Note: ICD-9-CM and ICD-10 are owned and copyrighted by the World Health Organization. The codes in this guide were obtained from the US Department of Health and Human Services, NCHS website.

For at least the past twenty (20) + years, we have learned and used ICD-9-CM when coding for our providers . As someone once said, just when we learned the answers, they changed the questions. Also, for years, there has been rumor that ICD-10 would be replacing ICD-9, and now this will soon be a reality.

According to the Code of Federal Regulations, specifically, 45 CFR Parts 160 and 162, Titled HIPAA Administrative Simplification: Modification to Medical Data Code Set Standards To Adopt ICD-10-CM and ICD-10-PCS; Proposed Rule, dated August 22, 2008:

*“We propose October 1, 2011 as the compliance date for ICD-10-CM and ICD-10-PCS code sets for all covered entities. It is important to note that the compliance date must occur on October 1 in order to coincide with the effective date of annual Medicare inpatient PPS updates.”*

There is an old saying in coding, “If it isn’t documented, it doesn’t exist or it didn’t happen.” When ICD-10 becomes effective, its success is dependent on the provider’s documentation. If the documentation shows, “OM”, many of us know this means Otitis Media. Under ICD-9-CM, you have the following codes for OM:

**ICD-10 will require more work on the provider to document the exact type of diagnosis found with the patient. ICD-10 opens more with the anatomical area affected and allows for coding of chronic modalities.**

**The following are some guidelines found in ICD-10. These could be subject to change by 2011**

## **Instructional Notations**

**(Click Left Arrow to Return To Link Point)**

### **Includes:**

The word "Includes" appears immediately under certain categories to further define, or give examples of, the content of the category.

### **Excludes Notes**

The ICD-10-CM has two types of excludes notes. Each note has a different definition for use but they are both similar in that they indicate that codes excluded from each other are independent of each other.

### **Excludes1**

A type 1 Excludes note is a pure excludes. It means "NOT CODED HERE!" An Excludes1 note indicates that the code excluded should never be used at the same time as the code above the Excludes1 note. An Excludes1 is for used for when two conditions cannot occur together, such as a congenital form versus an acquired form of the same condition.

### **Excludes2**

A type 2 excludes note represents "Not included here". An excludes2 note indicates that the condition excluded is not part of the condition it is excluded from but a patient may have both conditions at the same time. When an Excludes2 note appears under a code it is acceptable to use both the code and the excluded code together.

**Code First/Use Additional Code** notes (etiology/manifestation paired codes) Certain conditions have both an underlying etiology and multiple body system manifestations due to the underlying etiology. For such conditions the ICD-10-CM has a coding convention that requires the underlying condition be sequenced first followed by the manifestation. Wherever such a combination exists there is a "use additional code" note at the etiology code, and a "code first" note at the manifestation code. These instructional notes indicate the proper sequencing order of the codes, etiology followed by manifestation.

In most cases the manifestation codes will have in the code title, "in diseases classified elsewhere."

Codes with this title are a component of

Lets look at some of the most used codes in Ophthalmology. Please note that the ICD-9-CM codes were selected and provided by coders or billers in that specialty. Some ICD-9-CM codes may not be able to be crosswalked to ICD-10-CM. Many unspecified codes must have more anatomical descriptions in order to select the proper specific ICD-10-CM code.

The term "low vision" in category H54 comprises categories 1 and 2 of the table, the term "blindness" categories 3, 4 and 5, and the term "unqualified visual loss" category 9. If the extent of the visual field is taken into account, patients with a field no greater than 10 but greater than 5 around central fixation should be placed in category 3 and patients with a field no greater than 5 around central fixation should be placed in category 4, even if the central acuity is not impaired.

**E Codes are now V-Y Codes**

**V Codes are now Z Codes.**

**The Table of Drugs and Biologicals that were 900 series codes and E Codes are now T Codes.**

**The proposed effective date for ICD-10 is October 2, 2011. That gives us three years to get ready.**

**So, what do we have to do?**

- **Retraining**  
Staff Coders need to be retrained to code using ICD-10 codes. Providers need training to be more detailed with health record documentation. Bilers will need to have knowledge of ICD-10 to ensure claims go out with the appropriate ICD-10 codes and to fight coding denials.
- **New Manuals**  
ICD-10 Manuals will need to be obtained and used.
- **Updated Software**  
Medical Billing software needs to be updated to include both ICD-9-CM and ICD-10. This is because with an October 1, 2011 proposed effective date, Claims for September 30<sup>th</sup> will still use ICD-9 Codes.
- **Certified Staff Coders**  
The Certifying Organizations are working to ensure coders are certified in ICD-10, and by upgrading their test
- **Updated Carrier Policies and Procedures**  
Providers who are contracted and have agreed to carrier coding policies should be reviewing these policies and to make sure the contracted carrier is ready to accept the new codes. You should find out if there are going to be any claims payment delays due to the changeover to ICD-10 as this may affect contract payment timeframes.
- **Updated Compliance Plans**  
Practices and Billing Companies should update their compliance plans regarding ICD-10 coding. Extra attention should be directed to performing internal audits of charts and claims
- **Updated Coding Denial Appeals**  
If the billing company is using a cookie cutter appeal, then the appeals should be reviewed and updated to conform to ICD-10 standards.
- **Updated Superbills**  
If the practice is using a superbill that contains ICD-9 codes, these should be replaced with the appropriate ICD-10 code(s).

- Continue to fight fraud, abuse and any up/downcoding issues.  
As with any changes there is always the fear that using something new is better resolved by downcoding a claim to remain under the “radar”  
Finding more codes available could lead to temptation to upcode or to submit a false claim to increase practice revenue.

If we use the time we have been given for preparation, the transition from ICD-9 to ICD-10 can be very seamless.

The key to the successful use and transition to ICD-10 is going to ensure our Providers are aware of their responsibility towards better documentation of the patient’s medical condition(s).

As a wise ED provider used to say all the time, “Document your charts as if you were going to court.” I would then add, “and as if your paycheck depended on it.”

Use the following formula: PPD = Lawsuits and LOR (Loss of Revenue).
