

## airCentric™ 2

Be cool. Be comfortable.  
Be productive.

ergoCentric®

# Airflow technology that works harder for you.

Inspired by the breathability of mesh task chairs, the airCentric 2 combines the airflow inherent in mesh seating with the proven ergonomics of ergoCentric's foam and fabric seating for a truly comfortable seating experience.

With 66 honeycomb cells, the back foam is designed for ventilation. Vents in the back cap allow continuous airflow through the entire back structure.

## Airflow fabric

Maximize the airCentric's airflow capabilities by choosing Air Knit fabric. This durable, three-dimensional fabric provides optimal breathability while its cushioned softness offers long lasting comfort.

# Upgraded comfort

The airCentric 2 combines innovative airflow engineering, 30 years of proven ergonomic design, patented technologies and new materials to keep you cool and comfortable.

## **Airflow innovation**

The airCentric 2 offers a new, softer, molded back foam cushion. Though softer, it is highly durable and stands up to the test of years of continuous use without losing load-bearing capabilities, shape or dimensions. The molded foam provides long lasting lateral and lumbar support while allowing air to flow through the honeycomb rib design of the internal back structure.

## **Upgraded appearance**

The airCentric 2 has the same number of air holes as the original; however, the addition of a layer of breathable material renders the holes invisible, improving the aesthetic of the airCentric without compromising air flow. The airCentric 2S, with a solid back cap, is also available and desirable in areas that have stringent cleaning requirements.

## **Arm options**

Designed from top to bottom by ergoCentric, the tCentric armrest provides unparalleled support. The patent-pending tCentric armrest is silent, smooth gliding and available with 3 levels of adjustability—vertical, lateral and patented 360° swivel—ensuring the ability to maintain a neutral typing, texting or reading position. The tCentric armrest dramatically reduces stress on the shoulders and neck.

## ergoCentric®

### Mission

ergoCentric's mission is to design and manufacture the best ergonomic seating in the world. This mission is supported by two guiding principles, the assurance that the task chair properly fits the individual using it, and by ensuring the lowest possible cost of ownership over the full life of the chair.

### Full Adjustability

Many of our adjustment features are unique to ergoCentric and were created in response to our customers' needs. Full adjustability is necessary to achieve a healthy workplace. Let us show you why.

### Planet

We are committed to reducing our impact on the environment by regularly reviewing quality and environmental objectives and targets. We believe that preservation of the environment is one of the most important issues facing the furniture industry today, and we have made environmental awareness an integral part of our corporate culture. All ergoCentric seating is GREENGUARD Gold certified and are compliant with the BIFMA X7.1 standard and BIFMA e3 credits 7.6.1, 7.6.2, and 7.6.3.
