Ocean[®] Clean Water Treatment GmbH

Oily Water Separator "Ocean Clean® EB"

The OWS "Ocean Clean® EB" are three stage separating systems (gravity, coalescence, filter) and are available with a capacity between 0.25 to 5.0 m³/h. It is a complete Ocean Clean in house development and design..

The Advantages

- Compact design
- System pump is located in front of the separator, i.e. no restriction concerning the suction height
- No cyclically draining, only if oil is detected by conductive measurement
- Coalescer is self-cleaned by backwashing when oil is detected
- Type approved by BG Verkehr acc. to IMO-Resolution MEPC 107 (49)
- Customized solutions are available on request

Selection of OWS dimensions – other sizes are available on request

Type	Length	Width	Height	Weight dry	Weight wet	Capacity
0.25 EB	1200 mm	800 mm	1350 mm	285 kg	445 kg	0.25 m ³ /h
0.5 EB	1200 mm	800 mm	1350 mm	290 kg	450 kg	0.5 m ³ /h
1.0 EB	1500 mm	800 mm	1350 mm	477 kg	620 kg	1.0 m ³ /h
2.5 EB	1800 mm	1100 mm	1350 mm	751 kg	1100 kg	2.5 m ³ /h
5.0 EB	2000 mm	1300 mm	1650 mm	1000 kg	2110 kg	5.0 m ³ /h
