool.

INUTEQ COOL2SHAPE

INUTEQ COOL2SHAPE

Cool2Shape is the new product line from INUTEQ® focusing on burning calories and increasing metabolism by cooling.

The science

Cooling Vests stimulate Brown Adipose Tissue (brown fat) causing the consumption of calories. The science is backed by numerous international studies, scientific research and tests. Several studies mention the importance of brown fat and the potential of cold exposure to prevent increase in body weight.

Benefits:

- Burn calories (potential to burn several hundred calories a day)
- Boost metabolism
- Activate brown fat (BAT) by blood supply and nerve impulses
- Induce cold thermogenesis
- Easy to use in daily routine
- Comfortably cool
- Constant Cooling Temperature

**GET IN
SHAPE**
- STAY COOL -

“Cooling is proven to be a safe and effective way to burn extra calories and lose weight, we’ve made it easy by developing the right garment and making it accessible for everyone, this by using our lifelong experiences and innovative technology.”

INUTEQ COOL2SHAPE

VEST

Color: Black
Size: One size

Components

Exterior: 50% nylon
 5% spandex
 45% neoprene

Black: #1313010100

Order separately
 for the Vest and Leg Wrap

PACS 15°C / 59°F (SET OF 2) (ALSO FOR LEG WRAP)

Color: Aqua
Size:
Front & back 30 cm x 30 cm, 11,8 inch x 11,8 inch

Components

Exterior: INUTEQ-SEAL®
Interior: 100% bio-based phase change material

Aqua: #1329011516

ARM WRAP (SET OF 2)

Color: Black
Size: One size

Components

Exterior: 50% nylon
 5% spandex
 45% neoprene

Black: 1326010100

Order separately
 for Arm Wrap

PACS 15°C / 59°F (SET OF 2)

Color: Aqua
Size: 15 cm x 15 cm, 5,9 inch x 5,9 inch

Components

Exterior: INUTEQ-SEAL®
Interior: 100% bio-based phase change material

Aqua: #1326011504

LEG WRAP (SET OF 2)

Size: One size

Components

Exterior: 50% nylon
5% spandex
45% neoprene

Black: #1325010100

Order separately
for Waist Wrap

PACS 15°C / 59°F

Color: Aqua
Size: 15 cm x 31,4 cm
5,9 inch x 12,36 inch

Components

Exterior: INUTEQ-SEAL®
Interior: 100% bio-based
phase change
material

Aqua: #1364031508

INSULIN TRAVEL COOLER BAG

Insulin, a temperature-sensitive medication, is the only solution for many diabetics. When exposing your insulin to extremely high or low temperatures it can change its chemical composition. This can cause insulin to not behave as it should and not control your blood sugar.

Traveling is a part of life that can't be avoided, so there is only a single solution left. Carry your diabetic medication in an insulin travel cooler bag while traveling to keep your insulin safe and cool.

The INUTEQ insulin travel cooler bag keeps in-use insulin cool and safe at a constant cooling temperature of 15°C / 59°F for approximately one full day.

Powered by INUTEQ-PAC® 15°C / 59°F phase change material inserts; the only REACH compliant and USDA certificated 100% biobased PCM available on the market.

PWR[®]

PATENTED
TECHNOLOGY

INUTEQ PWR TECHNOLOGY

The INUTEQ-PWR® uses cutting-edge technology to offer a battery-powered solution that effortlessly enhances the user's natural cooling process.

This innovative tool requires no prior cooling or setup, making it a convenient plug-and-play option. By simply inserting a charged battery, it delivers up to 6 hours of continuous body cooling. Integrated rechargeable battery-powered fans direct air through a specially designed textile, effectively wicking away sweat and enhancing the natural body's cooling mechanism.

Designed for various work scenarios requiring personal cooling, INUTEQ-PWR® products offer reliable cooling relief. Whether for professionals or individuals seeking expert cooling, our PWR® cooling products ensure consistent protection against heat stress.

- Easy to use and re-use
- Lightweight and comfortable to wear
- Selfregulating
- Innovative in design and technology
- Plug-and-play

**BEAT
THE HEAT**
- STAY COOL -

ACTIVATION IS EASY

Charge the battery

Make sure the battery is charged

Place charged battery in vest

Enjoy constant cooling

Your product is now ready for use, instantly creating a cooling effect for up to six hours of uninterrupted body cooling.
