

## PRODUCT GUIDE

DRIVING LIGHTS | LIGHT BARS | WORKLIGHTS |  
INSPECTION LAMPS | HEADLIGHTS | WIRING KITS

## SEE YOUR WORLD IN A DIFFERENT LIGHT

Since blazing onto the scene in 2004, Ignite Lighting has transformed from a producer of halogen lighting to a beacon of LED innovation in Australia, lighting pathways previously unseen and outshining the rest with our laser-sharp focus on advancement.

Known as a luminary in automotive LED lighting, Ignite offers comprehensive solutions that illuminate the adventures of both the wild-hearted explorer and the steadfast professional. From the uncharted terrains beneath the 4x4s to the robust highways traversed by heavy trucks and the sleek aerodynamics of the current Mustang GEN3 Supercar, our lighting legacy is unmistakably revered.

**See your world in a different light.  
See it with Ignite.**

# COMPLETE LIGHTING SOLUTION

Ignite's extensive range of automotive lighting is carefully designed to cater to a variety of applications, from adventurous explorations to demanding professional environments.

## Laser LED Driving Lights & Lightbars

Leverage cutting-edge Laser LED technology for unmatched brightness and coverage, designed for expeditions and challenging work environments.

## Slimline LED Round Driving Lights

Maximise impact with sleek design through lights that offer sleek efficiency and strong illumination.

## Ultra Slimline LED Lightbars

Embrace slim, powerful lighting with Series 3 Ultra Slimline Lightbars, balancing aesthetics with performance.

## LED Worklights

Guarantee bright, reliable lighting in all work conditions with versatile LED Worklights.

## Wiring Harness Kit

Ensure an effortless, robust upgrade with our universally compatible "Plug and Play" kits.

## LED & Halogen Globes & Headlights

Achieve top-tier visibility with a wide range of LED and Halogen headlights, fitting any vehicle setup.

## Signal Lighting

Boost safety with bright, durable LED Signal Lighting for clear signalling in all situations.

## LED Upgrade Headlight & Signalling Globes

Transform your vehicle with efficient, bright LED retrofit globes for superior visibility.

## Halogen & Xenon HID Headlight Globes

Upgrade to Ignite Halogen and Xenon HID globes for unparalleled clarity in night driving.

## Torches & Portable Worklights

Explore lighting solutions for both recreational and professional use, ensuring thorough illumination.

## BREAK NEW GROUND

Introducing the Ignite Laser LED Driving Lights and Lightbars – the ultimate lighting solution for adventure and work.

Ignite has revolutionised the LED driving light and lightbar landscape with our innovative Laser LED technology. These lights deliver exceptional lighting performance, offering both distance and unmatched light output.

**LED TECHNOLOGY  
OVER & UNDER  
VOLTAGE  
PROTECTION**

## LASER LED DRIVING LIGHTS

**IDL2306S**

### **Unmatched performance, unparalleled visibility**

The combination of Laser LED and LED Illumination technology provides superior lighting output, increasing the normal laser 2° spot beam pattern to an impressive 8°, ensuring optimal visibility on the road.

### **Illuminate your path with power and clarity**

The combination of 22 x 6 Watt high-intensity LP LED's and 1x 20W OSRAM Laser LED produce an impressive 14,500 Raw Lumens and 12,300 Effective Lumens. Achieve a remarkable 1 Lux Rating at 1,008m, lighting the way forward like never before.

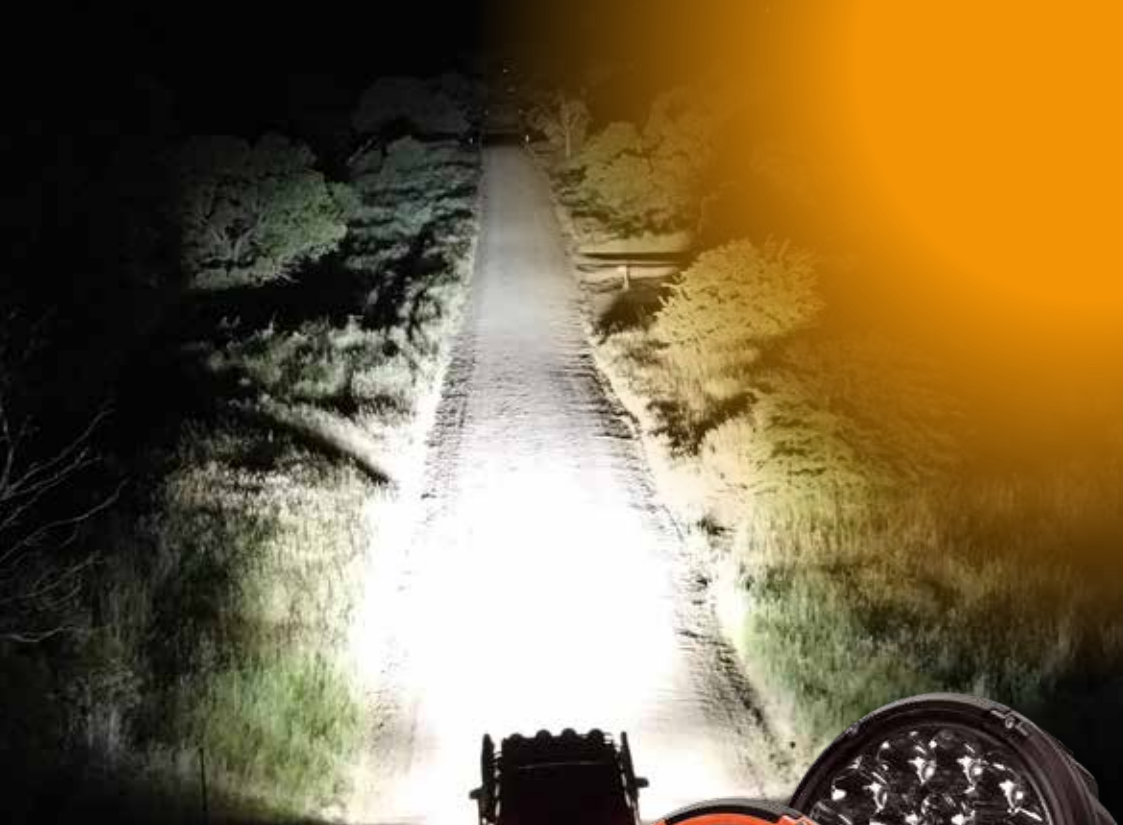

### **Versatile and Vibrant**

Your journey, your rules. Choose between interchangeable orange and black bezels to match your style or mood.

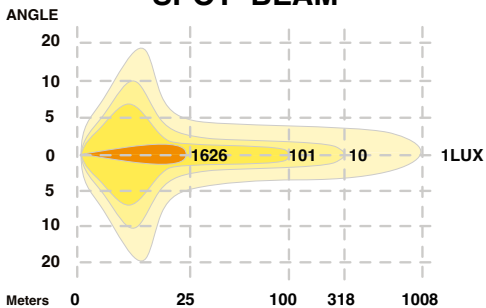

### **Unyielding Reliability**

These driving lights are engineered for endurance, featuring UV, water, and shock resistance, as well as anti-rust and anti-freezing qualities. They are certified with ECE R10 and CE standards and come with IP68 and IP69K ratings for superior dust and water resistance. With comprehensive electrical protections, a long 50,000-hour lifespan, and a 5-year warranty, embark on every drive with absolute confidence.

# DUAL ROW LASER LED DRIVING LIGHTBARS

**Available Sizes: 10" | 15" | 20" | 30" | 40" | 50"**

## Trailblazing Laser LED Technology

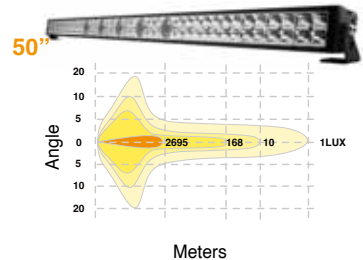

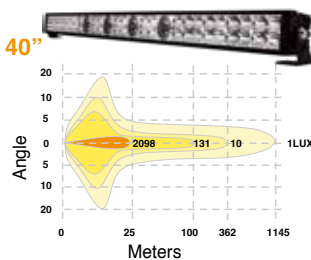

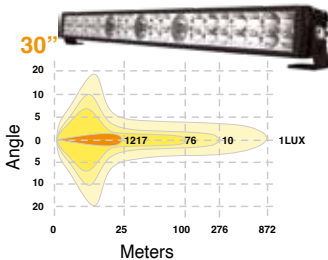

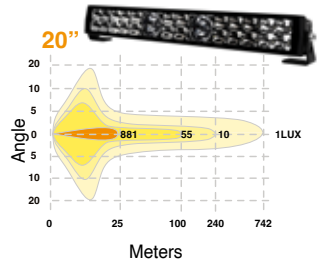

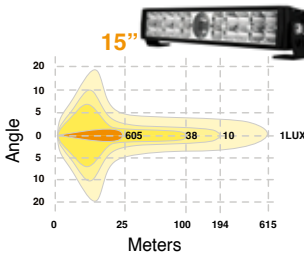

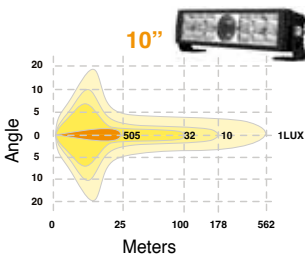

Combines laser and high-intensity LED lights to pierce through darkness and adverse weather with unmatched precision.

## Dynamic 20° Combo Beam Pattern

Cast a net of luminosity that stretches wide and far, unleashing a tide of visibility that ensures not just sight, but insight into the road or trail ahead.

## Rugged Durability for Extreme Conditions

Design to defy the elements, these lightbars feature over and under voltage protection and superior resistance against UV light, water, and shock impacts. A lifespan of 50,000 hours promises enduring illumination, backed by a robust 5-year warranty for your peace of mind.

Full Range

Discover exceptional lighting with Ignite's 7" and 9" Round Slimline LED Driving Lights, pairing high-intensity LG and CREE XM-L2 LEDs with Ignite's patented TIR optical technology.

Choose from the precise 7" 60W model or the powerful 9" 120W variant, with either a Black or Chrome Fascia.

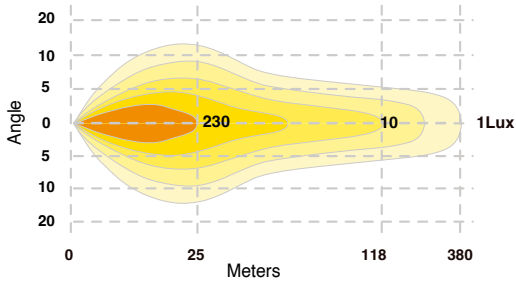

Housed in durable cast aluminum with electronic thermal management and IP68/IP69K ratings, these lights guarantee 50,000+ hours of reliable performance backed by a solid 5-year warranty.

Whether for exploration or work, Ignite's Slimline LED Driving Lights deliver unmatched clarity, turning night into day for any challenge ahead.

# ULTRA SLIMLINE LED LIGHTBARS

Available Sizes: 10" | 14" | 20" Straight & Curved | 30" Straight & Curved | 40" Straight & Curved | 50" Curved

Ignite Series 3 Ultra Slimline LED Lightbars combines sleek design and cutting-edge technology for modern explorers and workers.

With a remarkably slim profile of only 40.5mm in height and 52mm in depth, these lightbars feature an ultra-compact profile with innovative 5-Watt High-Intensity LG/LP LEDs at their core, designed for superior light output.

The completely flush front fascia is meticulously designed to prevent dust and water accumulation, leaving no room for compromise. They offer versatile mounting options with compact brackets and durability with IP68 & IP69K ratings.

Featuring both Spot and Flood Beam patterns for precise, far-reaching visibility up to 1 Lux @ 648m, and a dual colour option to improve visibility in challenging weather by switching between amber and white light.

With an integrated heat-sink, pressure equalising vent, and a sophisticated thermal management system ensuring these lightbars can run at peak performance for longer periods.

Available in multiple sizes and designs, with a 50,000-hour LED lifespan and a 5-year warranty, they ensure high performance and reliability for any activity.

## LED WORKLIGHTS

Seize the night and conquer darkness with the supreme brilliance of Ignite LED Worklamps, your ultimate ally in diverse settings. Whether serving as a work lamp, an ambient awning lamp, a radiant interior lamp, a welcoming courtesy lamp, a navigational deck lamp, a rugged tub lamp, or even as an ECE-approved reverse lamp, Ignite's LED Worklights shine with relentless vigour and versatility. Select the perfect Ignite LED Worklight from an extensive assortment of sizes, shapes and beam patterns tailored to fit your specific space.

## WIRING HARNESSES

Scan QR code for Full Range

The Ignite Wiring Harness Kit significantly simplifies the addition of any Ignite Driving Lights, Lightbars, or Worklamps to your vehicle. It's designed with a straightforward "Plug and Play" approach for an effortless DIY installation that doesn't require special tools or expertise. Various Headlamp and Harness Adaptor Kits are available to compliment the kit, making it universally compatible across a range of vehicle models.

High-quality materials and design, such as the flexible braided tubing, protect against damage. The kit caters to both positive and negative switched vehicles and ensures a perfect fit with diverse headlight types. The Ignite Wiring Harness Kit facilitates a professional-grade installation, promising a seamless enhancement of your vehicle's lighting.

## UNIVERSAL HIGH BEAM CANBUS INTERFACE

Scan QR code for Full Range

The Ignite Universal CANBus Interface Module simplifies adding aftermarket lights to vehicles by converting CANBus data to 12V Positive Analog Outputs, processing signals for park lights, headlight beams, vehicle locking, ignition, and more, with additional functional capabilities.

## LED HEADLIGHT

Ignite's LED Headlights range of 7" and 7x5" options in high/low beams and black or chrome designs suit a range of diverse applications. Enhanced with Daytime Running Lights, they provide unparalleled visibility and safety for all journeys.

## 50% MORE LIGHT ON THE ROAD\*

\*Compared to Traditional Halogen Bulbs

Please note:

• Not ADR or ECE Approved - For Off Road use only

• CANBUS Module may be required on some vehicles

## LED UPGRADE HEADLIGHT & SIGNALLING GLOBES

Experience unmatched clarity on your travels with Ignite's plug-and-play LED Headlight globes, which outshine halogens with a 50% brighter, 1800-lumen anti-glare white light. Engineered for durability with up to 30,000 hours of life, these globes have low current draw for minimal power consumption.

Ignite's LED signalling globes offer durable, efficient lighting in White, Amber, or Red, with multiple wattages and bases for optimal performance in tough terrains.

Enhance vehicle compatibility with Ignite's CANbus kits for a superior, reliable driving experience.

Light your way brilliantly with the revolutionary power of Ignite LED technology.

\*For off-road use only

## HALOGEN & XENON HID HEADLIGHT REPLACEMENT & UPGRADE GLOBES

Ignite sets the road ablaze with its range of Halogen and Xenon HID replacement globes that offer exceptional durability and performance. Engineered to OEM specification, the new long-life halogen globes promise double the lifespan of normal globes as standard, while upgrade options provide up to 200% more intensity and 4300K cool white light for sharper visibility. For vehicles with Xenon HID technology, Ignite offers seamless single bulb replacements.
