

# THE ULTREYA

## TRANSCENDENCE OF THE ENCOUNTER

With the calming effect provided by the realization that if Man does not depend on a higher authority, his life is meaningless; one can realize that the Ultreya is a living image and a clear representation of what we understand by the "purpose of life". **MAN IS BORN TO ENJOY ENCOUNTERING OTHER MEN AND TO MAKE OF HIS FREEDOM A CHALLENGE OF LOVE: (To Walk towards Christ).**

This in fact happens on Monday nights where the Ultreya takes place:

some men encounter others, whose purpose is to share the dynamic experience of the joy of having faith. It is for sharing the restlessness. It's not for making doctrinal-type treaties. It is not about interpreting texts, nor divine precepts; which could make someone think it is not possible, to implement a process of faith in this way.

## WEALTH OF DIVERSITY

The idea is to pierce the heart of a person who one day knew of GOD and immersed in this wonder, realized that he was hidden behind the flesh of man, and that it was all Him to the depths of his being – the being of his person-. It consists in discovering Christ who resides in the heart of the neighbor when a climate of friendship is created, which is the best way of relating that man can experience.

But it does not end here: It is not satisfied with being a mere event. By this I mean that the spark that is caused when two men collide and it is produced, is not deserving of all the merit, for the continuous current of joy between them. In other words, it is not the spark itself but the light that the spark provides.

## THEOLOGICAL NEED OR REASON

The encounter in this way takes on another dimension, for nothing more and nothing less than because it provokes a hunger for Christ. And then one knows that light is not a cluster of sparks, as life is not a cluster of events; and that claim is only possible from the awareness that we are passing through here. We are all beings in GOD, God is the substance of life and we are pure and mere participations in the life of GOD, and therefore we men can consider ourselves as part of the substance of life. By this I mean that man can only reach his fullness from the conscious and constant feeling of God.

## **MENTALITY**

We cannot live independent or oblivious to the meaning of the life of Jesus. Because he is the life of our life and the bliss of our bliss. And this is for me, the true revelation of GOD TO MANKIND:

By way of necessity: Where is the meaning of Jesus? In the GOSPEL. Well, in the ULTREYA one does not learn to read the Gospel always during life but rather one learns to read the Gospel of always, in the dynamics and spontaneity of life, that in its pure written content never ceases to be refreshing and an essential source of life.
