How DeFi Is Reinventing The World's Financial System

Richard Ma Forbes Councils Member
Forbes Technology Council COUNCIL POST | Paid Program
Innovation

Richard is the CEO of [Quantstamp](#) and a leader in blockchain and smart contract enterprise security.

Decentralized finance (DeFi) is a rapidly growing trend in finance, taking components of traditional finance and transforming them into trustless and transparent protocols via smart contracts and tokens. In December 2019, the DeFi ecosystem had \$700 million worth of digital assets locked in its financial products. Recently, this number surpassed \$3.6 billion.

The appeal of DeFi is clear: access to a borderless, open alternative to every financial service imaginable — savings accounts, insurance, loans, trading and more. Decentralized apps, or “dApps,” run on the blockchain and eliminate the need for a central authority like in

The future of virtual asset securities will soon be “IM-EXCHANGE”

☑ Shared trading with Binance
→ Share Global Liquidity with USDT Market Transactions

☑ HFT(High Frequency Trading)
→ Process 1 million concurrent cases per second

☑ High utilization of coins
→ Easy to link and expand various O2O markets

☑ Equity structure similar to stock trading
→ Increase the convenience of transaction units

☑ Provide Asset Growth Program
→ Increase assets through the DeFi Interest Program

Key Features_Asset transfer and Set CMA

interest program

Provide easy and convenient asset movement and interest programs.

Introduce a new concept of digital exchange rate conversion and a CMA interest program in the Linked-Profit format of virtual assets

CMA Setup Caution Guide

The crypto-asset interest program can be set to [staking], [fixing] and [parking] as benefits to customers.

Depending on the setting, a mid-term repayment fee may be incurred and no principal loss will occur due to the program setting.

After selecting a Staking/Fixing/Parking program, converting funds to BTC/ETH takes 48 to 72 hours

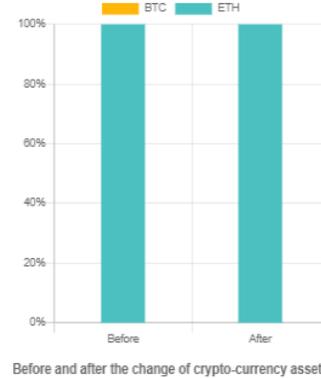

The reason for this is that BTC/ETH is an asset that moves in real-time through trust services in conjunction with Altcoin-affiliated crypto/encryption assets and global financial programs.

In this process, if the asset is recovered to BTC/ETH again, a certain settlement time is required due to a change in exchange rate.

Cryptocurrency → Transactionable assets

Virtual asset exchange and increased ease of trade

Asset type	Evaluation amount(USD)	Transactional assets(USD)
	≈ 0.000000	Deposit(Conversion amount * 10%) ≈ 0
BTC	0%	Transactional assets(Conversion amount * 90%) ≈ 0
		Conversion amount by asset ≈ 0
	≈ 103,224.354651	Deposit(Conversion amount * 10%) ≈ 0
ETH	0%	Transactional assets(Conversion amount * 90%) ≈ 0
		Conversion amount by asset ≈ 0
		Deposit ≈ 0.000000
Total		Transactional assets ≈ 0.000000
		Conversion amount ≈ 0.000000

Competitive with key technologies

✓ High Frequency Transaction Network Configuration
→ Base PoP Network Transit(10G)

✓ Big Data Analysis and AI
→ Differentiated Dividend Services and DeFi Trading

✓ Powerful crypto wallet security on based whitelist
→ whitelist-based key management

✓ Interworking with various services such as BOA card and GPointMarket
→ High utilization of cryptocurrency in real life
