

Route to market strategy

Scope of work

- Review of options including: FiT, CPPA, PPA, dynamic price hedging, hydrogen production, mixed strategy
- Supply curve of power under PPAs and CPPAs from offshore wind projects
- Demand curve for CPPAs by customer type / credit quality
- Key market CPPA terms: term, price, offtake profile, indexation, etc

Deliverables

- Overview of key generators and CPPA customers, market structure and bankability
- Indicative CPPA terms
- Delivery road map including recommended route to market

Resources

- We can input into technical analysis including transmission costs and availability, and costs for competing CPPAs
- The project budget and resourcing will be agreed along with the scope of work and the precise deliverables
