

03 Food safety and nutrition procedures

03.1 Food preparation, storage and purchase

General

- All staff have up to date certificated training on food safety who prepare/ serve and cook food in the kitchen.
- Cooks refer to Eat Better, Start Better (Action for Children 2017) and Example menus for early years settings in England (PHE 2017) which contains guidance on menu planning, food safety, managing food allergies and reading food labels.
- The setting manager is responsible for ensuring that the requirements in Safer Food Better Business are implemented.
- Cooks and all staff responsible for preparing food have undertaken the Food Allergy Online Training CPD module available at <http://allergytraining.food.gov.uk/>.
- The setting manager is responsible for overseeing the work of the cook and all food handlers to ensure hygiene and allergy procedures are complied with.
- The setting manager has responsibility for conducting risk assessment based on the 'Hazard Analysis and Critical Control Point' method set out in Safer Food Better Business.
- Cooks carry out and record daily opening/closing checks, four weekly reviews and dated records of deep cleaning.
- The cook and setting manager maintain a Food Allergy and Dietary Needs folder with:
 - a list of all children with known food allergies or dietary needs updated at least once a term (the personal/medical details about the allergy or dietary needs remain in the child's file along with a copy of the risk assessment). This is clearly displayed for all staff in the kitchen and in the room the children eats/ attends sessions. The risk assessment shared with all staff.
 - a record of food menus along with any allergens using
 - a copy of the FSA booklet 'Allergen information for loose foods' available at www.food.gov.uk/sites/default/files/media/document/loosefoodsleaflet.pdf
 - a copy of the Food Allergy Online Training CPD certificate for the cook and each member of staff that has undertaken the training
- The setting manager is responsible for informing the owners/trustees/directors who then reports to Ofsted any food poisoning affecting two or more children looked after on the premises. Notification must be made as soon as possible and within 14 days of the incident.

Purchasing and storing food

- Food is purchased from reputable suppliers.

- Pre-packed food (any food or ingredient that is made by one business and sold by another such as a retailer or caterer) is checked for allergen ingredients and this information is communicated to parents alongside menu information. For example, a meat pie bought at a supermarket or a tin of baked beans or the ingredients for a recipe prepared on site or by our catering company.
- If food that is not pre-packed (described as 'loose food'), such as sandwiches bought from a bakery is served, then allergen information will have been provided by the retailer, this information must then be shared in the same way with parents.
- Parents are not to bring food that contain nuts. Staff check packets to make sure they do not contain nuts or nut products.
- Bulk buy is avoided where food may go out of date before use.
- All opened dried food stuffs are stored in airtight containers.
- Dried packaged food is not decanted from packaging into large bins or containers as this prevents monitoring of sell by/use by dates and allergen information unless this is used clearly monitored and only topped up when a new box is opened, with a fresh label.
- Food is regularly checked for sell by/use by dates and any expired items are discarded.
- Bottles and jars are cleaned before returning to the cupboards.
- 'Squeezy' plastic bottles are not used for sauces.
- Items are not stored on the floor; floors are kept clear so they can be easily swept.
- Fruit and easily perishable vegetables are kept in the fridge at 1- 5 Celsius.
- Packaged frozen food should be used by use by dates.
- Food left over should not be frozen unless it has been prepared for freezing, such as home-made bread or stews. Hot food should be left to cool for up to 1.5 hours and then quickly frozen.
- Freezer containers should be labelled, dated and used within 1-3 months.
- Fridge and freezer thermometers should be in place. Recommended temperatures for fridge 37 degrees Fahrenheit (3 degrees Celsius), and freezers 0 degrees Fahrenheit (-18 degrees Celsius). Temperatures must be checked and recorded daily to ensure correct temperatures are being maintained.
- Freezers are defrosted according to the manufacturer's instructions.
- Meat/fish is stored on lower shelves and in drip-free dishes.
- Fruit and vegetables stored in the fridge are washed thoroughly before refrigeration to reduce risk of pests and E.coli contamination.
- Staff's own food or drink is kept in separate designated area of the fridge; in the staff room to avoid mix ups.
- Items in fridges must be regularly checked to ensure they are not past use by dates.

Preparation of food

- Food handlers must check the content of food/packets to ensure they do not contain allergens.
- Food allergens must be identified on the menus and displayed for parents on our Family app.
- Food handlers wash hands and cover any cuts or abrasions before handling food.
- Separate boards and knives are used for chopping food, these are colour coded.
- Raw and cooked foods are prepared separately.
- Meat and fish should be washed and patted dry with paper towels. This does not include chicken which must not be washed because of the risk of campylobacter.
- All vegetables and fruit are washed before preparing.
- Food left out is covered, for example when cooling down.
- Frozen meat, fish and prepared foods are thawed properly before cooking.
- Meat and fish are cooked thoroughly; a food probe is to be used to check temperature of roasted meat or baked meat products.
- Where a microwave is used, food is cooked according to manufacturer's instructions. Generally, it is not used to heat children's food and never used to heat babies' bottles.
- Microwaved food is left to stand for a few minutes before serving.
- A food probe is used to check temperature of food, including where heated in a microwave; it is checked in a number of places to avoid 'hot spots'.
- Food is cooked in time for serving and is not prepared in advance of serving times but enough time for food to be warm for eating and not too hot for children.
- Hot cupboards or ovens are not used to keep food warm.
- Potatoes and vegetables are peeled when needed, not in advance and left in water.
- Food prepared and cooked for different religious dietary needs and preferences, such as Halal or Kosher meat is cooked in separate pans and served separately.
- Food cooked for vegetarians does not come into contact with meat or fish or products.
- Food cooked and prepared for children with specific dietary needs is cooked in separate pans and served separately.
- A separate toaster is kept and used for children with a wheat or gluten allergy when necessary.
- Food prepared for children with dietary needs and preferences is clearly labelled and every effort is made to prevent cross-contamination. Children with allergies/ dietary requirements have 'red' placemats. Babies have their own individual trays and staff sit at the table.
- Raw eggs are not to be given in any form, such as mousse or mayonnaise.
- When given to children, eggs are fully cooked.

Serving Food

- Staff risk assess the likelihood of children with dietary restrictions accessing the food of other children and must take appropriate action to prevent this from happening, for example:
 - check the list of children's dietary requirements displayed in the food preparation area
 - red place mats
 - babies have own trays and cannot reach over to other plates
 - older children are sat on another table where possible and a member of staff closely monitoring
 - children are educated about their dietary requirements

Children with allergies/food preferences are not made to feel 'singled out' by the methods used to manage their allergy/food preference. Food is made similar where possible.

- Food served to children with identified allergies is checked by the key person to ensure that the meal (and its ingredients) does not contain any of the allergens for that child.
- The child's key person remains present throughout the child's mealtime, if this is not possible the information is clearly passed onto one other staff member who knows this child well.
- Food is taken from the kitchen to the rooms on a trolley, not carried across rooms.
- Tables are cleaned before and after, with soapy water or a suitable non-bleach product.
- Members of staff serving food wash their hands and cover any cuts with a blue plaster.

E.coli prevention

Staff who are preparing and handling food, especially food that is not pre-prepared for consumption e.g. fruit and vegetables grown on the premises, must be aware of the potential spread of E.coli and must clean and store food in accordance with the E.coli 0157 guidance, available at:

www.food.gov.uk/business-industry/guidancenotes/hygguid/ecoliguide#.U7FCVGIOWdl
