

Lindy Lewis - After three months of immersion and observation as secretary of the current Mountain Springs water Board, I would like to volunteer my services for the Board of Directors. My greatest strength to this board is my background in Non-profit work, running efficient and effective meetings coordinating projects discussed, divided tasks and follow up accountability for board. In addition, my experience focuses on team building, creating a supportive and cohesive board that works in **collaboration** with the operations team.

The official 'water experience' I bring is that I cherish this precious resource and am grateful every day for how delicious MSW is. I also believe we need to approach the next up level to the board with a more proactive approach, rather than the current reactive, combative approach. Lastly, I believe a woman is needed on the board to offer a different perspective - women tend to bring a softer side to tension and friction.

I am grateful with the interest to serve on the board, and I would give it my best should you consider me for one of the board positions.
