Wincore's QuickShip program is designed so that selected 32", 34" & 36" wide, 80" tall single door products will ship within two weeks of the standard order cutoff date. Decorative glass styles that are part of the QuickShip program are indicated by the QuickShip icon, while door and sidelite styles are highlighted green in sizing and availability charts.

STORMFORCE

Wincore's STORMFORCE Impact-resistant fiberglass doors, sidelites and hinged patio doors are designed specifically for coastal area homes and comply with high velocity hurricane zones (HVHZ) or wind-borne debris regions (WBD). Decorative glass styles that can be part of the STORMFORCE line of door and sidelites are indicated by this symbol. The full line of STORMFORCE products can be found starting on page 118.

WE NOT ONLY
BUILD WINDOWS
AND DOORS,

WE BUILD HOPE.

Because breast cancer has touched so many lives, including a few of ours, we determined early on that we needed to do what we could to help fight it. That's why we've made a long term commitment to take a portion of our sales and make annual donations to Tough Enough to Wear Pink™ — a non-profit organization dedicated to fundraising and increasing awareness to benefit breast cancer research. In the grand scheme of things, our efforts may not seem like much. But our thought is, if everybody does a little, it won't be long until we all accomplish a lot.

**TOUGH ENOUGH
TO WEAR
PINK?**™

PROUD TO BE AN ENERGY STAR® PARTNER

Today, many companies promise to make energy efficiency a priority. When you see the ENERGY STAR® symbol, you're guaranteed those promises are true. As an ENERGY STAR® partner, under the guidance of the U.S. Environmental Protection Agency (EPA) and the Department of Energy (DOE), Wincore® has agreed to

- Build energy-efficient products that have been tested and certified in accordance with the guidelines set forth by the ENERGY STAR® Partnership program
- Manufacture each product with attention to increasing overall energy efficiency
- Inspire trust in the ENERGY STAR® symbol through quality, high-performing products

VISIT ENERGYSTAR.GOV TO GET MORE INFORMATION ON ENERGY STAR® AND ENERGY STAR® PRODUCTS.

SUPPORT FROM THE BEST. FOR THE BEST.

We at Wincore® would like to thank our vendors that help make our dream a reality. Thanks to these extraordinary teams of people, we are able to supply the best window and door products to a wide range of individuals. We are extremely grateful for the partnerships we have made with such amazing businesses.

SHERWIN-WILLIAMS

TEXAS DEPARTMENT OF INSURANCE (TDI)

Many Wincore products have been approved for use by the Texas Department of Insurance (TDI).

FLORIDA BUILDING COMMISSION (FBC)

Many Wincore products have been approved for use by the Florida Building Commission (FBC).

NATIONAL ACCREDITATION & MANAGEMENT INSTITUTE (NAMI)

Wincore is an active participant in the nationally recognized NAMI Structural Certification Program, NAMI Insulated Glass Certification Program and NAMI Fire Door Certification Program. All programs are accredited by both the American National Standards Institute (ANSI) and the International Accreditation Services (IAS).

NATIONAL FENESTRATION RATING COUNCIL (NFRC)

Wincore is an NFRC Member and actively participates in the nationally recognized NFRC Certification Program, which validates all thermal performance metrics. As an Energy Star® Partner, Wincore also actively participates in the FenStar Certification Program.

MANUFACTURERS

Special thanks to window & door magazine for recognizing Wincore® Windows & Doors as one of their top 100 manufacturers.

FULL LITE DOOR IN OAK GRAIN / BLACK WITH WYNGATE GLASS. ADDISON HANDLESET IN BLACK.

THE ONLY THING MORE BEAUTIFUL THAN THE OUTSIDE IS THE INSIDE.

SHIELD® TECHNOLOGY

SHIELD® Technology features fiberglass reinforced door skins, full-length composite stiles and composite top and bottom rails to prevent water infiltration on all six sides.

COMPOSITE TOP AND BOTTOM RAILS

Additional non-porous protection keeps water from seeping into the door and helps prevent mold and mildew.

FIBERGLASS REINFORCED SKIN

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. The doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

FULL-LENGTH COMPOSITE STILES

Entry doors feature full composite stiles to enhance water resistance into the door's insulation and full-length LVL to reduce warping, rot and rust.

ARCHITECTURALLY CORRECT PROPORTIONS

Beautifully detailed panels replicate traditional wood door construction to create crisper shadow lines and enhanced curb appeal.

INSULATED CORE

Environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

COMPOSITE FRAME SYSTEM

Composite door frames are an innovative new alternative to traditional finger-jointed wood door frames. Research proves full-length composite door frames combine the strength and convenience of wood door frames with enhanced properties that make them moisture- and insect-resistant. The composite, rot-free polyfiber door frame will last years after wooden frames have deteriorated. Composite polyfiber frames will never absorb moisture, splinter or rot like wood door frames, or rust like metal door frames. And on Wincore® Fiberglass Entry Doors, they are a standard feature.

- Low maintenance
- Resistance to wear, splitting and impact
- Excellent nail and screw holding strength
- Great paint, stain and glue adhesion
- Can be installed below grade or to masonry
- Does not promote mold or mildew
- Moisture and termite proof material
- Lifetime warranty for rot, decay and insects

POLYURETHANE
CORE

A REVOLUTIONARY "ONE SIZE FITS ALL" SYSTEM THAT'S ANYTHING BUT.

Every home and entry door is different. And although adding sidelites can often turn an ordinary entry into something extraordinary, they can often present unique challenges for a precise installation. That's why Wincore Entry Systems feature a completely customizable system to ensure a super strong, tight fit.

JAMB OPTIONS

All Wincore® entry doors have a standard jamb depth of 4-9/16". For deeper wall construction, extensions can be added to the jamb up to a total jamb depth of 10" for inswing doors and 8-9/16" for outswing doors. The extensions are applied at the factory in 1/8" increments.

CONTINUOUS HEAD & SILL

While most entry system manufacturers simply install sidelites as separate units (a method that can often result in sagging or loose sidelites after a period of time), Wincore's continuous head and sill strategy helps to retain strength and rigidity for the lifetime of the door. The head board of the entry system is one piece that continues above the mullions to provide additional strength along the entire head of the unit. Simultaneously, the one-piece sill continues underneath the mullions to provide additional strength along the entire base of the unit.

CUSTOMIZED BRICKMOULD WIDTH

On entry system projects, the standard 2" brickmould may not be wide enough to fill the void that remains after that old door is removed. That's why Wincore® Entry Systems provides composite brickmould in custom width up to 4". Prefinished brickmould is available in both oak grain and smooth finishes and can be stained (oak grain only) or painted.

CUSTOMIZE YOUR MULLIONS

Every opening is unique. Customizing the width of Wincore® doors with sidelite(s) allows you to fit your door to the opening, instead of modifying your opening to fit the door. Mullions are comprised of the same rigid composite material as the door's jambs. This means they will not warp or decay and are resistant to insect damage. Located between the door and sidelite(s), mullions ensure a perfect fit and are finished to match the perimeter door frame. The width of each mullion can spread from 3/4" up to a maximum of 3".

PRE-MITERED CASING

Pre-mitered, ready-to-install casing is available for any door configuration including transoms. Comes in all paint and stain finishes. Standard clear Poplar 2-1/2" Ranch or Colonial style casing covers paint lines for a finished appearance. Casing is also available in Oak and 3-1/2" wide.

FEATURES THAT GO FAR BEYOND STANDARD.

BEAUTIFUL, EVEN FINISH

HAPS-free (Hazardous Air Pollutants) paints and stains are applied by highly-trained, skilled craftsmen in a climate-controlled environment. Wincore® doors are protected with a clear coat and oven-cured for maximum durability.

INSULATED CORE

Entry systems feature an environmentally-friendly insulation to provide a high R-value for maximum thermal protection.

IMPROVED DOOR FRAMES

Composite polyfiber frames will never absorb moisture or splinter. Wincore's standard composite frame will not rot like their wood counterpart, nor will they rust like a steel framed door.

ROT-FREE BRICKMOULD

Brickmould is constructed of a durable composite material to resist rot, decay and damage from insects.

SECURITY STRIKE PLATE

Where applicable, a steel security strike plate adds extra strength to help prevent forced entry.

SECURITY PROTECTION

Grade 1 is the highest level of security for residential deadbolts. All deadbolts have Grade 1 certification.

DUST BOX

Single doors feature a dust box located beneath the deadbolt strike which provides a barrier to air infiltration and also conceals the deadbolt latch.

BALL BEARING HINGES

Ball bearing hinges are standard for inswing doors – featuring four-point attachments to the door and the door frame for a lifetime of dependability. For certain applications (like French Doors), adjustable hinges are also available.

ADVANCED SILL DESIGN

The sill's innovative design prevents rotting, warping or deterioration over time. Incorporating a high dam overlap cap in addition to the 1-3/8" sill height creates a tough barrier against water penetration. Door sills are available in mill finish, satin nickel and bronze.

DOORLIGHT FRAME

High-performance, doorlite frames are heat-resistant and will not warp, crack or fail to adhere to the door, even in most intense climates.

DOORLITES

Doorlites add beauty, natural light and curb appeal to your home, but can also answer your specific needs for light control, privacy and outdoor visibility. Decorative glass is hand-crafted individually unique - no two are ever the same.

HARDWARE

Standard hardware is manufactured by the most recognized name in entry door security – Schlage. Schlage hardware is durable, stylish and available in multiple finishes.

WEATHERTIGHT SEAL

Energy efficient weather stripping provides a weathertight seal along the sides and top of the door frame and interlocks with the Simple Solution Corner Pad ensuring the most energy efficient seal available for keeping moisture, air and dirt out of your home.

DOOR BOTTOM SWEEP

The double bulb sweep maintains maximum surface contact with the threshold rail, consistently outperforming competitive products by encapsulating both the outside and inside edges of the rail.

CRAFTSMAN STYLE DOORS

Inspired by the design principles of American Craftsman architecture, the Craftsman Series doorlites add authenticity to a Craftsman, Mission, Bungalow or Cottage style home. Craftsman Series doors are available with decorative or Low E glass, as well as SDL options. Glass size and frame profile are specific to the Craftsman Series.

For an authentic appearance, Craftsman style doors are available with an optional Dentil Shelf on the interior or exterior of the door.

RETRO. MODERN. TOTALLY HIP.

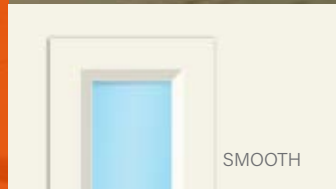

Introducing the Vibe Collection. A series of Wincore® Fiberglass Entry Doors honoring mid-century architecture as well a modern aesthetic. Available in a smooth or oak woodgrain texture with Classic Low E, Frosted or Rain Glass, doors from the Vibe Collection turn an entry door into a focal point. With a variety of glass shapes, choose from twelve distinctive door options.

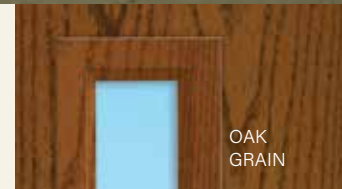

Architecturally authentic modern frame profiles create the minimalist aesthetic.

HANDING & DOORLITE POSITIONS

When the door style has the doorlite offset towards the left or the right of center (Ex: VIBE 1L Vertical), the doorlite will be located on the strike side of the door slab, closest to the door handle. When the door style has 'stepped' doorlite design (Ex: VIBE 3L Vertical Stepped), the door handle is located on the side where the lite is closest to the handle. This places the lite closest to the top of the slab, on the hinge side of the door.

96" FULL LITE FRENCH DOUBLE DOORS IN OAK GRAIN / MAHOGANY WITH TOPAZ GLASS. FLAIR HANDLE AND DEADBOLT IN SATIN NICKEL.
OPPOSITE PAGE - FULL LITE 2 PANEL PATIO DOORS WITH CLEAR GLASS AND FLAIR HANDLE AND DEADBOLT IN SATIN NICKEL. LEFT PANEL IS FIXED WHILE RIGHT IS OPERATIONAL.

MAKE A GRAND ENTRANCE EVEN MORE GRAND WITH FRENCH DOUBLE DOORS.

When ordered in a french double door style, one of the door panels feature an attached astragal. The astragal has durable steel locking pins at the sill and also at the head of the entry door. When locked, the astragal keeps one panel of the entry system locked in place, while allowing the other door panel to open and close. With the astragal unlocked, both door panels open and close freely.

- Any door can be ordered as a french double door.
- Astragals are locked and unlocked with fingertip adjustments.
- Screens are available for inswing french doors.

ASTRAGAL IN LOCKED POSITION

ASTRAGAL IN UNLOCKED POSITION

PATIO DOORS

On two panel patio doors, one panel is operational while the other remains fixed. On three panel patio doors, two panels remain fixed while the third panel is fully operational. The operational panel on patio doors can open into your home, or, open to the outside. For doors opening into the home, a durable sliding track fiberglass mesh screen comes standard in five popular colors.

- One fixed panel on 2 panel patio doors.
- Two fixed panels on 3 patio doors.
- Doors available in Full Lite styles are available as 2 or 3 panel patio doors.

2 PANEL 3/4 LITE DOOR & 3/4 OPERATING SIDELITE IN OAK GRAIN / MESA RED EXTERIOR AND WALNUT INTERIOR WITH RAIN PRIVACY GLASS. CAMELOT HANDLESET IN AGED BRONZE.

BRING THE OUTDOORS INSIDE WITH OPERATING & VENTING SIDELITES

OPERATING SIDELITES

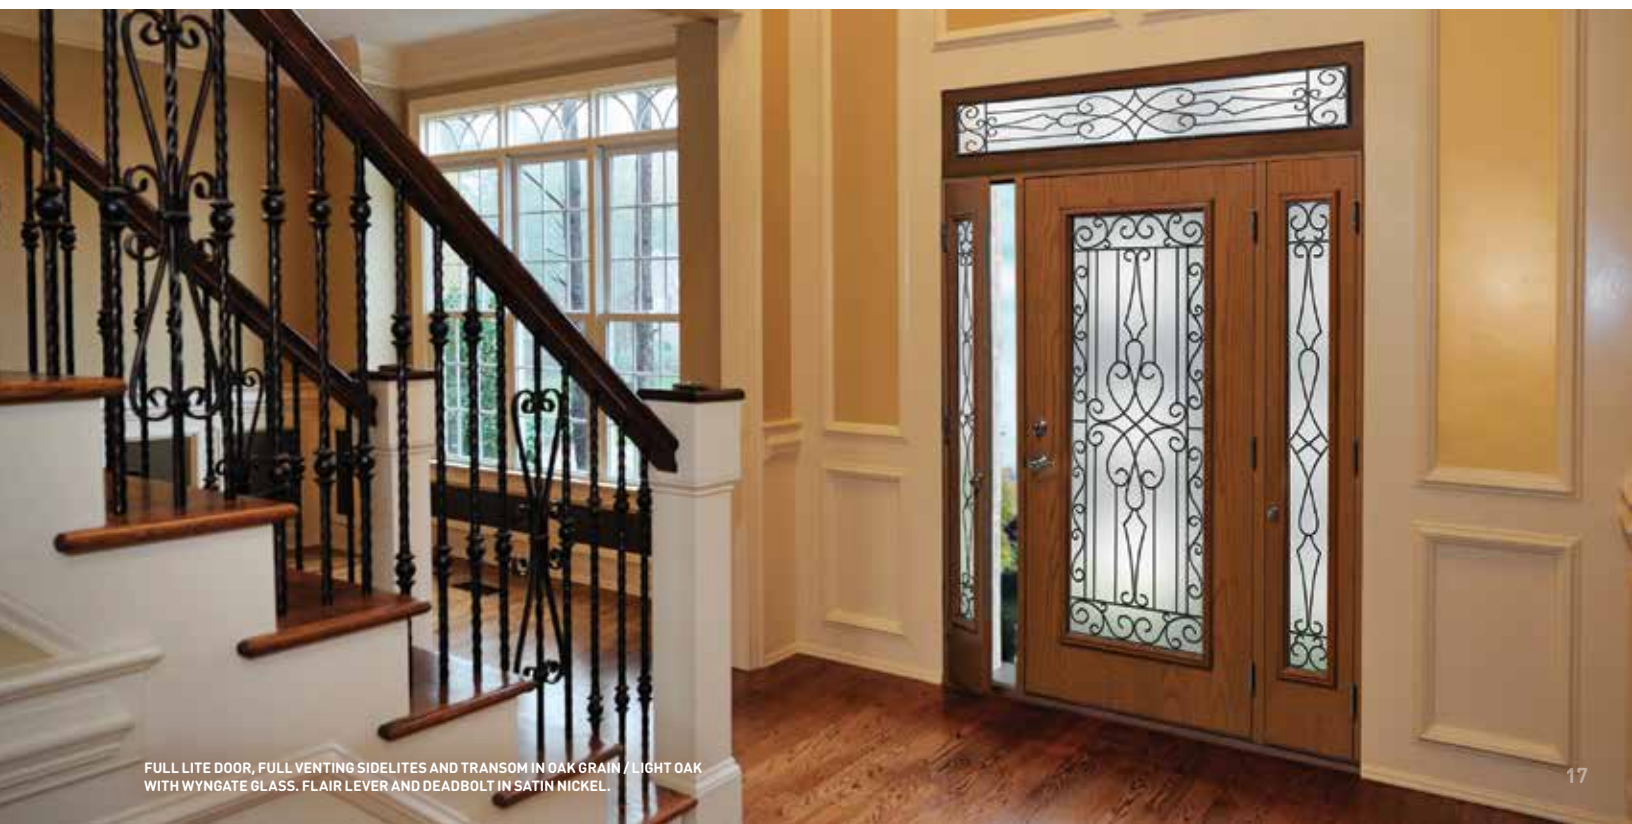

Functioning just like a true french double door, doors with an operating sidelite feature a continuous sill. An astragal attached to the sidelite allows it to remain either locked and fixed or unlocked and moving freely. Operating sidelites are available in decorative and classic glass styles. Operating sidelites can open both into the home as well as outward. Full Lite, 3/4 Lite and 1/2 Lite sidelites are available as operating sidelites in both 12" and 14" widths.

- Inswing and outswing.
- Operates like a french double door.
- Continuous sill across both door and sidelite.
- Most available sidelites can become an operating sidelite.
- Standard 80" heights.
- Limited custom heights, 96" height unavailable.

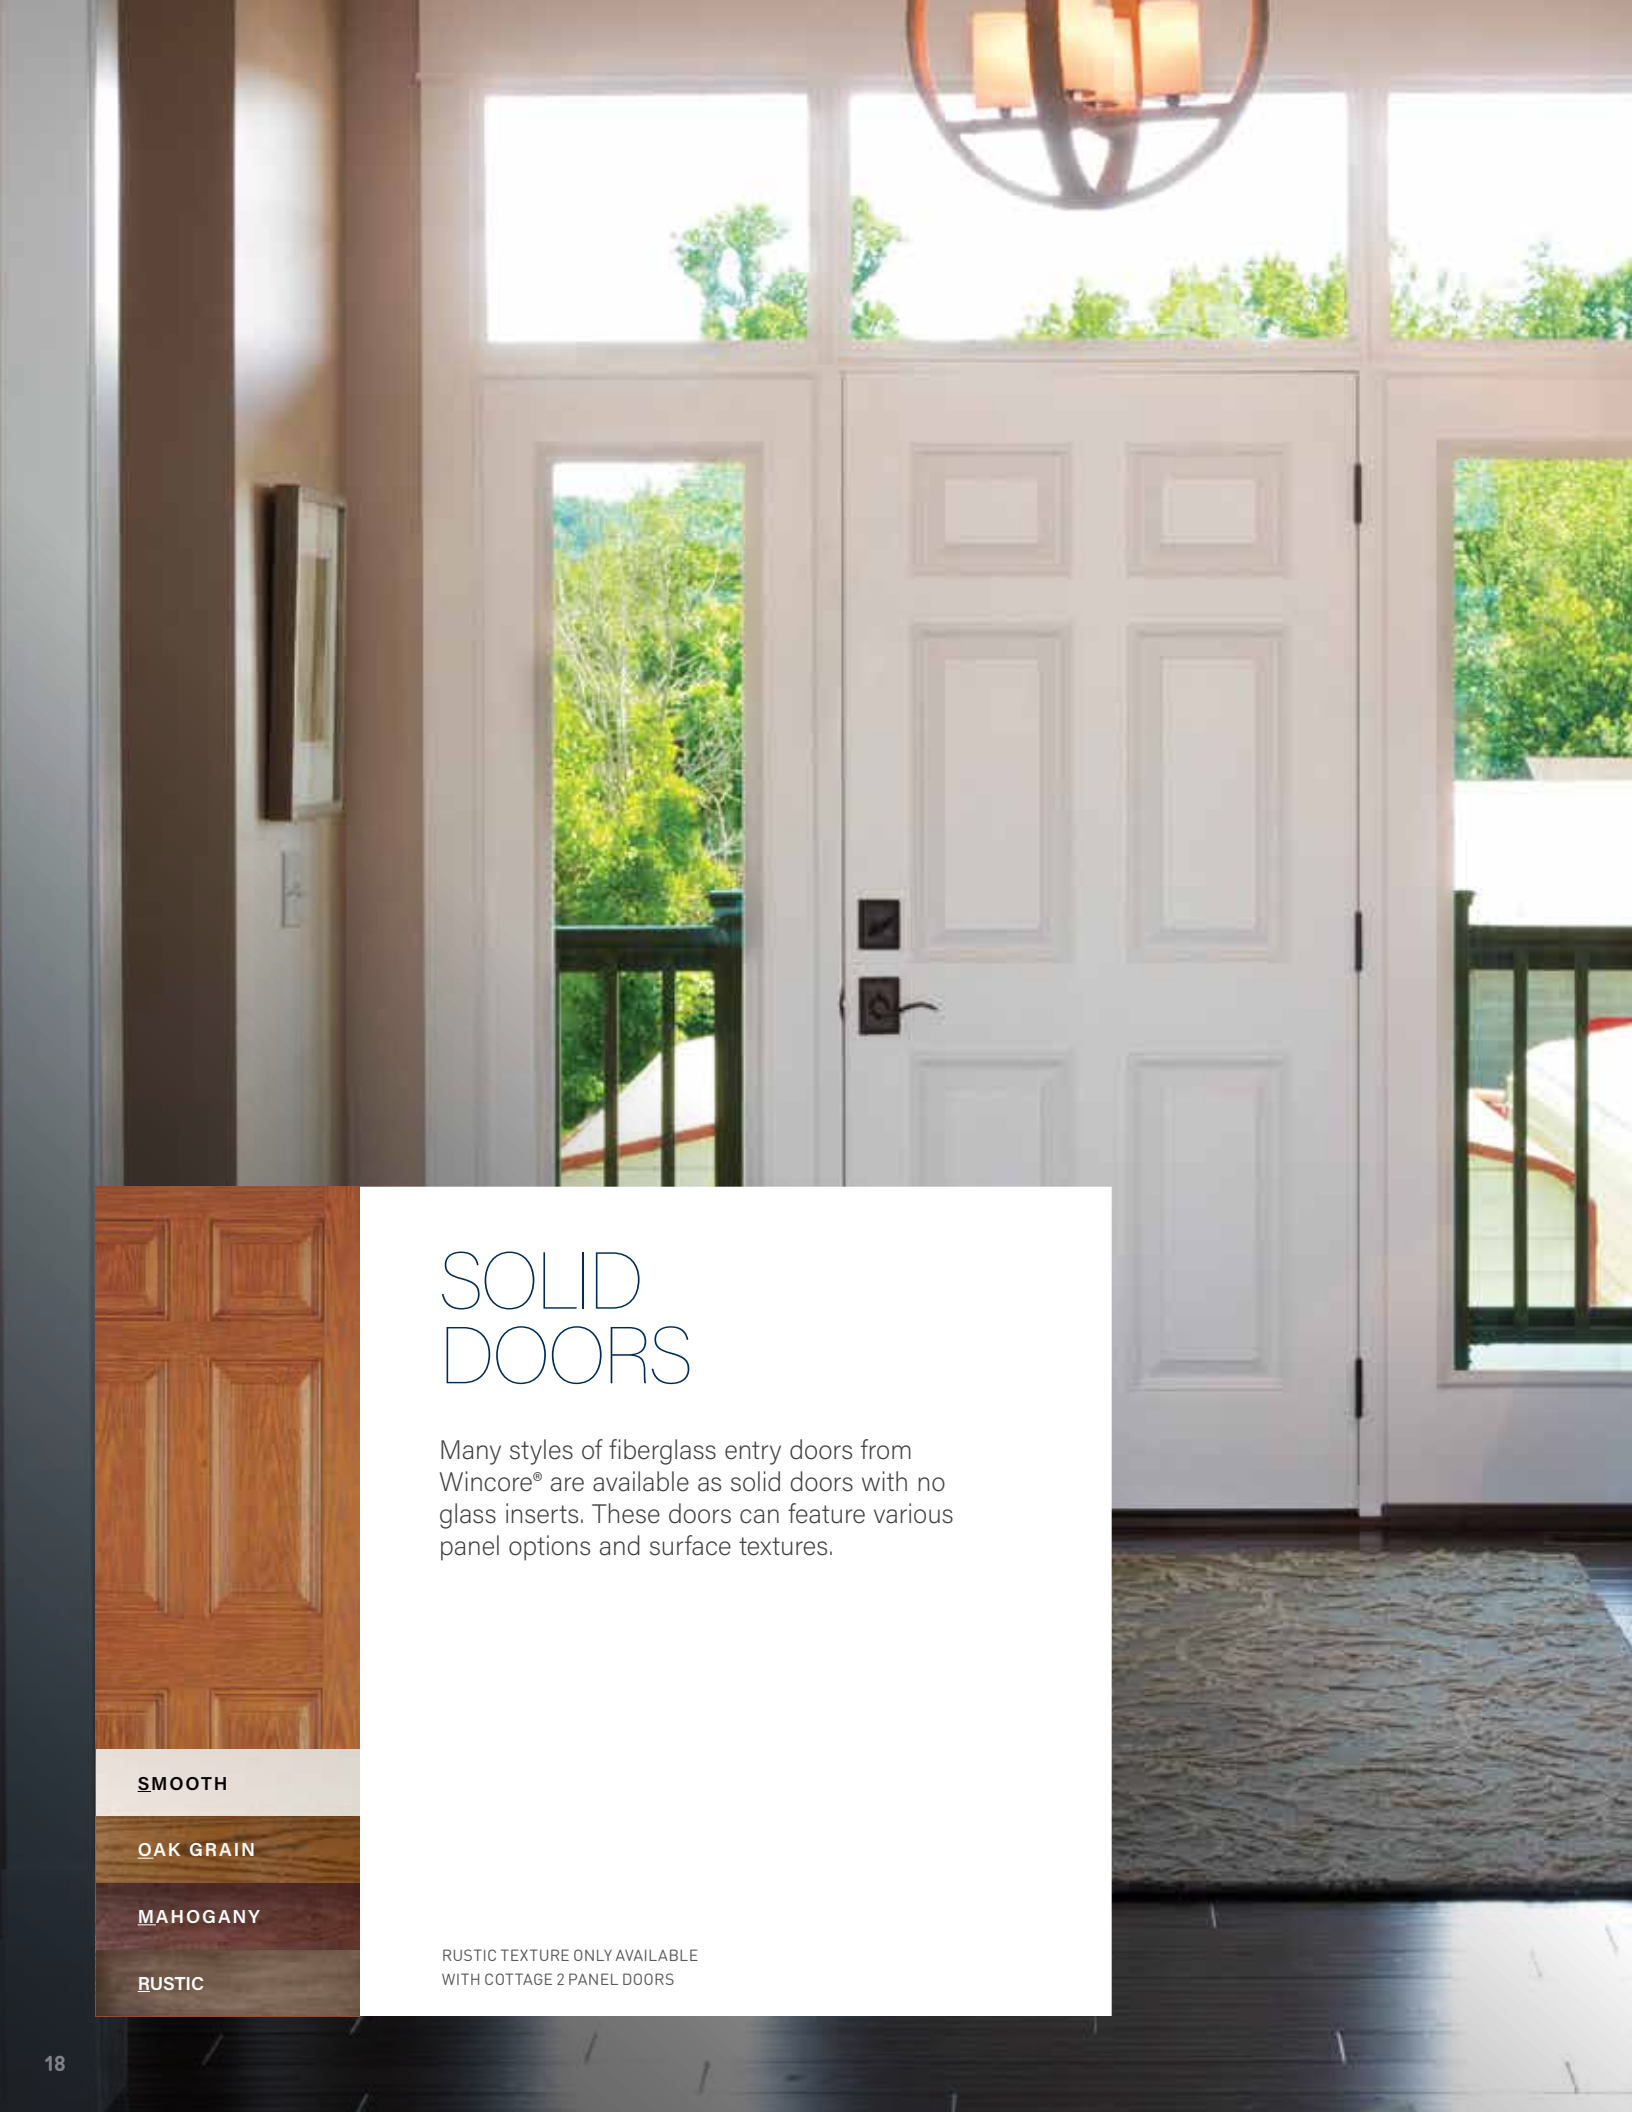

VENTING SIDELITES

Available with decorative glass, blinds and grids, venting sidelites swing open into the home and feature easy-to-remove screens. The sidelites are attached to the entry system's frame with durable ball bearing hinges. When closed, venting sidelites lock securely in place at multiple points with multi-point locking hardware. Venting sidelites are available in most 12" and all 14" widths.

- Opens to a full 90-degrees for maximum ventilation.
- Easy-to-remove screens.
- Ball bearing hinges maintain perfect alignment with door.
- Multi-point locking hardware on sidelite only.
- Inswing only.
- 80" heights only.
- 3/4 sidelites unavailable in 12" widths.
- Full craftsman sidelites unavailable in 12" widths.

FULL LITE DOOR, FULL VENTING SIDELITES AND TRANSOM IN OAK GRAIN / LIGHT OAK WITH WYNGATE GLASS. FLAIR LEVER AND DEADBOLT IN SATIN NICKEL.

SOLID DOORS

Many styles of fiberglass entry doors from Wincore® are available as solid doors with no glass inserts. These doors can feature various panel options and surface textures.

PRIVACY
GLASS

LET THE LIGHT IN, NOT THE WHOLE NEIGHBORHOOD.

Privacy ratings for doorglass allow you to choose the level of privacy you prefer. Textures within the glass are the key elements that affect opacity. Each glass texture has a different opacity level, with the combination of textures in each doorglass design also affecting the overall privacy rating.

A low privacy rating of 1 or 2 offers the most visibility. For the most privacy, choose doorglass with a privacy rating of 8 or 9, which allows you to see colors and shadows through the glass, but won't allow anyone outside to distinguish objects or people inside.

PRIVACY GLASS OPTIONS

Glass shown below with objects and light from behind to emphasize glass texture detail. Glass does not contain color. Not all glass options are available in all door styles. Please see the individual glass sizing charts for details.

LINEN

Linen's lightly etched glass and woven pattern complement casual or formal entryway designs. The translucent white glass and soft moiré of Linen's threads give it a high privacy level.

VIBE COLLECTION

A MODERN TAKE ON MID-CENTURY ARCHITECTURE.

VIBE collection

Introducing the Vibe Collection. A series of Wincore® Fiberglass Entry Doors honoring mid-century architecture as well a modern aesthetic. Available in a smooth or oak woodgrain texture with Classic Low E, Frosted or Rain Glass, doors from the Vibe Collection turn an entry door into a focal point. With a variety of glass shapes, choose from twelve distinctive door options.

1L VERTICAL DOOR IN SMOOTH / HUNTER GREEN WITH CLEAR GLASS. CENTURY HANDLESET AND DEADBOLT IN BLACK.

RETRO. MODERN. TOTALLY HIP.

Available in a smooth or oak woodgrain texture with Classic Low E, Frosted or Rain Glass, doors from the VIBE Collection turn an entry door into a focal point. With a variety of glass shapes, choose from twelve distinctive door options.

In addition to our many designer paints and stains available, choosing a custom color for your door is easy — just select your perfect color at your local Sherwin Williams store. Then, provide the Sherwin Williams Color Name and Swatch Number to your Wincore supplier.

OPTIONS

VIBE doors are standard with Low E glass. In addition, all doors in the VIBE collection are available with two privacy glass options — Frosted and Rain. Both privacy options have a privacy rating of 9. Privacy glass is not Low E. Smooth & Oak Grain Textures only.

VIBE COLLECTION HANDING & LITE POSITION

When the door style has the doorlite offset towards the left or the right of center, the doorlite will be located on the strike side of the door slab, closest to the door handle. When the door style has 'stepped' doorlite design, the door handle is located on the side where the lite is closest to the handle. This places the lite closest to the top of the slab, on the hinge side of the door.

SHAKER DOORS

Shaker doors feature clean lines and a minimalist design, making them a versatile choice for any decor. These doors have a timeless appeal with their simple, recessed panels, offering both elegance and functionality.

SIMULATED
DIVIDED LITES

AN AUTHENTIC, CLASSIC LOOK FOR YOUR HOME.

Doors with Simulated Divided Lites (SDL) provide the look of a true divided lite with the energy efficiency of a one lite. An internal spacer and backing strips allow for true wood muntin appearance.

PRIVACY GLASS STYLES

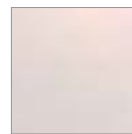

Glass shown below with objects and light from behind to emphasize glass texture detail. Glass that contains color will be noted in the glass description. Not all glass options are available in all door styles. Please see the individual glass sizing charts for details.

BAROQUE SDL PRIVACY GLASS

Baroque offers a more moderate level of privacy through a flowing design with a soothing element to it due to a lack of hard lines in the glass. When combined with the segmented style of SDL design, the door is reminiscent of an antique era.

INTERNAL BLINDS

BLINDS BRING AN UPDATED LOOK AND FEEL TO YOUR HOME.

Enclosed between the glass, Blink® Blinds never need to be dusted, which decreases allergens in your home. Even with repeated use, the enclosed blinds retain their new look, unlike exposed blinds that can become bent or tangled over time.

Harmony Blinds are a perfect choice for people who value energy savings and quiet. The triple-glazed design with Low E glass option reduces heat transmission by up to 28% and reduces intrusive outside noise.

BLIND COLOR OPTIONS

Not all blind colors are available in all door styles. Harmony blinds are available in white only.

BLINK® BLINDS

Enclosed between the glass, Blink® Blinds never need to be dusted, which decreases allergens in your home. Even with repeated use, the enclosed blinds retain their new look, unlike exposed blinds that can become bent or tangled over time.

The ergonomically placed operator lets you raise, lower and tilt the blinds along the entire length of the doorglass. No reaching is needed to adjust the blinds. The Easy Glide system allows the blinds to tilt closed, keeping you safe from prying eyes and unwanted light. The full privacy channels eliminate light gaps, shadows and sunlight glare.

HARMONY BLINDS

Harmony Blinds are a perfect choice for people who value energy savings and quiet. The triple-glazed design with Low E glass option reduces heat transmission by up to 28% and reduces intrusive outside noise. Beyond the comforts and practicalities of a triple-glazed doorglass lie stylish details. Contoured grids add a warm aesthetic. The blind slats disappear behind the valance when they are fully raised for a clean, finished look.

VENTLITES

Offering the best in performance and energy efficiency, Ventlites bring functionality into an attractive design. The bottom sash of the insert unit moves smoothly up and down for optimum ventilation and the included screen protects from unwanted pests.

The solar shield frame is UV resistant and keeps the frame from peeling or cracking. Patented screw hole covers offer a smooth interior, and ergonomic latches are designed for easy operation and adjust to ten different positions.

IMPACT-RESISTANT FIBERGLASS ENTRY SYSTEMS

STORMFORCE

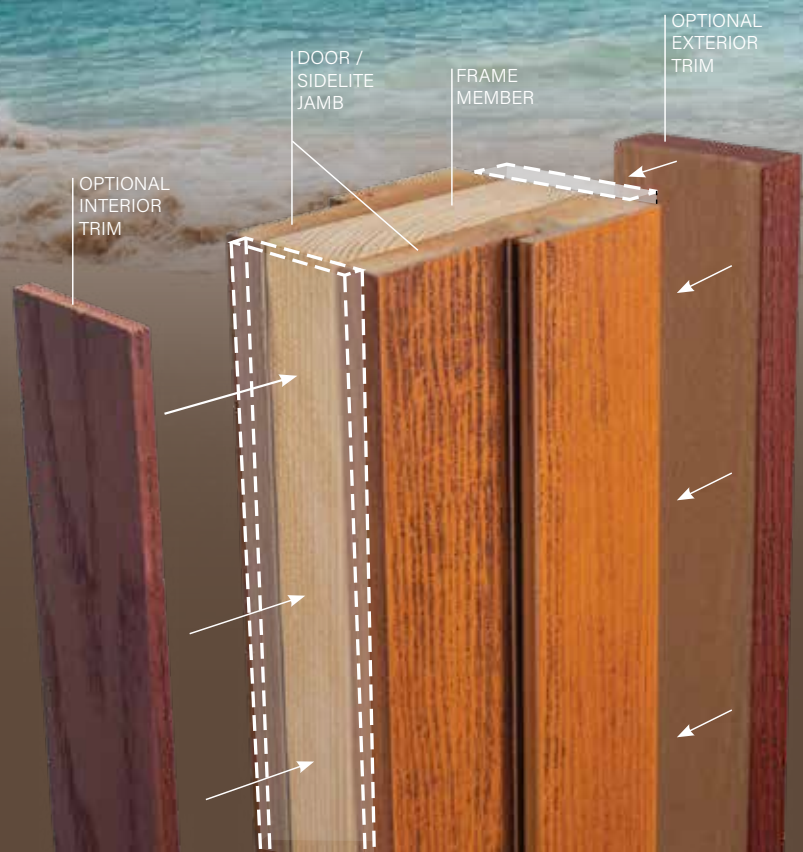

When used in areas requiring wind-borne debris protection, having the right product for your home is very important. That's why the engineering behind Wincore®'s select line of STORMFORCE Entry Systems provides you with peace of mind. With key features like composite frames, rugged hinges and laminated glass, entry door systems with our impact-resistant package enhancements can stand up to Mother Nature year after year.

- Laminated doorglass provides protection against damaging wind-borne debris.
- Aluminum doorlite frame provides the ultimate durability in extreme weather conditions.
- Door panel has an insulated polyurethane foam core and door skins in smooth and woodgrain textures.
- Composite frame system resists rot, decay and insects.
- Pre-hung in 4-9/16", 5-1/4", 6-9/16" and 7-1/4" composite frames.
- Rich stains and designer paint colors of choice add an even and beautiful finish.
- Schlage® residential single cylinder deadbolt and residential locksets are standard on 80" doors.
- Standard on 96" doors, Trilennium® multi-point hardware adds strength and increased security.

BOXED SIDELITES

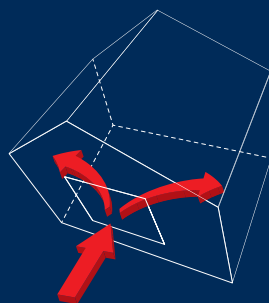

Impact-resistant Hinged Patio Doors and Doors with Sidelites incorporate "Boxed Sidelites" and each are shipped separately for field assembly in their individual openings. Interior and exterior trims can be used to cover the framing members separating the individual doors and sidelites. Both will be finished to complement the finish of the entry system.

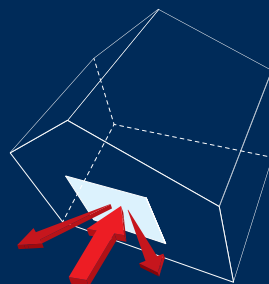

LAMINATED GLASS & IT'S IMPORTANCE

When it comes to impact-resistant doors, all components must work together to resist the catastrophic forces applied during severe weather. Similar to the glass used in car windshields and aircraft windows, the insulating glass features an impact-resistant PVB interlayer that is bonded between two pieces of glass under heat and pressure. The interlayer remains adhered to the glass fragments and resists penetration, even if the glass pane is broken – protecting against storms, flying debris and hurricane-force winds. In addition, laminated glass guards against forced entry – resisting repeated impacts from hammers, bricks or similar weapons. It also helps to control unwanted outside noise from entering the home and filters out 99% of the sun's most damaging rays that fade carpets and draperies.

During a storm, if a building is breached through a broken window or doorglass, wind may enter the structure and cause an increase in air pressure. This vacuum effect could lift the roof and collapse the walls. Laminated glass helps to preserve the building envelope, keeping the wind and other elements outside.

TURTLE GLASS

State and local ordinances protect hatchling turtles in U.S. coastal areas by limiting the brightness of inside-to-outside visible light transmittance. Selected styles of Impact-resistant fiberglass entry doors can include Turtle Glass (tinted grey glass) that meet these requirements.

BLINDS

Blinds on impact-resistant doors are located between the glass and are controlled by a single operating lever to Raise, Lower and Tilt. Available in White only.

DOOR + SIDELITE TEXTURES

Impact-resistant fiberglass entry doors and sidelites are available in Smooth and Oak Grain textures. You can choose the same paint or stain for both sides of your door, or pick different paints and stains for the interior and exterior.

Doors with a woodgrain (Oak Grain) texture can be stained or painted. Smooth textured doors are only available with a painted finish.

INTERIOR
(PAINTED)

EXTERIOR

INSTALLATION HOLE COVER STRIP

Color matched to the frame, the installation hole cover strip provides installers a method of hiding the installation fasteners when anchoring the door to an opening. This feature is standard on all impact-resistant doors.

TRILENNIUM®
MULTI-POINT LOCKING SYSTEMS

SOLID 6 PANEL DOOR IN SMOOTH / EGGPLANT. PEEPSITE, KNOCKER, MAIL SLOT, KICKPLATE, PLYMOUTH HANDLESET AND DEADBOLT IN SATIN NICKEL.

TIME TESTED HARDWARE FOR DURABILITY & BEAUTY.

- 100% forged brass construction for superior strength
- Nickel silver keys and cylinder pins ensure strength, durability and reliable operation
- 1/2" deadlatch throw with plunger that prevents latch 'force-back'
- Heavy-duty springs ensure 'droop-free' levers
- Pick-resistance T-pins make picking virtually impossible
- Maximum security deadbolts add protection (ANSI Grade 1)
- Lifetime mechanical and tarnish warranty available

PRODUCTS FOR RUSTIC DOORS ONLY

EXTREME WEATHER PET DOORS

- Flush Door Panels Only (No embossments on panel).
- 3-Flap System maximizes energy efficiency.
- Outer and inner flap are soft, flexible and UV resistant.
- Magnet bar across the bottom of both outer flaps seals to a floating threshold.
- The middle flap is an insulated foam.
- 3-1/2 times more energy efficient than many single-flap pet doors.
- Durable, paintable white plastic frame.
- Snap-on closing panel attaches on the interior or the exterior.
(It is not intended as a security device).

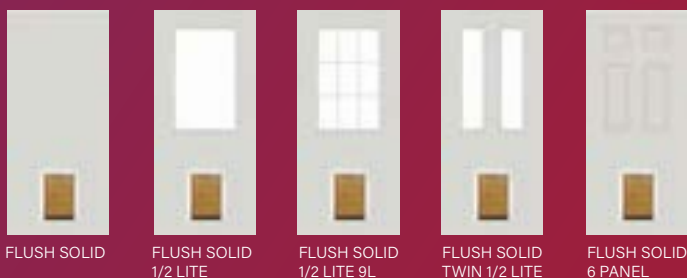

PET DOOR SIZING OPTIONS

	UP TO	FLAP OPENING SIZE
SMALL	15 LBS	5-1/8" X 8-1/4"
MEDIUM	50 LBS	8-1/8" X 12-1/2"
LARGE	100 LBS	10-1/8" X 16-1/4"

POPULAR STYLE OPTIONS FOR PET DOORS

OTHER STYLES AVAILABLE. CONTACT YOUR SALES REPRESENTATIVE FOR DETAILS.

FACTORY INSTALLED ON FLUSH DOORS ONLY.
DOORS WITH PET DOORS ARE NOT ENERGY STAR® CERTIFIED.

All components of the Pet Door Accessory are warranted against mechanical and finish defects for a five (5) year period from the date of installation.
WARNING: Wincore will not be liable for unintended use and the purchaser accepts full responsibility for oversight of the opening it creates.

Clear and decorative glass options available. Not all glass options available on all doors. Mail/Magazine Slot unavailable with Pet Doors.

Pet Doors available in flush panel ONLY.

SECURITY & PEACE OF MIND THAT ONLY TRILENNIUM® MULTI-POINT HARDWARE CAN PROVIDE.

Trilennium® multi-point hardware system provides more than just security. It offers homeowners better door closure and sealing than a single point lock. Three points latch and all three points deadbolt with a 1" throw. Deadbolts include anti-saw hardened steel pin. Includes 10-year warranty on finish, materials and workmanship.

TRILENNIUM®
MULTI-POINT LOCKING SYSTEMS

**STANDARD
ON 96" DOORS**
OPTIONAL ON 80"/84"

- Standard on 96" doors, optional on 80" and 84" doors.
- One solid unit with three latches.
- Patented I-Beam construction provides reliable, proven performance.
- Closing the door activates all three latches.
- When activated, each latch is a deadbolt.
- Each deadbolt activates with one movement of the thumbturn or key.
- Patented strike rollers ensure the door is in perfect alignment with the jamb for a tight seal.
- A downward turn of the lever acts as a panic release, and deactivates all deadbolts.

THE POWER OF COLLECTIVE THINKING.

In this business, everyone knows that great people working together end up providing great windows and doors. That's why when we set out to design and build the best windows and doors in the industry, we focused on people first. People with advanced technical knowledge. People who know how to do things right the first time. But most importantly, people who realize that integrity and trust are not simply words, but a way of life.

With more than 200 years of combined experience under our belts, you can clearly see our promise of quality and innovation in every window and door we make. Not to mention how we go about making them.

To us, it's about creating an environment that brings out the best in everyone, and accepts nothing less. It's about doing things the way they should be done, not necessarily the way they've always been done. It's about giving back to our communities and the things that matter most. And it's about family – ours, as well as yours.

At Wincore®, our philosophy is simple. It's not about being the biggest. It's about being the best.

Because to us, *That's the way it should be.™*
