## XXIO X-ÉKS

THE XXIO EXPERIENCE FOR STRONGER PLAYERS

WITH OUR COMPLETELY NEW XXIO X WOODS AND IRONS, GOLFERS WHO SWING ABOVE 90MPH FINALLY HAVE THE PRIVILEGE TO EXPERIENCE XXIO. THIS NEW LINE FEATURES A STRIKING BLACK AND ORANGE COLOURS SCHEME ALONG WITH STIFFER SHAFTS DESIGNED FOR STRONGER PLAYERS.

ADDED POWER AND EXTREME FORGIVENESS ARE STILL PARAMOUNT DESIGN FEATURES IN X AND EACH CLUB MAKES USE OF WEIGHT PLUS TO IMPROVE THE CONSISTENCY OF YOUR SWING.

WITH XXIO X-ÉKS, WE HAVE EXPANDED INTO A NEW SEGMENT OF FASTER, STRONGER PLAYERS BUT WE ARE STILL PROVIDING THE SAME UNMATCHED QUALITY AND INCREDIBLE EASE OF USE THAT XXIO GOLFERS HAVE ENJOYED FOR DECADES.

## CARBON SOLE & CUP FACE

### DRIVER FORGIVENESS AND SPEED

IN THE XXIO X-ÉKS DRIVER, WE CONSTRUCTED A LARGE PORTION OF THE SOLE USING CARBON FIBRE WHICH IS STRONG BUT MUCH LIGHTER THAN TITANIUM WHICH REPOSITIONED MASS TO THE BACK OF THE HEAD FOR HIGHER DRIVES WITH MAXIMUM FORGIVENESS. COMBINED WITH A THIN, FAST CUP FACE, SPECIFICALLY ENGINEERED TO WITHSTAND FASTER HEAD SPEEDS, XXIO X-ÉKS PROMISES REMARKABLY FASTER BALL SPEEDS AND INCREDIBLE DISTANCE PERFORMANCE.

## CANNON SOLE & CUP FACE

### FASTER FAIRWAYS AND HYBRIDS

A UNIQUELY SHAPED WEIGHT PAD IN THE XXIO X-ÉKS WOODS AND HYBRIDS RESEMBLES A CANNON. THE WEIGHT IS THERE TO PROVIDE THE IDEAL LAUNCH CHARACTERISTICS FOR CARRY DISTANCE AND ROLL OUT BUT ITS DISTINCTIVE CANNON SHAPE ALLOWS FOR UP TO 4MM OF ADDITIONAL CUP FACE ALONG THE SOLE AND AN EXTRA 7MM OF EXTREMELY THIN SOLE AREA.

WITH ZERO COMPROMISE TO LAUNCH ANGLE OR FORGIVENESS, THE CANNON SOLE PROVIDES MORE SPEED AND MORE DISTANCE, ESPECIALLY FOR SHOTS HIT LOW ON THE FACE.

FAIRWAY WOOD

HYBRID

## SPEED GROOVE & V-SHAPED SOLE

### IRON FORGIVENESS AND SPEED

XXIO X-ÉKS IRONS ARE FORGED FOR INCREDIBLY SOFT YET RESPONSIVE FEEL ON EVERY SHOT. TO BOOST YOUR SPEED AND DISTANCE, WE MILLED A SPEED GROOVE ON THE BACKSIDE OF THE FACEPLATE. THIS CHANNEL AROUND THE PERIMETER FLEXES AT IMPACT, REBOUNDING ADDED ENERGY BACK INTO THE BALL FOR INCREDIBLE DISTANCE.

BECAUSE X PLAYERS TEND TO SWING DOWN ON THE BALL WITH A STEEPER ATTACK ANGLE, THE IRONS ALSO FEATURE OUR V-SHAPED SOLE, WHICH IMPROVES TURF INTERACTION WHILE STILL OFFERING PLENTY OF CONTROL.

## WEIGHT PLUS

### A BETTER SWING

XXIO X-ÉKS USES WEIGHT PLUS TO BRING THE CENTRE OF GRAVITY OF THE ENTIRE GOLF CLUB CLOSER TO YOUR BODY. THE CLUBS FEEL LIGHTER THAN ANY OTHERS AND ARE EFFORTLESS TO SWING, EVEN AT HIGHER SPEEDS. THE EFFECT IMPROVES YOUR CONSISTENCY SO YOU HIT THE SWEET SPOT MORE OFTEN AND SEND THE BALL FLYING STRAIGHT AT YOUR TARGET.

XXIO X-ÉKS IS A PREMIUM SET OF WOODS AND IRONS THAT HELPS HIGH SWING SPEED GOLFERS HIT LONGER, STRAIGHTER GOLF SHOTS. ITS BREAKTHROUGH TECHNOLOGIES SPECIFICALLY BENEFIT THE GOLFER WHO SWINGS 90MPH OR MORE, IMPROVING SPEED, ACCURACY AND CONSISTENCY FOR YOUR EASIEST GOLF YET.

## KEY TECHNOLOGY

### WEIGHT PLUS

BRASS AND RUBBER WEIGHTS IN THE BUTT-END OF EACH CLUB RAISE BALANCE POINTS TO UNPRECEDENTED HEIGHTS. THE EFFECT IS A SMOOTH AND EASY SWING THAT ALSO HELPS YOU CONSISTENTLY FIND THE IDEAL TOP-OF-SWING POSITION FOR MORE POWER.

### CARBON FIBRE SOLE

XXIO X-ÉKS DRIVER USES A LIGHTWEIGHT CARBON FIBRE SOLE TO REDISTRIBUTE WEIGHT FOR IMPROVED LAUNCH AND FORGIVENESS.

### CUP FACE

THE DRIVER, WOODS, AND HYBRIDS FEATURE A POWERFUL YET NORMALISED CUP FACE THAT IS FASTEST ON CENTRE STRIKES AND MISS-HITS ALIKE.

### CANNON SOLE

A UNIQUELY SHAPED WEIGHT PAD IN THE XXIO ELEVEN WOODS AND HYBRIDS CREATES SPACE FOR A LARGER CUP FACE WHICH IN TURN BOOSTS SPEED AND DISTANCE.

### SPEED GROOVE

XXIO X-ÉKS IRONS HAVE A MILLED SPEED GROOVE ON THE BACKSIDE OF THEIR FACEPLATE. THIS CHANNEL AROUND THE PERIMETER FLEXES AT IMPACT, REBOUNDING ADDED ENERGY BACK INTO THE BALL FOR INCREDIBLE DISTANCE.

## KEY TECHNOLOGY

### **SUPER-TIX<sup>®</sup> PLUS TITANIUM CUP FACES**

FORGED FROM SUPER-TIX PLUS TITANIUM—A LIGHTWEIGHT YET HIGH-STRENGTH ALLOY—CUP FACES IN PRIME'S DRIVER AND WOODS GREATLY INCREASE DISTANCE PERFORMANCE THANKS TO A HOTTER SWEET SPOT.

### **UNPRECEDENTED LIGHTWEIGHT CONSTRUCTION**

THE SP-1000 SHAFT, WITH TORAYCA<sup>®</sup> T1100G CARBON FIBRE AND NANOALLOY RESIN, WEIGHS UP TO 36G. THAT, ALONG WITH WEIGHT SAVINGS IN THE GRIP AND CLUB HEAD, PRODUCES A DRIVER THAT'S REMARKABLY FAST AND EASY TO SWING.

### **GROUNDBREAKING FORGIVENESS**

WEIGHTS LOW AND DEEP IN EVERY WOOD PLUS TWO TUNGSTEN WEIGHTS IN EACH IRON BRING THE CENTRE OF GRAVITY LOW AND DEEP FOR INCREDIBLE FORGIVENESS, A TOWERING LAUNCH AND STRAIGHT BALL FLIGHT.
