Pro Series

E900 WHEEL BALANCER

The Coats ProBalance™ E900 is a high performing direct drive wheel balancer with new diagnostic ProMatch Technology. It's up to 10x faster than non-direct drive balancers, and the only premium wheel balancer on the market today with a 10-year warranty on the motor.

IT'S YOUR MODERN WORKHORSE

With ProMatch and ProBalance Technology®

Advanced Technology, Including ProMatch

In combination with direct drive technology, **ProMatch Technology** and a diagnostic roller are used to measure and address vibrations from wheel assembly shape without having to take it out on the road to test. ProMatch guides techs through a simple process to identify and reduce correctable runout. The result is a smoother ride and fewer customer returns for rework.

Smart Design, Ultimate Usability

Hundreds of hours of tech feedback led us to the E900 touchscreen interface that's designed for comfort and maximum productivity. It streamlines data collection, reducing manual input needed before lowering the hood.

Serviceability

Add a suite of accessories and preventive maintenance to extend the useful life of your ProBalance™ E900 wheel balancer and reduce unplanned downtime by more than 20%.
