

No Work Days for 3 Weeks

No Work Days Until After LA Deployment

Here's What's Happening

We are on hold with volunteers until the Plumbing, Electrical & Framing inspections are passed. Then we wait for insulation to be installed, THEN we wait for drywall to be hung and then we wait for drywall texturing. In the midst of the "wait" 21 volunteers will spend a week in West Monroe, LA on deployment. When all this is behind us it will be full speed ahead with a sprint toward the finish line. Get some rest 'cause we will need all hands on deck in the middle of March.
