

Environmental Policy Statement

General

Sky Lakes Wilderness Adventures is completely committed to ensuring that all activities undertaken by the organization are carried out with due regard for any potential environmental impact from our services our product we may provide. Our Leadership Team acknowledges that it has a duty in meeting the policy requirements set here within and are fully committed to providing time and resources available in achieving and maintaining environmental policy goals focused on higher environmental sustainability in all we do.

Environmental Compliance

Sky Lakes Wilderness Adventures has adopted this Policy, as a declaration of our commitment to provide our services and products in all our activities, with due regard to the environment, and in a manner which considers the nature of our operations and environmental impacts (potential or actual) and will always conduct activities in a manner that ensures environmental sustainability for the environment.

Legislative Compliance

Sky Lakes Wilderness Adventures will monitor for changes and abide by all applicable environmental Legislation, statutory authoritative guidelines, and relevant standards within our industry, always.

Continual Improvement

Sky Lakes Wilderness Adventures is committed to ensuring that the potential to affect the environment, is a consideration of everything we do. This is achieved while continuing to develop new activities and methods and the adoption of potential new products or technologies while continually improving mitigating the affects (actual or potential) our operations may have on the environment. This commitment is dedicated towards higher standards of operation to enhance our environmental performance.

Minimizing Environmental Impact

Sky Lake Wilderness Adventures recognizes that activities cannot be undertaken without impact on the environment, be this positive or negative. All activities will be subject to on-going review and will be controlled to minimize any risk affecting the environment.

Protection of The Environment

Sky Lakes Wilderness Adventures will take positive action relating to relevant environmental issues, to preserve, and wherever possible, to enhance the environment. Specifically, we will continually strive to reduce waste, reduce energy consumption, negate polluting affects to ensure that the environment, and the potential for impacts, is a consideration in all that we do.

Communication and Information

Sky Lakes Wilderness Adventures ensures that this policy is effectively communicated to ALL personnel within the business, to ensure that they are fully aware with, and able to assist in meeting the goals and requirements within this document. This policy is available to all interested parties. This policy will be subject to review and amended as needed to continually meet our commitment to high environmental standards.
