

agglomeration of thick blocks of vivid color, and at the next coalesces into an image of athletes running full tilt.

Even at the end of his life, as

Emile Bernard and the Cloisonnists. In sketches such as "The Fort Carre at Antibes" his work resembles Bouidin's.

He was also, in his love of color, a natural heir to Matisse, and, in his enthusiasm for the sensuousness of paint, a follower of Braque, who in turn became one of his admirers. As a painter, in other

But even when his palette becomes most extreme, there is a refinement to de Stael's imagery, as if he could not escape his own aristocracy, in this case an aristocracy not of birth but of attitude. de Stael may not have been a very great artist, but even his minor works exude a rapture with the craft and tradition of painting that is scarce nowadays.
