HANDLES

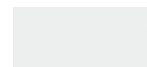

Every patio door is equipped with a standard, easy-to-grip Contemporary handle with a multi-point, keyed lock. Modern and Sleek handles are also available to best fit your home's aesthetic.

multi-point lock

Our multi-point lock increases security when compared to traditional single-point locking mechanisms found on other patio doors. These handles are lockable from the outside, which allows the possibility to have this door as the gateway of all welcome visitors into your home. This multi-point locking system is standard on all of our handle options.

LITERALLY.

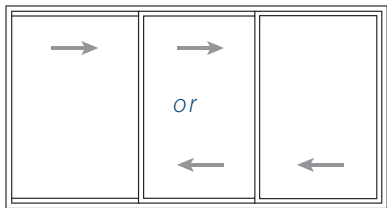

Bypass sliding patio doors from Wincore® allow maximum daylight and offer a dramatically wide opening to your patio or garden. Thanks to a double roller track, panels slide and *stack perfectly* within the door frame while taking up a minimal amount of floor space.

The robust profile design offers superior thermal performance, maximum sturdiness and durability without reinforcement. Door sills feature two-level drainage to ensure excellent water evacuation. Weatherstripping between each panel prevents air infiltration, and is located on an adapter to make them easier to replace if required. Patented tandem wheels in ultra-durable nylon leave no marks on the rail and provide smooth, effortless operation. And each and every door is backed by a comprehensive, limited lifetime warranty that stands as a hallmark of complete peace of mind.

THREE PANEL sliding patio door

The three panel sliding patio door is available with any combination of the following width and height sizes.

widths

86" 104" 139^{7/16"}

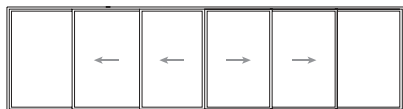

heights

79^{1/2"} 95^{1/2"}

Custom sizes are available.
Contact your Wincore
representative for more information.

SIX PANEL sliding patio door

The six panel sliding patio door is available with any combination of the following width and height sizes.

widths

169^{1/4"} 205^{1/8"} 276"

heights

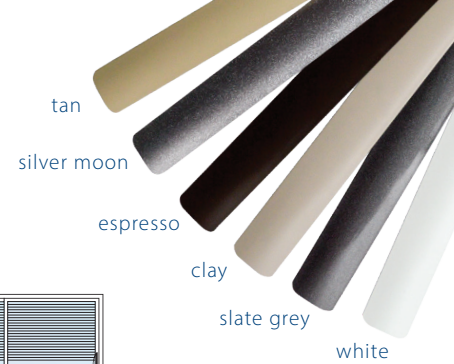

79^{1/2"} 95^{1/2"}

Custom sizes are available.
Contact your Wincore
representative for more information.

INTERNAL BLINDS

Blinds are sealed behind tempered glass for a seamless appearance.

- Eliminates dusting.
- Prevents damaged blinds.
- Helps control solar heat gain.
- Easy raise, lower & tilt operation.
- Safe for children and pets.
- Adds privacy, security and light control.

GLASS

7700 Bypass Sliding Patio Doors feature Low E glass with Argon gas inside the insulating glass unit. Low Emissivity glass helps keep heated air inside during the colder months and air-conditioned air inside during warmer months. Argon gas is a non-toxic gas that is heavier than air. Replacing the air inside the insulating glass with Argon improves energy performance.

Wincore's Bypass Sliding Patio Door is able to meet ENERGY STAR® requirements with a variety of glass configurations.

SCREEN

A retractable screen is available on select patio door configurations. This provides an unobstructed view of the outdoors without the stress of having unwanted pests enter your home. Pocket installation has no bottom threshold to provide a flush connection between the door itself and the screen. This is one of the factors that gives the screen a sophisticated and modern aesthetic.
