

RICH OFF PROMPTS

Day Five Bonus

Small Offer, Real Signal

This bonus is designed to help you move from clarity to action without overbuilding. It shows you how to test an idea in real life and collect feedback that actually matters.

Step 1: Choose One Problem Worth Testing

Choose the problem that shows up the most, not the one that sounds the most impressive. You are choosing your next test, not your final direction.

Step 2: Define the Result, Not the Deliverable

Focus on what changes for the person after they receive help. Results sell faster than features.

Step 3: Build the Smallest Helpful Version

Your offer should be easy to explain, easy to deliver, and easy to improve. If it requires heavy setup, it is too big.

Step 4: Set a Simple Test Price

Pricing is part of the test, not a permanent decision. If it feels slightly uncomfortable but fair, you are likely close.

Step 5: Ask for Response, Not Validation

Instead of asking for approval, ask whether the offer would help right now. Questions and hesitation provide valuable feedback.

Bonus Prompt

Based on what my audience is struggling with right now, what is the simplest paid way I could help one person get one clear result within a short time frame? How can I test this idea with minimal setup and learn from the response?

This bonus helps you learn faster, reduce stress, and move with intention. Small tests create real signal.
