FEATURES

Fusion-Welded Frame & Sash Panels Keep out air and water.

Chambered Profiles Honeycomb, hollow chambers throughout the vinyl profiles provides increased strength as well as thermal efficiency.

Reinforced Sash Profiles Add Strength and rigidity.

Double-strength Tempered Glass Strength and overall performance is multiplied.

Smooth and Quiet Operation Patented dual-tandem nylon wheels on a raised rail protects the wheels from dirt and debris, minimizes friction and makes for a smoother operation.

Weatherseals Multiple lines of weatherstripping around each panel helps to ensure a weather-tight seal.

3/4" Low E glass and Argon gas-filled insulating glass unit helps maintain even temperatures inside the home.

Aluminum Screen Frame with Fiberglass Screen Cloth.

BETWEEN-THE-GLASS MINI BLINDS*

Internal, hermetically-sealed mini blinds add privacy and security, as well as help you control light and solar heat gain. In addition, they also allow you to enjoy an unobstructed view of the streamlined door frame and interior casing and trim. Because they are located inside the sealed glass unit, the blinds will never need dusting and will not become damaged over time. The blinds raise, lower and tilt with a single streamlined lever. White blinds are standard, and require a 2 week lead time. Additional colors require a 6 week lead time.

**Blinds are not available with grids. Size restrictions apply. Patio Doors with Internal Blinds do not always meet Energy Star Guidelines. Please contact your sales representative to see which option best fits your needs.*
