

BLACK ROSES
Giant
Schnauzers

HEALTH WARRANTY

The puppy is guaranteed to have been examined by a Veterinarian, is in good health and has received all necessary vaccinations at time of delivery.

Replacement of puppy of equal or lesser value (our choice) will be made if ALL of the following requirements are met:

- o Puppy must be examined by licensed veterinarian within 72 hours of delivery date.
- o Buyer must contact Seller immediately upon discovery of life-threatening genetic defect. Any delay in doing so will void the guarantee. The opinion of two (2) licensed veterinarians (one chosen by Seller) is required to determine that the puppy indeed has an immediate life-threatening genetic defect that was present since birth.
- o The puppy must be returned to the Seller within 72 hours from delivery time and accompanied by a letter from both examining Veterinarians stating in what respect the puppy has been found to have a life-threatening genetic defect.
- o If during the puppy's exam by licensed Veterinarian, puppy is declared to have an immediate life-threatening genetic condition with 72 hours of delivery date, the puppy must be treated and then returned to Seller alive within 72 hours of discharge (licensed veterinarian must approve that the puppy is healthy enough to travel) along with written report submitted from by attending Veterinarian. We reserve the right to find a second opinion of our choice.
- o Buyer will pay all cost of Veterinarians care, return shipping of puppy and delivery of replacement puppy.
- o If a puppy dies, you must follow the advice of your veterinarian and have an autopsy performed by your local state lab. NO autopsy performed by a local veterinarian will be accepted. An official copy of the State Lab report will need to be submitted to Seller within two (2) weeks of death.
- o Seller is not responsible for any Veterinarian or State Lab expenses.
- o No guarantee will be given for any puppy as to size, color, quality, ability disposition or fertility.
- o Hernias and retained testicles are not considered a life-threatening genetic defect.
- o Buyers agree to continue vaccinations, de-worming treatments, and heart dewormer.

Thank you for choosing a Giant Schnauzer from Black Roses
