

# IGI Global IMPACT

LIBERIA –THREE-YEAR PLAN

# INVISION THE VISION

- ▶ RARELY DO WE MEET SUCH DETERMINATION AND DEDICATION—A VISION DRIVEN BY THE ASPIRATION TO ADVANCE THE WELL-BEING OF ALL MANKIND, REGARDLESS OF RACE, RELIGION, OR CREED.
- ▶ The man of honor, Pastor Joseph Mulbah, under the leadership of one of the most highly regarded men in the world, President **Joseph Nyuma Boakai, Sr.**, has united with Dr. E. Carr of Mov2Liv, a global NGO, to advance the lives of the beautiful people of Liberia.
- ▶ Imagine: modern housing, abundant food, accessible healthcare, quality education, and a thriving ecosystem that creates independence and sustainability for every person in need.
- ▶ Now that you see the vision, let's make it our reality

**Monrovia, Liberia – President Joseph Nyuma Boakai, Sr.** and Pastor Joseph Mulbah have launched a groundbreaking initiative to deliver **life-changing opportunities** to the people of Liberia. Their vision is to **bridge the gaps between those who have and those who do not**, uniting faith, leadership, and global resources to build a nation where prosperity and dignity are within reach for all.

The program will focus on delivering **modern housing, accessible healthcare, quality education, food security, and sustainable ecosystems** that provide independence, stability, and long-term growth. This initiative goes beyond development—it is a national transformation designed to uplift every Liberian.

At the heart of the collaboration is the **Mov2Liv Foundation Liberia**, dedicated to working directly with communities to ensure that **the people of Liberia remain at the center of every decision and every investment**. Mov2Liv's mission-driven approach ensures that aid is not only distributed but also embedded into systems that foster sustainability and self-reliance.

Supporting this vision globally is **Dr. Cosby of Invest Global Inc. (IGI)**, who has been **entrusted to safeguard humanitarian and sovereign funds**, ensuring they are managed transparently and invested directly into projects that benefit the Liberian people. IGI's stewardship is key to aligning international resources with Liberia's local priorities.

**“We are closing the distance between despair and opportunity,”** said Pastor Joe. “With President Boakai's leadership, the reach of Mov2Liv Foundation Liberia, and the financial stewardship of IGI under Dr. Cosby, Liberia is stepping into a new era of hope and progress.”

President Boakai has called this collaboration a **national turning point**, bringing together government, faith-based leadership, humanitarian expertise, and international financial support. Together, they are building a model for other nations to follow—showing the world that when leadership, faith, and resources align, **transformation is inevitable**.

# IGI Global Initiative

- ▶ Executive Summary
- ▶ 3-Year National Transformation Plan:
- ▶ IGI has been entrusted with multi-trillion-dollar humanitarian and infrastructure funds to modernize underserved nations. Liberia is a priority country. Within 36 months, IGI will deliver a self-sustaining ecosystem, featuring clean water, renewable power, modern housing, healthcare, education, agriculture, factories, and job opportunities.

Investment  
Envelope  
Liberia  
≈ \$115 to \$200  
Billion (3 Years)  
(part of IGI's multi-trillion  
global fund)

## ▶ Key Sectors

- ▶ Water & Sanitation: Boreholes, purification plants, pipelines, desalination → 100% clean water access.
- ▶ Power & Energy: Solar microgrids, waste-to-energy, national renewable coverage (80% by Year 3).
- ▶ Housing & Communities: 250,000 eco-homes, smart communities with sanitation.
- ▶ Healthcare: 5 regional hospitals, 100 clinics, 100+ mobile/mini clinics → universal coverage.
- ▶ Education: 300 schools, 20 vocational centers, 1M students in digital classrooms.
- ▶ Agriculture: 200 irrigation systems, 250 greenhouses, 20 Agri-processing hubs → food self-sufficiency.
- ▶ Factories & Industry: Hempcrete, paints, consumer goods, EV assembly → exports & industrial jobs.
- ▶ Transportation & Streets: 10,000 km paved national roads, 1,000 km modern urban streets with drainage, sidewalks, and lighting.
- ▶ Contractor Support: Worker housing villages, bus fleets, depots, 24/7 security.

# Job Creation

- ▶ ≈ 270,000 direct jobs (3 years)
- ▶ multiplier effect across commerce & services.
- ▶ Breakdown:
- ▶ 23K (Water)
- ▶ 35K (Energy)
- ▶ 20K (Healthcare)
- ▶ 55K (Housing/Construction)
- ▶ 12K (Education)
- ▶ 30K (Hemp/Ecosystem Industries)
- ▶ 35K (Agriculture)
- ▶ 25K (Factories)
- ▶ 15K (Transport & EV)
- ▶ 20K (Commerce & Services)
- ▶ +4K (Contractor housing/transport/security)

# Deployment Strategy

**01**

First 90 Days: IGI HQ in Monrovia, pilot boreholes, clinics, power microgrids, housing starts.

---

**02**

Year 1: 50% clean water coverage, first factories online, 28,000 jobs.

---

**03**

Year 2: Expansion of housing, hospitals, factories, Agri-hubs; 72,000 new jobs.

---

**04**

Year 3: National water grid, EV mobility, full industrial parks, 250,000 homes delivered, 100% water access, food security, 270,000 jobs.

---

# Government Partnership Requested

**Joint Steering Committee (IGI +  
ministries)**

**Land & permits allocation for  
housing, factories, and Agri- hubs.**

**National liaison team for  
coordination.**

**Security cooperation (police,  
military, cyber).**

# IMPACT

by year 3

**Water:** Universal clean water access.

**Power:** 80% renewable, waste-to-energy nationwide.

**Housing:** 250,000 homes, modern sanitation.

**Healthcare:** Universal coverage, hospitals in all regions.

**Education:** 1M students in modern schools.

**Agriculture:** Food self-sufficiency + export readiness.

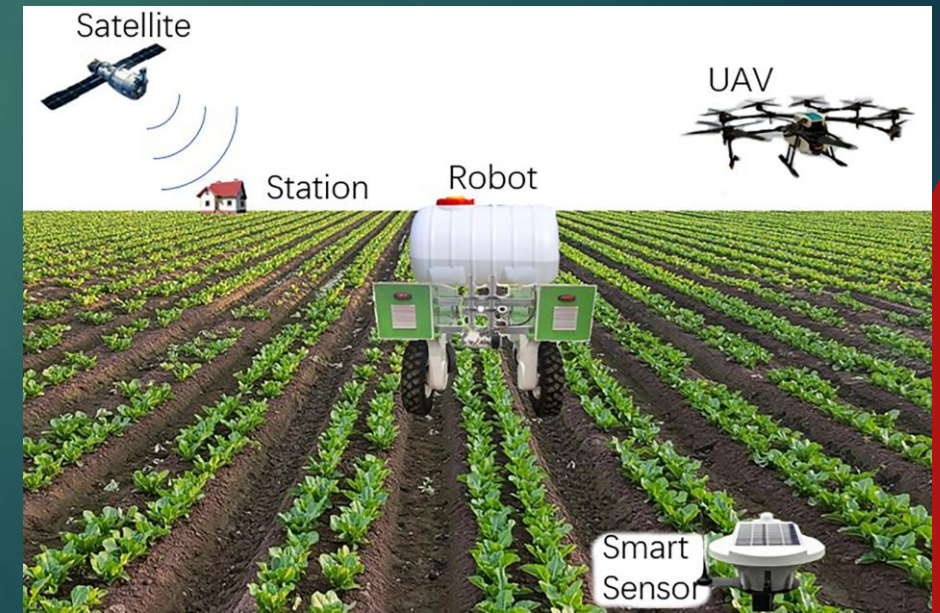

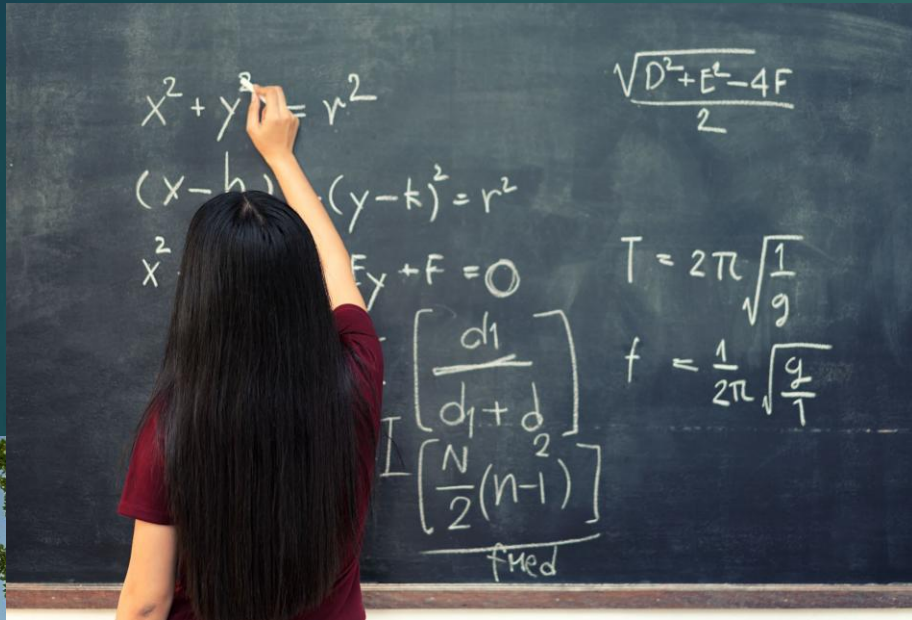

**Industry:** 10 factories producing hempcrete, paints, EVs, and goods.

**Jobs:** 270,000 direct + indirect multiplier.

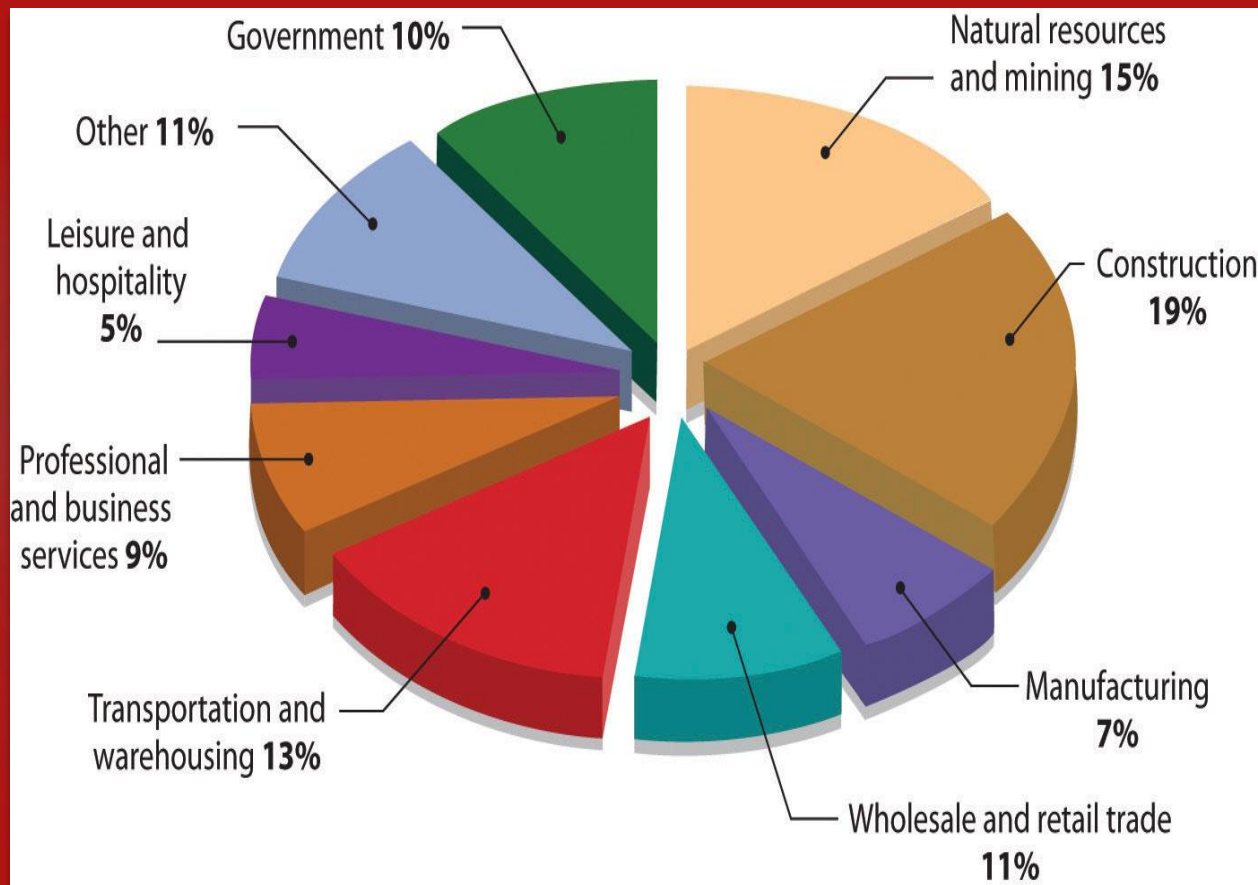

# IGI Liberia Commitment

- ▶ This plan is not aid but investment — turning waste into energy, hemp into building materials, and communities into self-sustaining economies. Every sector is integrated: what looks like an overlap is a circular economy where nothing is wasted, and every byproduct creates new jobs.

# INVEST LIBERIA

# Annual Budget Summary

► Year 1 (~\$38B): Foundations — boreholes, solar grids, mobile clinics, 50K homes, pilot factories, 2,000 km of roads, worker housing & security.

► Year 2 (~\$46B): Expansion — hospitals, schools, 100K homes, factories, Agri-hubs, EV assembly, 4,000 km of roads.

► Year 3 (~\$27B): Transformation — water & energy grids, universal healthcare, 100K homes, full factories, EV buses, food security, final 4,000 km of roads.

- **Water:** 1,000 boreholes, 10 purification plants, 2,000 tanks, 100 mobile units.
- **Power:** 20 solar microgrids, pilot waste-to-energy plant.
- **Healthcare:** 5 mobile hospitals, 25 mini-clinics, 2 hospitals under construction.
- **Housing:** 50,000 eco-homes + sanitation systems.
- **Education:** 100 schools upgraded, 10 vocational centers.
- **Waste Management:** 2 pilot recycling plants (plastic-to-blocks, organic-to-fuel).
- **Agriculture:** 50 greenhouse farms.
- **Factories:** Launch first **construction-material pilot plant** (hempcrete blocks, roofing panels).

**Impact:** 28,000 jobs, 50% water access, 30% electrification, first local materials factory operational.

## Phase 1 (Months 1-12): Foundations

## PHASE 2 (Months 13–24): Expansion

- **Water:** 5 reservoirs, 5,000 km of pipelines, 200 irrigation systems.
- **Power:** 10 new waste-to-energy plants, 50% coverage.
- **Healthcare:** 5 hospitals, 50 clinics, expand mobile/mini clinics to 100.
- **Housing:** 100,000 more eco-homes, mixed-use centers.
- **Education:** 200 schools, 20 vocational centers.
- **Hemp Industry:** Launch **3 hemp industrial plants** (construction materials, paints, textiles).
- **Agriculture:** 200 greenhouse farms, 10 agro-processing plants.
- **Factories:** Build **3 agri-processing plants** (rice milling, cassava starch, vegetable packaging), **1 EV assembly pilot plant**.

**Impact:** 72,000 jobs, doubled farm yields, and the expansion of the industrial sector begins.

# Deployment Rollout & Framework

## Stage 1 – Mobilization (First 90 Days)

**Objective:** Set up the foundation for delivery.

### Government Alignment:

- Joint Steering Committee (IGI + Liberia ministries).
- Formal land allocation, permits, tax incentives.
- Identify 3–5 “pilot regions” (urban, peri-urban, rural).

### IGI Operational Base:

- Establish IGI project headquarters in Monrovia.
- Deploy core team of engineers, planners, and program managers.
- Import initial equipment (borehole rigs, solar units, mobile clinics).

### Local Workforce Training (Rapid Start):

- 5,000 Liberians trained immediately in water drilling, construction basics, and logistics.
- Technical partnerships with Liberian universities and vocational centers.

**OBJECTIVE:** VALIDATE THE MODEL IN SELECTED COUNTIES QUICKLY.

**WATER:** 100 BOREHOLES + 1 PURIFICATION PLANT DEPLOYED IN THE FIRST 3 MONTHS.

**POWER:** 2 RENEWABLE MICROGRIDS AND 1 WASTE-TO-ENERGY PILOT PLANT SWITCHED ON.

**HEALTHCARE:** 2 MOBILE HOSPITALS + 10 MINI-CLINICS OPERATIONAL.

**HOUSING:** 5,000 ECO-HOMES BUILT WITH **LOCAL HEMPCRETE PANELS** (FROM THE FIRST PILOT FACTORY).

**AGRICULTURE:** 20 GREENHOUSE FARMS LAUNCHED IN PILOT COUNTIES.

**FACTORIES:** CONSTRUCTION MATERIALS PILOT FACTORY PRODUCING BLOCKS & ROOFING FOR PHASE 1 HOUSING.

**RESULT:** VISIBLE IMPROVEMENTS → CLEAN WATER, LIGHTS ON, HOUSING, CLINICS → BUILDS TRUST AND MOMENTUM.

Stage 2

Pilot  
Rollouts

Months:  
3–9

## Stage 3 – Full Rollout (Months 10–24)

- ▶ Objective: Scale operations across the nation.
- ▶ Water: 500 new boreholes per quarter, 5,000 km of pipeline laid.
- ▶ Power: 10 new microgrids + 5 new waste-to-energy plants installed.
- ▶ Housing: 10,000 homes built per quarter.
- ▶ Healthcare: 3 hospitals completed, 50+ mini-clinics operational.
- ▶ Agriculture: 100 greenhouses per quarter + Agri-processing factories.
- ▶ Factories:
  - ▶ 2 hemp plants (paints, hempcrete, insulation).
  - ▶ 2 Agri-processing plants (rice milling, cassava starch).
  - ▶ EV assembly pilot line producing first vehicles.
- ▶ Integration: All schools, clinics, and homes constructed use materials from IGI's local factories, creating closed-loop sustainability.
- ▶

## Stage 4 – National Integration (Months 24–36)

**Objective:** Link everything into a unified national ecosystem.

- **Water Grid:** Connect urban + rural systems into a single national network.
- **Energy Grid:** 80% renewable coverage, waste-to-energy in every city.
- **Healthcare:** Mobile/mini clinics in every county + telemedicine backbone.
- **Housing:** 250,000 homes delivered.
- **Education:** 1M students in digital classrooms, 50,000 trained technicians.
- **Factories:**
  - Full industrial park for hemp-based products.
  - 2 EV factories + 1,000 charging stations nationwide.
  - 5 Agri-processing hubs fully exporting Liberian produce.

### **Sustainability Transfer:**

**Train 20,000 local engineers/managers.**

Gradually hand management to the Liberian government + private cooperatives

## Deployment Methods (How We Deliver Fast)

- ▶ **Cluster Model:**
  - ▶ Rollout in **regional clusters** (e.g., Monrovia cluster, Buchanan cluster, Gbarnga cluster) so each area gets housing, water, power, and healthcare together.
  - ▶ Prevents piecemeal development; creates *model smart communities*.
- ▶ **Prefabrication & Modular Systems:**
  - ▶ Factories produce **modular homes, clinics, and school units**.
  - ▶ Shipped and assembled in weeks, not years.
- ▶ **Local-Global Partnership:**
  - ▶ The Liberian workforce does the bulk of construction and operations.
  - ▶ IGI engineers provide technology, training, and management oversight.
- ▶ **Use of Waste & Hemp:**
  - ▶ Every home, school, and clinic is built with **local eco-materials**.
  - ▶ Waste is converted to **energy and raw materials** to sustain factories.

Impact: 270,000 jobs,  
100% water access, food  
independence, and factories  
anchor Liberia's industrial  
economy.

# End of Year 3-Visible Results

# IGI GLOBAL IMPACT

LIBERIA Investment Envelope 2025

- ▶ \$1 TRILLION INVEST IN LIBERIA
- ▶ \$500B Zariyah Kids
