Example Photos

This re-working of the 10E and 10ER Serial Number Data is Extensively Based on the original painstaking work by Skip Campbell, the Dean of the 10E and 10ER - Everett-

Serial = Numbers Only
Prefix = Letters In front of Numbers
E/ER = Model Number 10E, 10ER as Printed on the Circumference of the Badge itself

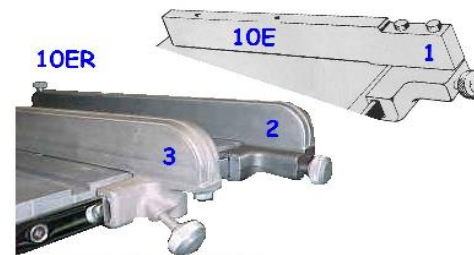

Sawgrd = slotted or solid

2 Piece Brass

Wedges = 2 for 2 Piece, 1 for 1 Piece, or 2 Brass for 2 Piece Brass

Plain or Wedged?

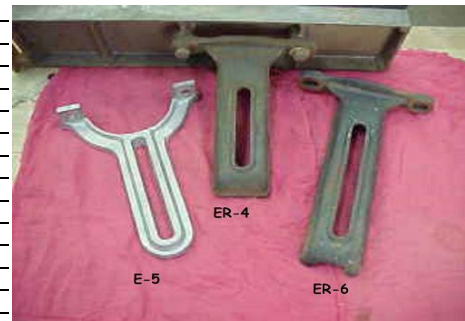

Fence = Horiz 1, Horiz 2, or Angled 3
If Fence type = Angled 3 it needs a suffix P or W see next photo

Example Photos

Angled Fence Lock can be one with Plain Screw (left) or With Wedge (right)
 Plain Screw = Angled/3P
 Wedged = Angled/3W
 The original survey just did Horizontal which is (1 & 2) or Angled which is (/3W or /3P)
 Those that are listed as Angled 3 could be either type - it was not stated only Angled

E = Original ER with wooden extension table
 E-4 = First 10ER extension table with short bracket
 E-6 = Later 10ER extension table with longer bracket

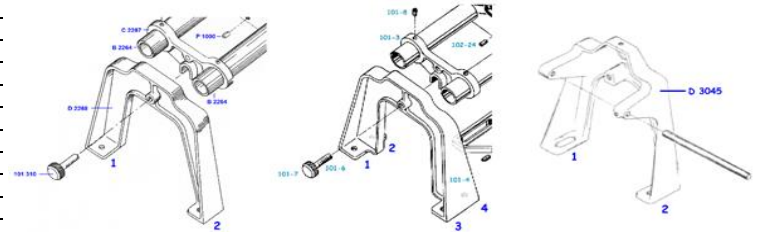

There was more confusion on the response for this

1/8 inch wall thickness Way Tubes opposed to 1/4 inch wall in original Thicker Tubes
 1/8 = (Y)es otherwise (N)o
