

WHAT IS MICRONEEDLING PHIBRIGHT?

Microneedling is a very efficient and minimally invasive treatment used to rejuvenate the skin of face and body. The procedure is aimed at stimulating microcirculation and the natural processes of collagen production and regeneration, using fine needles to create hundreds of tiny, invisible puncture wounds in the top layer of skin. The primary appeal of Microneedling is its ability to stimulate growth of collagen and elastin, which is the key to new, youthful looking skin. Micro needles penetrate the skin and the procedure is considered to be painless.

PhiBright Set with 15 different serums allows you to create personalized cocktail for each client according to the skin type, skin condition and different skin problems such as acne, scars, hyperpigmentation, dark circles etc.

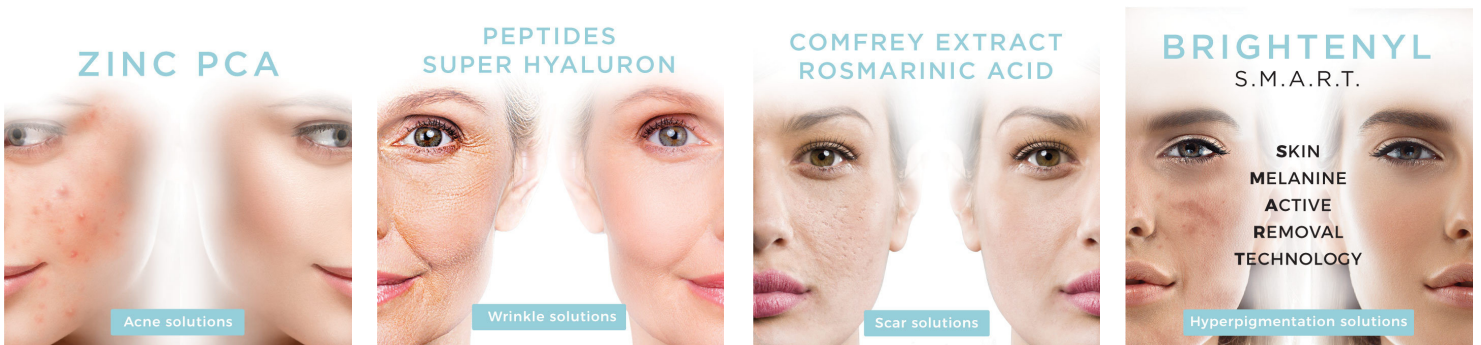

This serum applied by the needling technique accomplishes exactly what the skin needs most - deep nourishment and long-term stimulation of natural regenerative abilities.

Due to its soothing properties, this serum is even suitable for sensitive skin prone to redness.

The result is even and radiant complexion, healthy skin, without the use of harmful ingredients.

With the help of a PhiBright calculator, give your client the cocktail needed by his skin in less than 3 seconds.

There are numerous effects of the treatment such as **reducing wrinkles, improving skin texture and tone, reducing enlarged pores, improving skin structure and rejuvenation, alleviation of acne scars and other types of scars, reducing melasma and hyperpigmentation, reducing stretch marks, stimulation of hair growth and visible improvement in the case of alopecia.**

ONLINE TRAINING

Microneedling Online Education is for someone who wants to specialize in microneedling but cannot participate in live training. During the online education system, each student gets full access to all lectures and videos throughout our specialized CraftMaster application for 3 months and will be mentored and supported by our Master Maja Cvijetic. After watching our training videos, you need to pass 8 levels to receive your Microneedling Phibright Artist certificate. The levels you pass, are uploaded photos of your models before and immediately after Microneedling treatment. Our Master Maja Cvijetic, will be with you to guide you for 3 months. You work at your own space, and can finish the course sooner than 3 months. After successfully completing 8 levels, you will be awarded the title of Microneedling Phibright Artist and will receive your logo and certificate.

• After Philings Mask	10 pieces	• Microneedling Hair Growth Serum	5 pieces

WHAT IS THE DIFFERENCE BETWEEN THE TWO MACHINES?

Simplicity Artist **VS** Simplicity Master

Simplicity Artist is primarily intended for beginners and students at the academy, while Simplicity Master has a purpose to be used by experienced beauticians and dermatologists. Why? The difference between the two machines is the engine, the Simplicity Master engine is more powerful than the Artist, and it delivers more power, which also makes it a great option when working on tough skin, usually scar tissues or for paramedical use too. This is why it is intended for more experienced beauticians and dermatologists that perform high usage amounts of work daily, for various both basic and advanced procedures. On the other hand, some people have no need of this, as they are still beginners and use the machine periodically for only basic services. This is when Simplicity Artist is a great choice.

They are both very easy to handle, as the pen is very light to hold in the hand, which also makes the machines very travel friendly. Minimum noise, the noise has been deled with less than 15 dB, which makes it the most silent machine on the market with the least vibration.

You can use these machines for: lips pmu, eyeliner, shading technique, removal, scalp micropigmentation, microneedling, areola micropigmentation etc. These machines use ultra-precise cartridges.
