1. ABOUT DALDAL WALLET

DALDAL WALLET is a FINL account management tool that connects to the FINLCHAIN through a web browser and mobile app. DALDAL WALLET can be used on both the Mainnet and Testnet (Halla) of FINLCHAIN.

2. HOW TO USE DALDAL WALLET

2.1 Are you new to DALDAL WALLET?

Create Key

Password **STEP 1-2**

10~20 A-Z, a-z, numbers, !, @, \$, %, ^, ~, *, +, =, -, _

Seed sentence **STEP 1-3** **AUTO**

input your seed sentence
or you can generate mnemonic with
'AUTO' button.

0/500 **COPY**

STEP 1-4

Create Key

2.1.1 Step 1. Create a Key

You need a Key File to make and use a wallet, the account of the FINLCHAIN.

A Key File is a json file that contains a pair of private key and public key.

When you lost your Key File, you can **RESTORE** Key File by following steps

below again with the same password and seed sentence.

STEP 1 -1. Click the [Create Key] button.

STEP 1 -2. Enter your password.

Your password must fit to the format: 8 – 20 capital and small letters of English alphabets, numbers, and special symbols(!, @, \$, ^, ~, *, +, =, +, -).
You have to combine the password by using at least one of those.

STEP 1 -3. Enter your seed sentence.

You can write down your own seed sentence.
You have to type 20 – 500 capital or small letters of English alphabets.
Or you can create a seed sentence with mnemonic phrase(24 words)
automatically by pressing [AUTO].

STEP 1 -4. Press [Create Key]. You can download a Key File.

Please keep your Key File safe. Also you **MUST REMEMBER** the password and the seed sentence. If you forgot the password and the seed sentences, you **CANNOT** restore the Key File. It means that you **CANNOT** use your wallet.

DALDAL WALLET MANUAL

Create Wallet

Wallet Name **STEP 2-2**

4-16, CAPITAL ALPHABETS, NUMBERS, _

Key **STEP 2-3**

submit

STEP 3-5
Create Key

2.2 Welcome back to DALDAL WALLET.

If you already have the wallet of FINLCHAIN, you can use it again with the below steps.

- STEP 3 -1.** Press the [Import Wallet] button.
- STEP 3 -2.** Enter a wallet name you made before.
- STEP 3 -3.** Upload the Key File you used to make the wallet before. If you lost the Key File, go back to Step 1.
- STEP 3 -4.** Enter the password that you entered on Step 1-2.
- STEP 3 -5.** If the entered password is correct, you can now press the [Import Wallet] button.

3. FEATURES OF DALDAL WALLET

3.1.1 Import

You can use Multi-Wallet with DALDAL.

That means if you have made multiple wallets of FINLCHAIN, you can use those together with DALDAL WALLET.

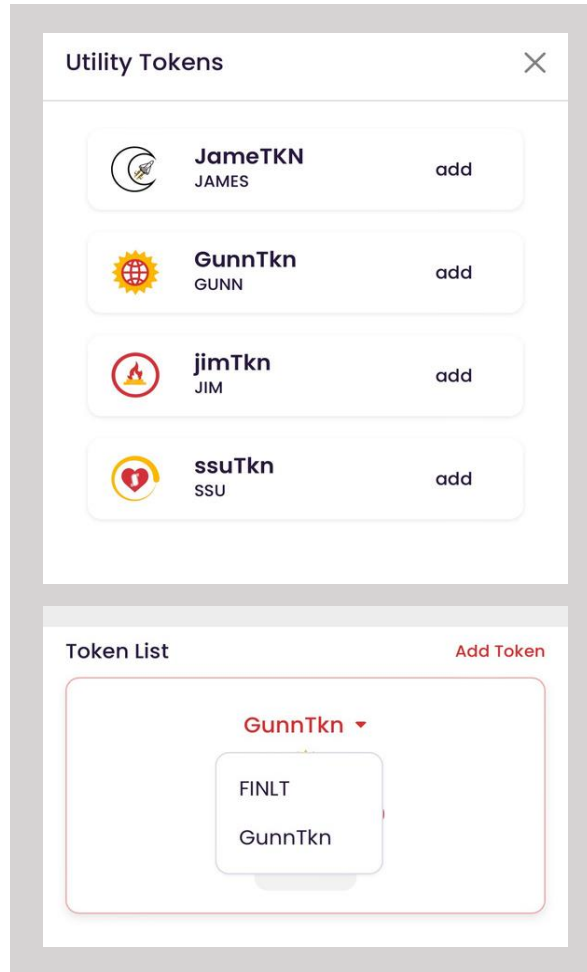

If you import another wallet, you can use that one too.

You can change the wallet by choosing the one of the wallets.

3.1.2 Disconnect

If you decide to do not use the wallet anymore, you can easily disconnect the wallet with the button.

Don't be afraid to make a decision. You can import it again if you still have the Key File and remember the password of disconnected wallet.

3.2 Token List

3.2.1 Add Token

You can add/delete Utility Tokens of FINLCHAIN to/from your wallet.

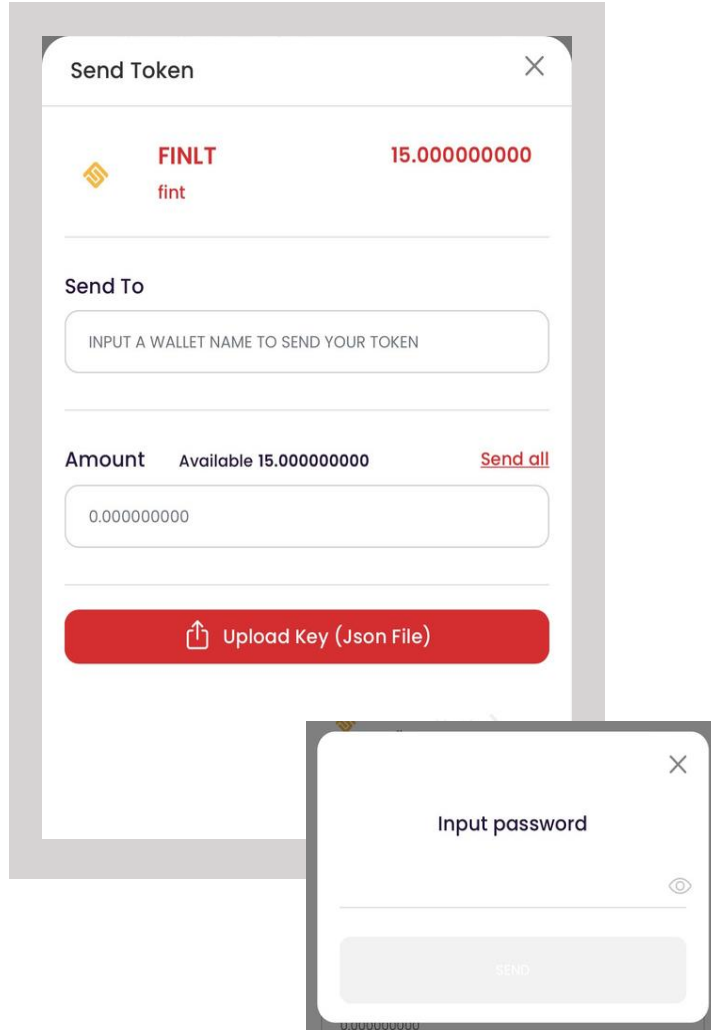

Press the [Add Token], then you can see the list of Utility Tokens.

Press the [add] what you want to add to your wallet.

You can also [delete] the Token from the wallet.

Don't worry. Your balance of Token and the history of transactions are still remain within the FINLCHAIN.

You can change the Token by selecting the Token name from the list.

3.2.3 Send

You can transmit tokens, if you have some amounts of tokens.

- Press the [Send].
- Enter the Send To.

You have to write the wallet name that you want to send the Token.

If you have already imported your another wallet, you can select it from the list.

Or you can also enter the other user's wallet name that exists on the Halla.

- Enter the Amount.

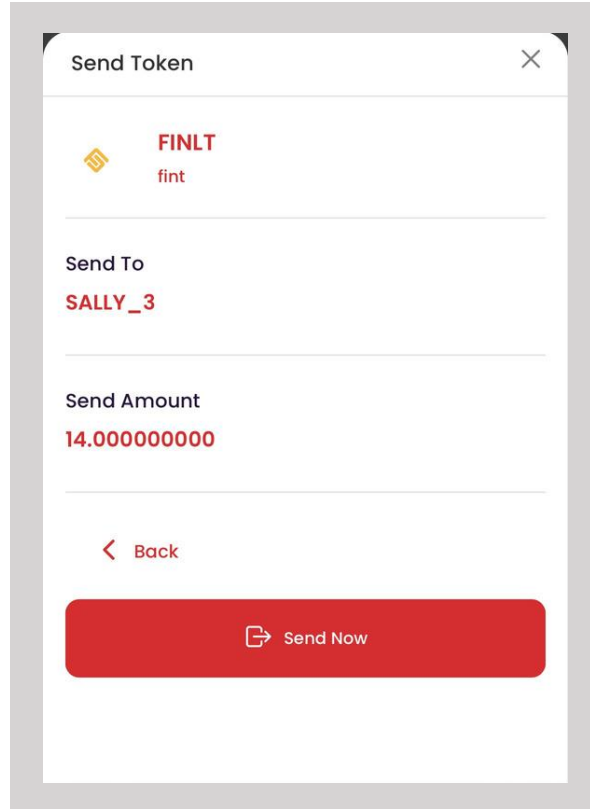

You have to decide how much you want to send. You can easily set to send the whole of your balance by press [Send all].

- Upload Key File.

You have to upload the Key File of the wallet to make a signature of smart contract.

- Enter the password.

When the entered password is proper, you can move on Next.

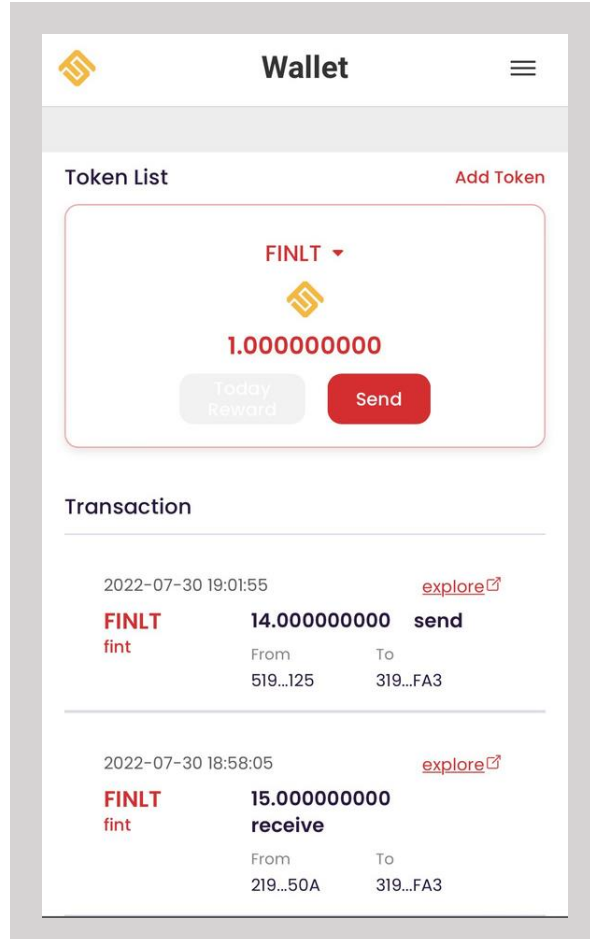

3.2.3 Send

Check your inputs before you make a transaction.

When you sure about your decision, press [Send Now].

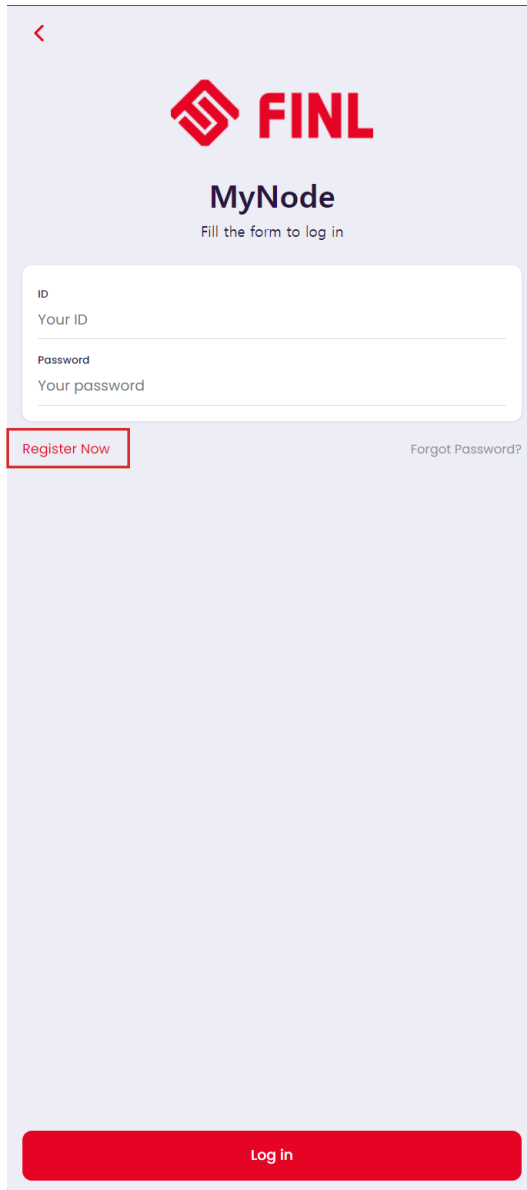

If you want to change something, you can press [Back] to make it.

3.3 Transaction

You can check the history of the recent 10 transfers of the Token.

You can move to the FINLSCAN of Halla to check the details of the smart contract by press [explore].

The screenshot shows a mobile application interface for MyNode. At the top left is a red back arrow. The header features the FINL logo (a red square with a white geometric pattern) and the text "FINL" in red. Below the logo, "MyNode" is written in bold black, followed by the instruction "Fill the form to log in" in a smaller font. A white form contains two input fields: "ID" with the placeholder "Your ID" and "Password" with the placeholder "Your password". Below the form, there is a red-bordered button labeled "Register Now" and a link "Forgot Password?". At the bottom of the screen is a red button labeled "Log in".
