

THE PEACEFUL BEE CO.

OUR STORY

At age 5, Izzy was diagnosed with Autism, Sensory Processing Disorder, Dysphagia secondary to poor respiratory function, absence seizure disorder, apraxia of speech, negative food imprinting/feeding disorder, tongue thrust and other medical issues.

Now 10, and with the aid of an incredible medical team and his trusted Service Dog, Kozmo at his side, Izzy has progressed and improved beyond anyone's expectations....anyone's but his own.

Izzy has always had the mantra - "Say I can't, I'll show you I can".

As a way of fighting his negative food imprinting and sensory aversions, Izzy began to immerse himself in cooking at age 8. In the past two years his love of cooking has flourished, as has his love of being creative in the kitchen. However, his struggles with eating the food he prepares is still a mountain he must climb.

The Peaceful Bee Co. is a product of Izzy's love of cooking and his struggle with eating what he prepares. In creating sensory-sensitive products he can use, enjoy and share with others, he's found a way to

continue his passion of being in the kitchen, without the struggle of food being a constant pressure, all the while offering a product to others with sensory aversions, autism and ADHD related struggles, sensitive skin and skin issues. He's also made sure there's something for everyone, including the caregivers of so many exceptionally abled individuals.

"Do what you love in a way which brings peace to your soul".

Izzy has found his way and it's his time to share that with others.

Our mission for The Peaceful Bee Co. is to grow the business over the years until Izzy graduates high school and hope that with exceptional products and support from his followers, there will come a time where others who are specially abled can find a place of purpose and employment at The Peaceful Bee Co. We're excited about the journey, hopeful for the future, and trusting our faith, like the bee.

The bee defies physics as it takes flight. With such fragile, tiny wings, there is no obvious reason as to how the bee can fly. Physics tells us the bee takes flight by working harder, its wings fluttering so fast, it somehow manages to defy the odds, it overcomes its own limitations and shows us all that anything is possible if you work hard enough.

To follow the everyday life of Izzy and his service dog Kozmo, join us at The Adventures of Izzy & Kozmo on Facebook at: www.facebook.com/IzzyKozmo

Izzy is the son of veteran police officer, Sergeant Bervis Littles of the Edmond, OK Police Department and Melissa Littles, Founder of The Police Wife Life, LLC, National Legislative Law Enforcement Advocate, blogger and author of Bullets in the Washing Machine. Our family is built on faith in God, support of law enforcement, first responders and our military, the pursuit of autism awareness and unwavering loyalty to one another.
