Data Sheet: Blank Sample for 20 Discrete Trials:

Baseline/Probe Codes + correct - incorrect   R+=Reinforcer used
Prompt Codes: P-Physical, G-Gestural, V-Verbal, PL-Positional, M-Modeled
Use "F" to indicate Faded version and explain for team teachers

Date: **Staff:**   **Stimulus:**   **Target Response:**   **%correct:**

1.	2.	3.	4.	5.	6.	7.	8.	9.	10.

Date: **Staff:**   **Stimulus:**   **Target Response:**   **%correct:**

11.	12.	13.	14.	15.	16.	17.	18.	19.	20.

Example for starting off with teaching the learner to touch her nose:

Date: 9/3   Staff: MK   Stimulus: "Touch Your Nose"
Baseline   Target Response: Independently touches her nose   %correct: 20

1.	2.	3.	4.	5.	6.	7.	8.	9.	10.
-	-	+	-	-	-	-	-	-	+

Note that this is a baseline, the opportunity to understand the student's current level of skill for this task. It is the ONLY time prompting won't occur. After this, prompting will be offered for errorless learning. In a probe, or a baseline, you only record either a correct or an incorrect response with + or a -.
