Insert the 3 visuals into the back of the sleeve, and simply flip your card front and back for Double Power.

Dear Mahjong enthusiasts, My name is Raoul Gueguen, a passionate Mahjong lover. A few months ago, when I discovered our amazing game. I struggled to quickly read the densely packed information on the Mahjong 2025 card. Determined to enhance my gameplay and expedite my turns, I embarked on a journey to create visual simplifications on a few separate custom inserts. As I rapidly improved my gameplay and began scoring a good number of “Mahjong!” my friends grew curious and wanted to learn more about my new visual system. So, I color-printed this visual enhancements on sturdy card stock and handed them out with an open mind. I invited them to try them out and to give me feedbacks for improvement. They embraced the changes, loved their improved experience, and soon requested additional sets to share with their friends. And so, our Mahjong journey is on! With a full quarter left to enjoy playing the 2025 card, we all eagerly anticipate the arrival of the 2026 version.

Thank you for your help, Mahj Regards, Raoul Gueguen tacticalvisiongames@gmail.com

Here are some of the benefits provided by the new high-visualization inserts

1. Shorter lines: Better representations mean faster scanning!
 - a. The sequence 'FFFF' is now a concise $\square F$ where the square \square indicates '4 each.'
 - b. The sequence '222' is changed into the brief $\Delta 2$, with the triangle Δ representing '3 each.'
 - c. A large line as '222 0000 222 5555' becomes much easier to visualize ' $\Delta 2 \square 0 \Delta 2 \square 5$ '.
2. The 13 easiest hands opened to jokers are listed in orange for quick reference.
3. All singles and their combinations are underlined as critical since jokers are not allowed!
Now easier to spot, we can try to avoid these singles unless they are dealt to us early in the game.
4. The Δ , \square logos are easy to locate throughout the card, making it faster to identify opponents' partly exposed hands and avoid risky discards.
5. The easier hands comparison help streamline Charleston turns, making them quicker, more accurate.
6. When you need to change hand based on exposures and past discards, the new high-visualization makes it a breeze to pivot.
7. The quick flipping of the Mahjong card from front to back provides a convenient way to keep hidden notes and visit the less often used QUINTS, SINGLES, PAIRS or any concealed hand when needed.
8. These customized inserts make a thoughtful novelty gift for your friends anywhere!

Plus, the line numbers are clearly shown to make it a breeze to pivot! "MAHJONG!" 😊

Etsy

1 set of 3 inserts
\$10

Note: We still have a quarter to play the 2025 inserts. The new 2026 inserts will be ready by late March.
