ICD-10 and Radiation Oncology

September 23, 2008

Note: ICD-9-CM and ICD-10 are owned and copyrighted by the World Health Organization. The codes in this guide were obtained from the US Department of Health and Human Services, NCHS website.

For at least the past twenty (20) + years, we have learned and used ICD-9-CM when coding for our providers . As someone once said, just when we learned the answers, they changed the questions. Also, for years, there has been rumor that ICD-10 would be replacing ICD-9, and now this will soon be a reality.

According to the Code of Federal Regulations, specifically, 45 CFR Parts 160 and 162, Titled HIPAA Administrative Simplification: Modification to Medical Data Code Set Standards To Adopt ICD-10-CM and ICD-10-PCS; Proposed Rule, dated August 22, 2008:

“We propose October 1, 2011 as the compliance date for ICD-10-CM and ICD-10-PCS code sets for all covered entities. It is important to note that the compliance date must occur on October 1 in order to coincide with the effective date of annual Medicare inpatient PPS updates.”

There is an old saying in coding, “If it isn’t documented, it doesn’t exist or it didn’t happen.” When ICD-10 becomes effective, it’s success is dependent on the provider’s documentation. If the documentation shows, “OM”, many of us know this means Otitis Media. Under ICD-9-CM, you have the following codes for OM:

ICD-10 will require more work on the provider to document the exact type of diagnosis found with the patient. ICD-10 opens more with the anatomical area affected and allows for coding of chronic modalities.

Lets look at some of the most used codes in the Radiation Oncology with the ICD-10-CM Instructions

Note: Functional activity

All neoplasms are classified in this chapter, whether they are functionally active or not. An additional code from Chapter 4 may be used, to identify functional activity associated with any neoplasm.
Morphology [Histology]

Chapter 2 classifies neoplasms primarily by site (topography), with broad groupings for behavior, malignant, in situ, benign, etc. The Table of Neoplasms should be used to identify the correct topography code. In a few cases, such as for malignant melanoma, the morphology (histologic type) is included in the category and codes. To identify the morphology for the majority of Chapter 2 codes that do not include the histologic type, comprehensive separate morphology codes are provided. These morphology codes are derived from the second edition of the International Classification of Diseases for Oncology (ICD-O). The correct morphology code can be found in the Alphabetic Index to Diseases under the main and subterm term for the type of neoplasm, adenocarcinoma, sarcoma, etc.

Primary malignant neoplasms overlapping site boundaries

A primary malignant neoplasm that overlaps two or more contiguous (next to each other) sites should be classified to the subcategory/code .8 ("overlapping lesion"), unless the combination is specifically indexed elsewhere. For multiple neoplasms of the same site that are not contiguous, such as tumors in different quadrants of the same breast, codes for each site should be assigned.

Malignant neoplasm of ectopic tissue

Malignant neoplasms of ectopic tissue are to be coded to the site mentioned, e.g., ectopic pancreatic malignant neoplasms are coded to pancreas, unspecified (C25.9).

V Codes are now Z Codes.

The Table of Drugs and Biologicals that were 900 series codes and E Codes are now T Codes.

The proposed effective date for ICD-10 is October 2, 2011. That gives us three years to get ready.

So, what do we have to do?

- **Retraining**
Staff Coders need to be retrained to code using ICD-10 codes. Providers need training to be more detailed with health record documentation. Bilers will need to have knowledge of ICD-10 o ensure claims go out with the appropriate ICD-10 codes and to fight coding denials.
- **New Manuals**
ICD-10 Manuals will need to be obtained and used.
- **Updated Software**
Medical Billing software needs to be updated to include both ICD-9-CM and ICD-10. This is because with an October 1, 2011 proposed effective date, Claims for September 30th will still use ICD-9 Codes.
- **Certified Staff Coders**
The Certifying Organizations are working to ensure coders are certified in ICD-10, and by upgrading their test
- **Updated Carrier Policies and Procedures**
Providers who are contracted and have agreed to carrier coding policies should be reviewing these policies and to make sure the contracted carrier is ready to accept the new codes. You should find out if there are going to be any claims payment delays due to the changeover to ICD-10 as this may affect contract payment timeframes.
- **Updated Compliance Plans**
Practices and Billing Companies should update their compliance plans regarding ICD-10 coding. Extra attention should be directed to performing internal audits of charts and claims
- **Updated Coding Denial Appeals**
If the billing company is using a cookie cutter appeal, then the appeals should be reviewed an updated to conform to ICD-10 standards.
- **Updated Superbills**
If the practice is using a superbill that contains ICD-9 codes, these should be replaced with the appropriate ICD-10 code(s).

- **Continue to fight fraud, abuse and any up/downcoding issues.**
As with any changes there is always the fear that using something new is better resolved by downcoding a claim to remain under the “radar”
Finding more codes available could lead to temptation to upcode or to submit a false claim to increase practice revenue.

If we use the time we have been given for preparation, the transition from ICD-9 to ICD-10 can be very seamless.

The key to the successful use and transition to ICD-10 is going to ensure our Providers are aware of their responsibility towards better documentation of the patient’s medical condition(s).

As a wise ED provider used to say all the time, “Document your charts as if you were going to court.” I would then add, “and as if your paycheck depended on it.”

Use the following formula: $PPD = \text{Lawsuits and LOR (Loss of Revenue)}$.
