

CCPC Readers Ride

Here is long time club member (since 1993) David Kime with his beautiful bright red metallic 1992 Firebird with camel interior.

Dave bought this car new @ Dick Keffer Pontiac in Charlotte and it has the 5.0 Liter EFI engine and Automatic transmission with optional Aero Package, which includes the front air dam and ground affects.

Dave had former club member “June Bug” repaint this car back in 2008, and it still looks like new paint, even today!

Dave has only done a few mods to his car such as, a strut brace and sub frame connectors he also had the leather seats re-upholstered. One of the memories in his Firebird, that he said he will never forget is when he was driving on wet roads in the

mountains, Hwy 80 and the car got sideways!

Dave takes great pride in his Firebird and it shows, he has won multiple trophies at Autofair over the past 2 decades. This car is not just for show though; Dave also likes to test the handling of the Firebird driving in the mountains around the curves. Nice car Dave!!
