Dear Breast Cancer Research Aid,

Thank you so much for your recent donation of £11,000.00 towards equipment used by the European Cancer Stem Cell Research Institute at Cardiff University. This equipment includes a brand new PCR machine, which will be used in our research into understanding the roles of 'long' and 'short' forms of LYN kinase in breast cancer. Alongside this, your donation has also allowed us to purchase a set of five trays for our 'digital microscope' slide scanner, greatly increasing the efficiency and depth of our research.

By making this kind donation you are at the heart of life-changing discoveries in breast cancer research. Your generosity will equip and enable our stem cell researchers as they seek to transform our understanding and treatment of cancer.

Although we are currently unable to offer face-to-face visits of our labs as we have in the past, we would be delighted to arrange a virtual meeting between the trustees and our researchers over the summer. This would be a brilliant opportunity for us to verbally report on the impact of your donation and it would allow you to speak with our researchers about their work and what they have achieved through your support. Please do let me know if you would be interested in this and I can begin to make arrangements.

In the meantime, I look forward to keeping you up to date on how your support makes a difference, so please keep a look out for news and details of upcoming events that we will be sending you.

For now, thank you again for your support.

Best wishes,

Bethany Morrissey
