

## Robert Gumerman — Bio

Robert Gumerman received his PhD in Civil Engineering from the University of Washington in 1968 with water and wastewater his specialty. He worked his entire 42-year career in the field of water and wastewater, principally as a consulting engineer, and for the last eleven years of his career as General Manager of the Moulton Niguel Water District in Orange County, California. This District provided water/sewer/recycled water services to approximately 200,000 people and had an annual budget of about \$80 million.

During his career as a consulting engineer, he worked on water/wastewater projects throughout the Western United States. He specialized in planning and preliminary design of projects, and performed several asset management studies, which are the best method available to determine the appropriate level of reserves for a water/wastewater district.

Bob is a member of Mountain Springs Water Corporation and lived on Pierce Lane for the past 20 years.
