

We are recruiting a Compressed Gas Operations Manager

NanoSUN is a new Company formed in 2017 working in the green energy sector and voted the best start up in Europe in the Shell New Energy Challenge earlier this year. We have an exciting opportunity for an organised, professional, committed and enthusiastic Compressed Gas Operations Manager to support the smooth running of this exciting growing company. We are seeking to recruit a colleague with both the commitment, personal drive, enthusiasm and energy to contribute to the team in our friendly, inspirational company.

The **Compressed Gas Operations Manager** is responsible for capability development and operational effectiveness across NanoSUN's high-pressure gas production, conditioning and filling operations. This includes strategy, systems, processes, training and talent development. Success will be judged by a combination of financial and operational metrics.

Primary Responsibilities

- Leadership
 - Manage site to achieve financial targets for output and costs
 - Manage key stakeholder relationships including site partners, customers and suppliers
 - Recruit, manage and develop gas operations team
 - Remain current on production management & safety best practices
 - Implement policies aligned to strategy and provide clear direction and focus
- Site Operations
 - Ensure safety and efficiency of all gas yard operations
 - Manage daily operations: production planning, scheduling, & quality
 - Manage resource allocation and asset utilisation
 - Ensure compliance with all relevant ISO standards, HSE guidelines and BCGA codes
- Processes & Systems
 - Develop systems and processes that track and optimise productivity metrics and performance targets to ensure effective use of assets – prepare, analyse and issue production and performance reports

Person Specification

- Education
 - Bachelors Degree in relevant Engineering discipline
- Experience
 - Minimum 5 years direct experience in compressed gas cylinder filling operations
 - Minimum 5 years managing/supervising compressed gas cylinder filling operations
 - Experience of business and management principles (budgeting, strategic planning, resource allocation and human resources) and leading root cause investigations.
- Style
 - Hands-on leader, with strong bias for leadership by example
 - Strong communicator with aptitude for troubleshooting
- Knowledge & Skills
 - Expert in safety, quality, productivity and inventory processes associated with high pressure filling of gas cylinders with flammable gases eg hydrogen
 - Familiar with regulatory requirements for operating gas yard / plants containing flammable gases
 - Proficient with MS Office or equivalent project management software

Salary is negotiable and to be commensurate with experience. Employees receive 27.5 days annual holiday in addition to the 8 Public Holidays.

If you have the above skills and are looking for a new and exciting role, please send a covering letter and your CV to simon.thompson@nanosun.co.uk. If you would like to discuss this role before applying, please contact Simon Thompson on 01524 635170.
