HANGING INSTALLATION INSRUCTIONS

Hanging anything on the wall can give the best of us anxiety! Please see instructions below on how best to approach this task.

MoAH Meow was meant to hang as parallel to the wall without tilting:

- Use a nail with a **flat nail head** (your MoAH Meow needs a nail head to hold on to). Ensure the nail head will fit thru the hole in the bracket on the back of your product before nailing it into your wall.
- Nail should be approximately 1" - 1 ½" long
- Mark your desired spot on the wall with (2) two holes 2 ¹⁵/₁₆" inch apart. A wall molly may be used to your desire.
- Hammer nail all the way into the wall so nail head is 1/8" away from the wall, ensuring the tightest fit.
- Place the metal plaque over the nails then move down to secure into the smaller part of the holes.

• Back Side:

- Please only hang the magnetic planter pot, or magnet that holds keys, jewelry or small accessories up to 4 lbs.
