## Barrier Surgical Products

***Hinson & Hale Medical Technologies Inc.'s medical barrier fabric provides superior performance where the risk of transmitting infection is a primary concern.***

***The lightweight yet durable construction results in significant cost savings when compared to disposable alternatives.***

***This highly fluid repellent, reusable medical fabric incorporates carbon fiber threading designed to eliminate electrostatic dissipation. This unique feature prevents adherence and retention of particles and pathogens.***

***Quality Construction – Increased barrier protection is aided by quality, continuous filament stitching in critical areas to minimize liquid contact.***

***Superior Barrier Protection – Our barrier fabric (99.5% polyester and .5% carbon) is a high-density polyester with carbon fiber threading.***

***Resistance To Adherence And Retention – Resists the adherence and retention of pathogens preventing the spread of nosocomial infections promoted by traditional health care fabrics.***

# Barrier Surgeons' Gowns

*Prevents adherence and retention  
of particles and pathogens!*
