Panoramic doors are looking good. Looks like several of the garage roof trusses are damaged/ broken.

Email to Liscott after they built the garage with broken trusses and didn't notify us. Liscott stated they would make appropriate repairs. They never did.

Part of working in the snow and dozen ground they will be repaired and corrected. Not much to do when the entire bunk is frozen to the ground. We are aware and will not be an issue moving forward with garage construction.

We cannot let the county pile 6' of snow in the drive like that again, turns to a block of ice! Need to make sure we have someone lined up for snow removal moving forward. Hopefully Weather stays good for a few days so and we can get all cleaned up before the next storm.

Thanks,

Rob Cowley
