Example vaccine card

This is what we love to see a vaccine card to look like. If you are planning on going travelling with your pet, when you get your rabies vaccine please feel free to take this to your vets and explain you would like your vaccine card filled out in this format.

We currently do not offer Rabies vaccines but your current vets will do. It is very important that it states when the rabies is valid from and till

Your first Rabies vaccine is not valid until 21 days after the injection so bare this in mind when planning your holiday.
