

Hi Fellow Club Members,

I just got back from the GTOAA national show in Kingsport, TN. There were 93 points judged GTOs at the show. The quality of the cars was just spectacular and the investment to restore them mind boggling.

I have owned my car since 1986. I did a frame off on the car in 1995 and my car has every available option you could get from Pontiac in 1965 except a power antenna and a vinyl roof. Some of those options include power steering, power brakes, Ram Air, AC, posi. and the very rare cable trunk release. It's been to 10 national shows over the years and scored a perfect 400 points with POCI in Dayton, Ohio in 2013. At the Kingsport GTOAA show it scored 666 points out of 700. I enjoy being a part of our CCPC but since I live in Conover it doesn't work for me to attend the monthly meetings, but I really enjoyed Tiger Tracks every month.
