Do you realize that quality Newfoundlands from reputable breeders range from approximately \$1500 to \$2500:
**Please note, even BYB's (backyard breeders) and puppy millers also charge these prices and it is imperative to do your homework and ask for a copy of proof of health clearances on the parents of the litter, for hips, elbows, heart, patella, cystinuria, etc. especially if it is not listed in the database.
You should also inquire if the litter will be heart screened by a "Board certified Cardiologist" instead of a regular vet practitioner.

Are you on any breeder's waiting lists:

How soon are you ready to purchase a Newfoundland:
How long are you prepared to wait for a quality Newfie:

We appreciate your time in filling out our questionnaire. Due to the hundreds of inquiries nearly each day, we only entertain those who take the time to tell us about themselves and their family as we need this information to determine if one of our Newfs is a good match for your family and lifestyle.

We will get back with you as soon as we can but if you haven't heard from us in a week or so, please let us know as there might have been some glitch with email, etc.

Thanks again!
