Medical history.

<p>Are you aware of any illnesses that run in your family? Please give details.</p>	
<p>Please give details of any major illnesses, previous operations or hospital admissions. (Can you provide dates if possible)</p>	

As a newly registered patient, we would like to offer you the opportunity to have a simple blood test for certain blood borne viruses (HIV, Hepatitis B and C). There are now effective treatments available for these viral infections, but you cannot benefit from this without the relevant diagnosis. It is estimated, for example, that up to 30% of cases of Hepatitis C in Scotland remain undiagnosed.

Should you wish to be tested for the above, please telephone the surgery 3-4 weeks after you register to arrange a nurse appointment.
