SEROLOGY: Fa-Step COVID-19 antibody screening test

COVID-19 IgM.....NEGATIVE **NEGATIVE**
COVID-19 IgG.....NEGATIVE **NEGATIVE**

NOTE: The Fa-Step Covid-19 is an in vitro rapid qualitative procedure not reviewed by the FDA for the detection of antibodies(IgG/IgM) to Coronavirus(Covid-19) in human serum. Is authorized for use under the FDA Emergency Use Authorization. Test result is intended to aid in the diagnosis of presumptive Covid-19 infection but is a preliminary screening test and the final diagnosis should be based after examination with other qualified molecular assay(NAA). Negative result do not rule out Covid-19 infection particularly in those who have been in contact with the virus. Positive result may be due to past or present infection with non SARS-CoV-2 such as coronavirus HKU1,NL63, OC43 or 229E. **BY: RAPID CHROMATOGRAPHIC IMMUNOASSAY**

TEST PERFORMED BY: L:5593-WISM 9/19/2020 6:59 AM
 TEST VALIDATED BY: L:5593-WISM 9/19/2020 6:59 AM
